For the first time since the inception of the organization, the Pennsylvania Poultry Federation bestowed Industrymen of the Year awards to an individual in each of the three divisions of the organization. A. Eugene Bailey (left rear) received the Broiler Industryman of the Year award, Glenn Kime (center) was named Turkey Industryman of the Year; and Robert Shelly earned the industryman honor in the egg division. Seated in front of the men are their wives. Left to right, they are Lillian Bailey, Evelyn Kime, and Betty Shelly.

Poultry industrymen honored

By JOANNE SPAHR

LANCASTER, Pa. – The bestowing of three of the most highly prestigious and coveted awards within Pennsylvania's poultry industry climaxed a day-long poultry conference and banquet held at the Host Farm Resort last Thursday by the Pennsylvania Poultry Federation.

Before an audience of well over 200 producers and allied industrymen, A. Eugene Bailey, division manager of the broiler meat division of Pennfield Corporation, was named broiler industryman of the year. The honor of Egg Industryman of the Year was bestowed upon Robert S. Shelly, president of Producers Pride, Inc., Worcester, Pa., and the title of Turkey Industryman of

Family farms threatened again

EDITOR'S NOTE: Earlier this year a group of investment firms attempted to buy up huge tracts of land in the Midwest. It was known as Ag-Land Fund I and was disallowed by the American government after farmers and farm organizations blew the whistle on the scheme. More recently, a new threat to family has been discovered in California. According to California Grange Master Chester Deaver, "nothing illegal has been found in the scheme so far, but in my opinion it's morally wrong." The following account of the situation is reprinted from the National Grange's newsletter, "View from the Hill."

WASHINGTON, D.C. – A new proposal to accelerate

Alfalfa looking good but seeds scarce

By DIETER KRIEG

RUSSELLVILLE - After a short first cutting, alfalfa stands in southeastern nice comeback and prospects for decent crops are looking pretty good. That's the verdict of Chester County Agricultural Agent Glenn Shirk, who adds that "the absence of excess moisture" in May could be interpreted as having been beneficial to the crop. "Alfalfa has made a tremendous comeback," he asserts.

The situation for alfalfa seed is not so good, however. A scarcity is expected this Summer and it'll likely last for a year - possibly several years - according to some sources. Penn State University's Extension agronomist, John Baylor, told a group of Chester County farmers meeting here on Tuesday that seed supplies are at an all-time low. "An August seeding of

New vehicle code bypasses farmers

HARRISBURG - Pennsylvania's Secretary of Transportation, James Wilson, issued an order this week which will allow farmers to operate their farm implements as they have in the past. Earlier, the rules and regulations for farm equipment were to be revamped as part of a package program which overhauls the entire Pennsylvania Motor Vehicle Code. The new rules of the road - as they apply to motorists, truckers and pedestrians - go into effect on July 1. Segments of the law which deal with farm equipment, however, will remain unchanged from the 1959 regulations or as they have since been amended.

According to Warren Lammb, Berks County legislator and member of the House Agriculture Committee, the measure undertaken by Smith is only

Raspberries small crop - over shortly

By JOANNE SPAHR

LANCASTER, Pa. - If you have a hankering for raspberries, but haven't gotten around to buying any as yet, you'd better hurry out and purchase a quart or two. According to growers, the majority of this year's crop will be gone by next weekend with only a few stragglers remaining.

Normally a short crop, this year's supply was reported to be even smaller than usual due to freezing temperatures early in the year and dry weather later in the Spring. Growers affirmed that demand for this juicy fruit was high, as well.

Clarence Eckman, of Eckman's Fruit Farm, Conestoga R2, told Lancaster Farming last Tuesday that many of the canes and tops of his stalks froze during last Winter's severe temperatures and for this reason, didn't push out as many berries.

Fortunately for growers, rains came at just the right time to alleviate a dry spell that could have caused the berry size to be small this year. According to Rudy Grob, of Amos Funk's Farm Market, Millersville R1, the moisture was timed nicely,

WHY DO FARMERS LOOK TO BEACON FOR NO-NONSENSE FEEDING?

Farmers have learned that Beacon Feeding and management programs are geared to make money for a farmer.

We're not afraid to be innovators. But our programs start first with proven research . . . are recommended by specialists who know their business . . . make use of practical quality ingredients . . . and are backed by local dealers who appreciate your business.

FOR EXAMPLE:

Dairy Feeding Programs

are recommended specifically for your herd. Any purchased feed recommended is to provide the nutrients you don't grow yourself. Beacon know-how can well be the key to providing the net profit you must have to stay in business.

Nutrena CLS

is one of the most economical methods of providing protein that your herd needs for good health and high production. Handy to feed and the Beacon supply service is excellent.

Pre-Serv Products

are used by steadily more farmers to offset the effects of oxidation, mold and spoilage. More than 300,000 tons of hay have been treated with Hay Pre-Serv as farmers harvest hay up to 26 hours earlier, cut and store hay with as much as 25 percent moisture.

- Beacon Silage Pre-Serv provides up to 30 percent more feeding value per ton of grass silage or haylage because of less spoilage and shrinkage.
- Grain Pre-Serv is suitable for both feed grains and food grains to greatly reduce oxidation and resulting mold damage.
- Feed treated with Beacon Feed Pre-Serv keeps feed free from mold damage up to two weeks longer than untreated feed. feed.

Poultry Feeds

both for layer and turkeys - are formulated to provide the top performance at reasonable price that spells profits.

Swine Feeds

The Beacon Nutrena line up - for all ages and types of swine - is a proven and profitable program of management. The end result is more pig for your money, more profit for your time and investment.

Miscellaneous Feeds

to fit special needs also emphasize the completeness of Beacon service.

- **Minerals**

  Three supplements especially formulated for the cow and to provide more mineral units per dollar.

- **Dog Foods**

  Chunk style or Meal style and the new High Protein Dog Food.

- **Tend-R-Leen**

  Steer Feed for outstanding results with dairy beef.

THE OLD FARMER'S ALMANAC

JUNE 27-JULY 3, 1977

Feel like you oughter plunge in the water.

Dig early potatoes now Amelia Earhart disappeared July 2, 1937 . Full moon June 30 Average length of days for the week, 15 hours, 17 minutes First air clipper flew to Europe June 28, 1939 . Yellow Fever hit New Orleans this week in 1855 Battle of Gettysburg began July 3, 1863 *The journey of 1,000 miles starts with a single step*

Ask the Old Farmer: What is the meaning of the expression "start from scratch" and how did it originate? R E, Buffalo

It is said to have originated when a starter made a scratch in the ground to indicate the starting line in a foot race If true, it probably dates from some centuries ago

Home Hints. Making a batch of biscuits to serve with a fried chicken? Add a couple of tablespoons of minced parsley and a couple of teaspoons of minced onion to a 2-cup flour recipe of the biscuits

OLD FARMER'S WEATHER FORECASTS

New England: Warm and showery with cooler temperatures by midweek, week's end hot, sunny, thunderstorms

Greater New York - New Jersey: Clear, hot with some showers most of the week, end of week clear and hot

Middle Atlantic Coastal: Clear, hot, sunny most of the week, thunderstorms over the weekend

Piedmont & Southeast Coastal: Clear, hot with thunderstorms all week

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

Bring'em to the farm

Chicago's newspaper food editors, representing a combined circulation of over two million, were invited to tour dairy farms in their region last Summer, and the idea appears to merit consideration in other parts of the country.

According to information furnished by the National Dairy Council, one of the food editors described the experience in these words: "Before we came here, all we knew about dairy farming is that you produced milk and that you were always raising prices. Now we know what's involved in dairy marketing and, most important, we know you better. We hope we can keep our lines of communication open so that there will never be any misunderstandings."

A similar effort, aimed at consumers was underaken by Inter-State Milk Producers last Fall. There again, leaders of consumer groups came away impressed and a gap of misunderstandings was bridged. It's efforts such as these which will educate the non-farm people, and if it's to be done, much of the planning and work will have to be done by the farmers themselves. In fact, no other group of people is as well qualified as the farmer to undertake worthwhile publicity campaigns.

The public's need for improved food production information is illustrated each time an ill-informed housewife says she can do without the farmer because she gets her groceries at the supermarket The public's thirst for better understanding is acknowledged when requests are turned in to have farmers come back with their promotional programs. Last October's promotional efforts at the Park City Mall in Lancaster are an excellent example of that. The Lancaster County Farmers Association put on a big show; the public and merchants appreciated it, and they want them to come back. Consequently, another promotional effort for Park City is now in the planning stages. Such repeat projects demonstrate that the public is appreciative about being fed some knowlege which is not available to them anywhere else.

No method is perhaps more successful in dispelling the false impressions and opinions some people have of farm life than to offer them the opportunity to see for themselves. Farm Visitation Days are an applaudable step in that direction. It's clear that farmers and their cooperatives are doing a great deal to make the facts of their livelihood known.

The Chicago effort stands out as being a little extraordinary, however, for the simple reason that by bringing newspaper correspondents in for a tour, they in turn will be able to open a new door or two to millions of their readers. The net effect is that the farmer reaches many more people than he could otherwise.

Perhaps a similar project can be tried in this area. Why not invite a food editor or home economics teacher to your farm or processing plant to show them what it's all about?

Boy, do we have it nice!

If my arms were long enough, I'd want to wrap them around good old Mother Earth and give her a big hug. This is that time of year that you just can't help to think that we really have it nice.

Last Saturday my two young boys and I were in a strawberry field. The week before we picked cherries.

Vegetables are maturing in the garden and there's lots of fresh produce for sale at roadside markets.

While enjoying those sweet and juicy strawberries under a sunny sky last week, it dawned on me that they were really special. I mean **very special**.

Isn't it amazing how a bunch of soil and a seed can get together to produce such a delicious fruit? It's a miracle.

The same holds true for cherries, peaches, and all other fruits and vegetables. They're all modifications of the same miracle of life, and they provide us with nutrition and pleasure. Boy, do we have it nice! To think about all the plants and animals which we have to make our life pleasant - you can't help but be amazed.

Whether kneeling in a strawberry patch, walking in a shaded woods, wading in a cool stream, or walking across an alfalfa field, it all points out that God has provided immeasurable blessings and beauties for us.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W ALTHOUSE

SING TO THE LORD!

Lesson for June 26, 1977

Background Scriptures:
Exodus 14 through 15.
Devotional Reading:
Psalms 136: 1, 13-26.

Just about one year ago our nation was in the midst of its two hundredth anniversary. The July 4th weekend was the climax of a celebration that some said "Never really got off the ground." There will be varying opinions on that subject, but few would deny that at best the birthday party was subdued, somewhat akin, perhaps, to the celebration of a person who no longer is anxious to call attention to his or her age.

There was an effort put forth to encourage the churches - local congregations as well as denominations-to do their part in the celebration. And many did, scheduling special observances, services, and projects throughout the year. Still, when it was all over (nobody seemed quite sure when that was), there was a feeling that the party had been, on the whole, disappointing.

Into the midst

Sometimes the pronouncements made it seem as if God were simply one of a long cast of characters in the great historical pageant of American freedom. From time to time, it seemed, God did "his part" -whatever that is or was. It was as if God deserved no more than mention among the "patrons list" on the official program. So, maybe one of the reasons that the celebration was such a dull party was that many people didn't know what the celebration was all about.

This is a problem the people of Israel do not have when they celebrate the Passover. Although they revere and honor Moses and the Israelites who followed him, there is no question as to who or what was the source and author of their freedom: "And Israel saw the great work which the Lord did against the Egyptians" (Exodus 14:31). God alone was the Liberator of the people of Israel and their historic response to that recognition has always been in the spirit of celebration expressed by Moses' sister, Miriam: "The Lord is my strength and my song,, and he has become my salvation" (15:2).

He has triumphed!

Should we not also view our freedom as a gift from God? Should we not also regard him as our Liberator? Instead of assigning God a "part" in our celebration, ought we not to knowledge that he is the great author and source of our freedom?

This takes nothing away from the "fathers" of the Revolution. It takes nothing away from the rag-tag armies of Continentals who endured incredible suffering against fantastic adds, nor from our French allies and others. Without Moses there probably would not have been an Exodus; without these mem there might have been no Revolution. But behind it all, it is God who moves men and nations toward freedom.

NOW IS THE TIME.

TO MAKE MISTAKES ON PAPER

Farmers who are planning on some construction to their existing buildings, or new buildings, should take the time to put their plans on paper first; many times farmers will not take the time and effort to explore all possibilities and then change their minds during the construction process; this costs extra money and delays the operation. We urge folks planning new construction to visit other similar operations and talk to the farmer. In this manner, mistakes can be avoided and costs re mistake that is n paper, or on the board, can be chang and with little expe

TO RECOGNIZE P POTENTIAL

A number of farmers in this par country plant ten Summer forage cro as sudan grass, or o sudan-sorghum These crops gro during the Summer and provide good gr green-chopping. there is an element the possibility of pru poisoning if the cro handled properly. crops are grazed o chopped too soon, danger of poisoni growth of sudan gras be at least 18 inche the sudan-sorghum the growth should be 24 to 30 inches hi same growth is ne the aftermath grazi the field has been h and grown back ag hybrids carry more of prussic acid p than the sudan varieties.

TO BEWARE "STRANGER" SAL

Again, we rep suggestion that should be on the against the "bla salesman, or an stranger that seem peddling a "bargai of the materials m represented, and so salesmen may be but in case they ar buyer is left "hol bag". We suggest t farmers continue with reliable conce area that are inte good service and future. We have these kind of business who dese port. The traveling that comes and g cut-throat prices d

Fruit growers view the newest in equipment

YSBURG - There's ike a showing of new achinery to get out to a meeting and achinery is to be rated in use, so better. The truth in ment was revealed June 15 when ap- tely 200 fruit from southcentral ania gathered at others Fruit Farm, Pa. for a demon- of orchard equip- ment.

"How do you arrange such perfect spraying weather for this demonstration when as growers we're confronted so often with less than ideal conditions?" This question by William Wilson, RD 1, Biglerville, summarized the near perfect conditons which existed permitting the equipment dealers to display the variety of spray patterns and the differences in application rates which modern sprayers are capable of delivering.

Flexibility is a word which well describes the sprayers now available to growers. Some manufacturers offer as many as ten different models. Skid-mounted models, powered by diesel engines, may be moved through the tree rows on three-quarter ton pick-up trucks. One self-propelled unit featured eight speeds forward or in reverse and carried a $36,000 price tag. Tank sizes vary permitting use with tractors of varying size. Dial-type nozzles and adjustable fans add to the flexibility of sprayers for use with different crops.

Low profile tractors suitable for use in low branched, close-row plantings attracted lots of interest. One such omni-trac or tricycle type unit demonstrated orchard mowing beneath the over-hanging trees, but will accomodate a forklift, a pruning tower and other three-point-hitch and power-take-off uses. Another unit suitable for use in close-row plantings featured an air-cooled engine, good fuel economy and a short turning radius made possible by the articulation principle which in effect is a hinge or pivot between the front and rear wheels.

A self-propelled bulk bin carrier for picking up filled bins in the orchard and delivering these to packinghouses or fruit storage created interest. This unit, developed in California, has been coming into use in New York orchards. A "drop harvester" for use in collecting dropped apples, a low-profile mechanical shaker, a mechanical harvester and a variety of orchard mowers were included among the 32 machines demonstrated by fourteen different distributors.

"This was the largest demonstration of orchard equipment in the East" said Philip Pitzer, host for the event which was co-sponsored by the Adams County Fruitgrowers Association and the Penn State Extension Service. The auxiliary of the Bendersville Fire Company provided a food stand for the event.

AGRI-KING
KEY TO PROFIT

LOOK AHEAD TO YOUR
SUMMER FEEDING PROGRAM.

Just because it's yours, don't waste it! Don't forget . . .
New hay, new pasture . . .
Needs new tests and new formulation by Agri-King, Inc.

Boy! This new hay sure tastes good after eating corn silage all winter.
Sure does, but I hope the boss doesn't get so busy that he forgets to send a sample in to the lab to keep our ration balanced!!!

FEEDER HEIFERS: Choice 400-700 lbs. 33.00-35.00. Mixed Good and Choice 400-600 lbs. 32.00-33.75. Good 400-500 lbs. 27.50-32.00.

Omaha

June 23, 1977

WEEKLY 51 – CATTLE – Compared with the previous weeks close –

Closing prices on slaughter steers were 75-1.00 higher and heifers finished 50-75 higher. Cows were 1.50-2.00 higher and bulls were firm to 50 higher.

Four day receipts 17,600 as compared 19,300 previous week and 18,400 a year ago. For the first time in an eight week period, prices on slaughter steers and heifers were higher than at the end of the preceding week. Supplies were moderately reduced from the previous week, and most interests came into the week with limited live inventories on hand. The upturn in live prices was substantially supported by higher carcass prices, although demand through midweek was characterized as only moderate. The overall finish of the steer and heifer supply showed some deterioration with a larger volume of good and low-choice than most recent weeks. Slaughter steers made up approximately 48 of the week's total and heifers 33. Cows comprised 13 and feeders for auction 5.

STEERS: At midweek high time, load choice and prime predominantly 3 with end 4 1073 lbs. 41.00, load choice and prime 3-4 1223 lbs. 40.75. Few loads and part loads choice 3 1050-1275 lbs. 40.75. Bulk choice 2-4 975-1360 lbs. 39.50-40.50, many sales 40.00-40.50, load choice and prime 4-5 1458 lbs. 38.00. Mixed good and choice 2-3 950-1250 lbs. 38.75-39.50. Good 2.3 35.50-38.50. Standard and good 2-3 34.00-35.50.

Average of LS-214 detailed quotations, for choice 900-1100 lb. Steers this week 40.02. Choice 1100-1300 lbs. 39.92. Average weight steers first three days 1140 lbs. as compared 1143 lbs. previous week. Average weight heifers first three days 960 lbs. as compared 973 lbs. previous week.

HEIFERS: Load choice and prime with few steers 3-4 943 lbs. 40.50, few loads and part loads same grade 950-1025 lbs. 40.00-40.25. Choice 2-4 875-1100 lbs. 38.75-40.00. Mixed good and choice 2-3 800-1000 lbs. 37.00-38.50. Good 2-3 33.50-37.50. Standard and good 2-3 31.00-33.00.

COWS: Utility and commercial 2-4 25.00-26.50, few 26.75-27.00. Canner and cutter 22.00-25.00, some holstein cutter 25.50.

BULLS: 1-2 1400-1800 lbs. 30.00-33.00, individual 1 33.50.

Oklahoma Cattle

June 23, 1977

Thursday feeder cattle auction

Estimated receipts 12,000. Same day last week 11,506.

Active, feeder cattle and calves firm to 1.00 higher, instances 1.50 higher on offerings under 500 lb. Majority recipts 450-850 lb. feeder steers and 400-700 lb. feeder heifers. Fairly large attendance buyers.

FEEDER STEERS: Choice 300-500 lb. 41.75-44.75, Small lot 445 lb. 46.80, 500-600 lb. 40.00-43.75, Package 579 lbs. 43.90, 600-700 lbs. 38.50-41.50, small lot 626 lb. 43.40, 700-800 lb. 38.00-39.75, part load 701 lbs. 40.00, 800-900 lbs. 36.75-39.00, small lot 985 lbs. 35.30, mixed Good and Choice 400-600 lb. 37.00-39.50, 600-700 lb. 37.00-38.75, 700-800 lbs. 36.75-37.25, few Good 640-870 lbs. Holstein steers 31.50-32.75.

FEEDER HEIFERS: Choice 300-500 lb. 33.50-36.25, part load 482 lb. 37.25, 500-725 lbs. 33.50-36.50, small lot 603 lbs. 37.00; Mixed Good and Choice 300-650 lbs. 31.00-33.00; Good 300-700 lbs. 28.25-31.00.

FOR THE WEEK: Compared to late last week, feeder cattle over 500 lbs. closed 1.00-2.00 higher, offerings under 500 lbs. closed 2.00-3.00 higher; cows closed 1.00-2.00 higher, late sales utility and commercial 2-3 24.00-25.75; Cutter 1-3 21.00-24.50; Bulls closed weak to 50 cents lower, instances 1.00 lower. Sate Sales YG 1-2 1000-1700 lb. 28.50-31.50. Salable receipts near 21,800 compared to 24,492 last week and 19,778 head the comparable week a year ago. Cows and bulls near 5 per cent of cattle receipts, feeders near 93 per cent of total.

WHY

IM-PRUV-ALL

SILAGE ?

TIME

HEAT

Nutrient Losses

T.D.N.

Palatability

To save more of the nutrients in corn silage, use IM-PRUV-ALL silage compound.

ORDER NOW FOR PRE-SEASON DISCOUNTS.
University studies have shown IM-PRUV-ALL silage compounds to be a non-chemical, but natural mineral combination, specially blended to feed the living lactic bacteria present in plant cells. When IM-PRUV-ALL silage compounds are added to the crops, while being ensilaged, the bacteria will have proper food balance to make a rapid and more favorable fermentation.

WHAT DOES A RAPID, LACTIC FERMENTATION MEAN?

HIGH QUALITY FEEDS

BETTER HEALTH PRODUCTION

- shorter fermentation time
- less heat damage
- less nutrient loss
- more palatability
- higher T.D.N.
- decreased nitrate levels
- controlled pH level (for better environment of stomach bacteria)

LESS GRAIN NEEDED

MORE PROFIT EARNED

We are so confident you will like the quality of your silage, that the IM-PRUV-ALL company offers a MONEY-BACK GUARANTEE with all purchases of IM-PRUV-ALL special silage compounds. If you are not satisfied, your money is refunded.

Product liability suits 'border on rediculous'

EPHRATA, Pa.–Normal standards of caution seem to be suspended in many product liability lawsuits. Recently, a knife manufacturer had to pay a nine-year-old boy $150,000 after he drew one of their knives across his wrist to "see if it was sharp".

Two men recently received large damage payments from a mower manufacturer. They had been injured after they picked one of the firm's mowers off the ground and used it to trim a hedge.

These examples are part of a trend that could stifle product improvements and business growth according to Donald W. Parke, executive vice-president of PennAg Industries Association. PennAg is a trade organization of some 400 Pennsylvania Agribusiness firms.

Writing in the June issue of Grist from the Mill, a publication for PennAg members, Parke said, "In 1963 there were 50,000 product liability suits against U.S. manufacturers. In 1971, there were 500,000 Last year's figures are expected to reach one million – and those do not include out of court settlements. Many of these settelemnts border on the ridiculous."

Parke noted that he became concerned about the problem when he learned from a number of PennAg members that their product liability insurance would not be renewed. The insurer said that it would not renew policies covering any operation where chemicals were added to feed.

"Our response to this was complete and unequivocal," Parke noted in his column. "One point we made is that everything in creation has some chemical composition, including corn, and oats and any other feed grain.

"It doesn't make sense to talk about adding chemicals to feed. Feed is a chemical. Combining ingredients – or chemicals, if you will – into a scientifically balanced ration is what the feed business is all about."

Behind the insurance companies' concerns and skyrocketing court awards lies an outmoded legal precedent, according to Parke, known as the doctrine of strict liability. "This means literally that the manufacturer of a product is responsible for any injury or damage caused by his product. It doens't matter when the product was made, whether its been altered, or used contrary to instructions. And it doesn't matter what the state of the art was at the time of manufacture."

Parke said this had led to a curious situation where some manufacturers are refusing to introduce new models of their products, even though they are demonstrably safer. "Lawsuits have been won by people claiming that the mere introduction of a newer model means the older model was unsafe," Parke said.

Insurance companies can no longer predict the risk for certain lines of coverage and it's causing an upheaval in their industry. But help may be on the way in the form of two bills currently in the Pennsylvania legislature. Senate Bill 585 and House Bill 749 are identical bills; both have wide bi-partisan sponsorship.

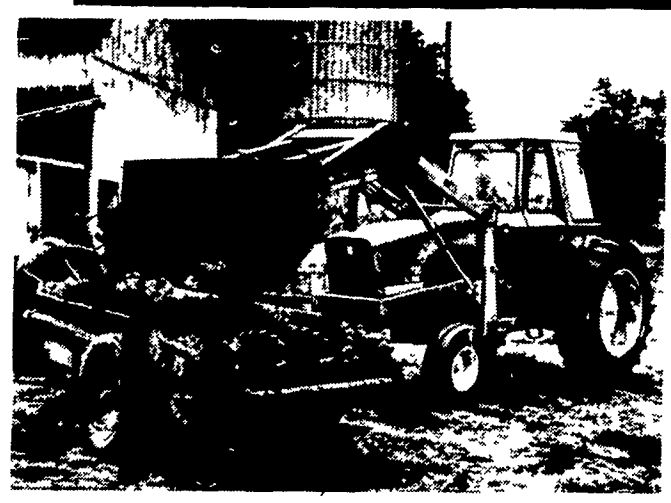
Under the proposed legislation, the doctrine of strict liability would not apply to product damage claims.Time limits on when a suit could be brought would be set. A suit could not be brought after a certain number of years following the date of manufacture, or after an alledged injury.

The proposed legislation also spells out some rules of evidence. A manufacturer could not be sued if, at the time of any user injury, the product conformed to prevailing designs and safety standards or other state of the art considerations. Evidence that a product had been altered by a user would be a defense for the manufacturer. Advances in product design could not be used as evidence that previous models had been unsafe.

Punitive damages would be prohibited, and there would be limits on any attorney's fees bas percentage of an a

"'Whie many of provision have ver application to members," Par cluded, "we do legislation is cer start in providing place for insuran panies to do busine help restore a d predictability wh help the whole community."

WHAT'S NEW



LOADER

MILWAUKEE,Wis. - A new series of loaders from Allis-Chalmers offers more lift capacity and a higher reach than any loader previously available from the company. Designed for use with its line of over-100 hp tractors, the 470 series loaders will lift 3500 pounds to a height of 13½ feet. The loader is built with heavy duty usage in mind, whether it is handling dirt, manure or big bales.

With a 62 inch reach, the boom extends to place the bucket where the operator has a good view of his work. The boom and bucket are operated by the tractors' hydraulic controls so there is no need for an auxiliary hydraulic pump. Steel hydraulic tubing is factory mounted inside in the boom to provide the operator with an unobstructed view, as well as prevent possible operating damage to the tubing. Cylinder rods are chrome plated to provide long life.

Less than five minutes are normally required to attach or detach the loader. To mount the loader, it is a simple matter of connecting the hydraulic coupler, hydraulically engaging the alignment pins, inserting the lock pins and storing the parking stands.

Loader mounting brackets are attached to the tractor axles to distribute stress to the rear axles created from large loads. Mounting brackets may remain on the tractor, as they are located where they should not hinder the use of the tractor with most other tools.

Attachments available with the 470 series loaders include: 60 inch manure bucket with dirt plate; 83 inch material bucket and optional tines; 96 inch material bucket with spill guard; grapple over bucket; hay grapple fork; hay stacker for loose hay; boom mounted round bale handler and three point hitch bale mover; 84 inch snow bucket; and 96 inch dozer blade.

mmunity, and may ason for unpleasant . Be sure the seller le and will stand is merchandise.

E CAREFUL OF NTANEOUS MBUSTION

gh temperatures of mer months may be the cause of fires in many garages, attics, and machine shops. Oil and grease-soaked rags are often discarded into a box, or a pile, and forgotten. When temperatures get high there is great danger of these rags combusting and starting a fire. We urge a good clean-up campaign around the premises to prevent the chances of a fire. As mentioned earlier in the year, gasoline and kerosene are highly combustible and should be kept in metal tanks or cans; they should never be stored in glass containers. Fire prevention is always much better than fire fighting.

Bollinger cow goes GM

BRATTLEBORO, Vt. - The Holstein - Friesian Association of America reports that Gold Medal Dam status has been achieved by El-Lyndo Leader Phebe, bred and owned by Elam Bollinger, Manheim. This recognition is based on an animal's ability to transmit outstanding milk production and desirable body conformation.

El-Lyndo Leader Phebe qualified on the basis of her lifetime production of 158,220 pounds of milk and 6925 pounds of butterfat and her nine records averaging 18,120 pounds of milk and 794 pounds of butterfat.

Production testing and type classification information must be available in order to evaluate cows nominated for this award.

MEDICINE AND MANAGEMENT

By CARL TROOP, VMD

Facts to know about protein

It is at the same time easy and difficult to define a protein. It is easy to give a fairly clear idea generally what we mean. It is difficult in being absolutely precise about our definition.

The word protein is most familiar when used in connection with food or feed. Protein is the body building constituent of the diet which is essential for growth and life itself. It is a component of the structures of all cells and amounts to about 13 per cent of the body weight. It is not a single substance but a very large class of substances. They are fundamentally similar in many ways.

Proteins are built from chemical units called amino acids. They, like carbohydrates, contain carbon, hydrogen, and oxygen elements. They also contain the element nitrogen, and this is the most important factor which distinguishes them from other food substances. Approximately 16 per cent of the protein compound is composed of nitrogen.

Protein can be a source of energy and is figured into the TDN (total digestible nutrients, or TDE (total digestible energy) along with carbohydrates and fats. But when protein has to provide some of the energy it is a very inefficient conversion. Some of its nutrient value is lost when protein, which is a body building and structural substance, has to be converted into an energy source due to inadequate energy supply. The importance of balancing protein and energy cannot be stressed too much. Dietary protein should be able to be used directly for body protein, for the development and maintenance of tissues and vital organs and for normal fermentation in the rumen.

A lack of dietary protein will greatly alter the rate of growth, maturation, and milk production of dairy cattle. Since protein is not toxic, large excesses can be fed without danger, and while usually not detrimental to the health of the animal, it is a very uneconomical practice. Although usually not fed to great excess, more profit is usually lost from overfeeding than underfeeding protein.

Rations that are deficient in portein are poorly utilized in respect to the other nutrients also, and thus are associated with unthriftiness and poor growth. Good nutrition has an important role in preventing infections. Antibodies, for example, are primarily protein, and dietary protein is vital for their manufacture.

Undernourished cattle do not exhibit many well-defined signs. The resultant appetite usually is poor - which may lead the owner to conclude that an inadequate ration is not the cause of the problem. The demand of the animal must be taken into consideration also, as the requirements are higher during late gestation and peak lactation.

The rumen of the cow and other ruminants makes them unique in the animal kingdom regarding protein metabolism. Rumen microorganisms (bacteria and protozoa) can degrade (break down) protein and non-protein nitrogen compounds of the feed (urea and biuret). Ammonia is the major nitrogen compound produced and is used by the bacteria and protozoa to make protein for their own use. This protein is eventually digested in the small intestine. Urea is not effectively used by non-ruminant animals or small calves where the rumen is not yet developed, but in older cattle urea in the ration to a limited degree is a beneficial as high quality true proteins. In former years when there was a larger price difference between urea (non protein nitrogen) and vegetable protein, urea played a much larger role in providing nitrogen for some of the dietary protein. Urea should be limited and latest recommendations indicate it should not make up more than one per cent of the concentrate.

Ruminants are unique in that you are not feeding the animal; you are feeding the micro-organisms in the rumen. They can take nitrogen from urea or degraded natural protein and combine it with other nutrients in the ration to build their own body protein. The urea is broken down to ammonium, then the ammonium is converted, along with other ingredients, especially carboydrates or other energy source, to bacterial protein which is then digested and utilized by the ruminant. If there is a deficiency of carbohydrates in the diet an excess of ammonium accumulates in the rumen. If absorbed in sufficient amounts the animal can become toxic.

Sudden changes in the protein content or source can cause disorders and acute indigestion, putting cattle off feed for extended periods of time. Only certain organisms are capable of utilizing certain proteins, and if the source or type of protein is suddenly changed, the cow is left with a rumen full of organisms for which there is now no "feed", and only a few organisms which can utilize the new "feed". These will multiply until they can fully handle the new feed supply but it takes time. All changes should be made very gradually so as not to upset the rumen "bugs".

Protein requirements vary with size and age of the animal, stage of lactation and gestation, and the amount of milk being produced. Tables and charts are available in many publications including the National Academy of Sciences book listed in the last column. Protein requirements are added for growth (if still growing), maintenance (repair and replacement of tissues), production, and reproduction.

The best and most economical protein is from your own forages, especially good early cut, leafy legume hay. What your forages can't supply must be balanced out in the concentrate. This is the livelihood of the feed industry, to provide the protein in a concentrated form to supplement home grown protein balance the energy of home grown grains and silage. Consequently pro is often overfed as muc underfed in relation energy supply, especiall the lower producing en the herd.

The importance adequate, high qua protein cannot be stre too much. It must the balanced with an adeq energy supply to insure the protein is not i ficiently used and maxi utilization is obtained f the protein which available. Crude prote the total protein in ration. Only the diges protein can be used by animal and this can greatly in some feeds. remember, any cha should be made gradu We don't want to upset t millions of rumen 'b working so hard ma protein which is so vit the animal and to you.

Family farms

[Continued from Page 1]

the corporate takeover of agriculture has appeared on the scene in the form of a $50 million land investment syndicate to buy out farmers and then lease the land back to them. The syndicate, known as Western Farmlands, Inc., is being established in California, and includes a land management company and two investment corporations, one of which is foreign based. Officials of the group have current or former ties with some of California's largest land, banking and food corporations. The syndicate is seeking investors who can put up a minimum of $1 million each to raise between $20 million and $50 million, and claims it will "offer the investor a way to participate in the farming business while avoiding many of the risks...it provides current income, potential for growth of the investment, and anonymity of ownership."

The proposal has created a storm of protest in California among state officials who fear that the investors may be attempting to take advantage of family farmers who have fallen into economic difficulties as a result of the drought. Malcolm MacNaughton, an investment banker who is involved in the formation of the syndicate, denied that the syndicate plans to buy drought-stricken land, but did concede that the drought may put pressure on farmers to sell all or part of their land.

A thorough review of the proposal has been called for by the governor's office and the California State Board of Food and Agriculture, in addition to an examination to be conducted by the Consumer Affairs Department. Chester Deaver, Master of California State Grange, is a member of the Board and was among those who expressed alarm and called for a review of the proposal.

The matter was brought to the attention of the U.S. House of Representatives by Congressman Leon Panetta (D-Cal.), who said he had requested the Chairman of the Subcommittee on Family Farms and Rural Development of the Agriculture Committee to hold hearings on the issue. "We must place immediate restrictions on investments in farming by large non-agricultural businesses by eliminating tax advantages for non-farm investors, prohibiting corporations which receive assets from activities other than farming from directly engaging in agricultural production, and limiting the amount of land owned by non-farmers," Panetta said. "This trend is dangerous for not only the family farmer, but for the economy as a whole," said Panetta, and declared "it is essential that the public be made aware of these threats to the basic foundation of agriculture in this country." John W. Scott, Master of the National Grange, agreed with Congressman Panetta's statements and has joined him in requesting the subcommittee chairman to hold hearings on the subject. The Grange was one of the leaders in opposing A-Land Fund 1, a similar proposal to buy up farm land, which was finally dropped.

Balanced capacity— more productivity, less maintenance

International® 815/915 Combines

A big International combine answers the need to cover more acres a day with fewer grain losses From cutting to unloading, balanced capacity meets varying crop conditions Great for those extra-heavy hanging heads of maize. Plenty of grain header size from 10 to 24 feet, and the power to harvest at a fast pace with 144 to 162 hp

- Low profile design—go through a 12-ft door Easier storage and transport, too
- Fast changeover to other crop headers with Quick-Attach universal feeders
- Hydrostatic all-speed drive and comfort-control cabs are standard
- Big-mouth cylinder/concave space—extra room for crop to enter, exclusive fin and wire straw walkers
- Unload grain thru 12-in auger tube, 146 bushels in 1½ minutes

Let's arrange a demonstration.

USED COMBINES
- IH 101 with 10' Grain Head

Ephrata wins

One of the most successful delegations of FFA chapters at last week's FFA Activities Week on the Penn State campus was this one from Ephrata. All of them won gold medals. They are, front row, left to ritht: Curtis Martin, Sheryl Bollinger, John Weiler (first place dairy team in the state); standing: Ron Good, Barry Martin (top two dairy products judges in the state); Will Good, Marty Hoover, land judging gold medalists; Tony Eberly and Don Good, top meat judges in the state.

Annville-Cleona has best procedures team

The first-place parliamentary procedures team at last week's FFA Activities Week consisted of the following, left to right: Ellis Meyer, Alan Hostetter, Tom Landis, Jim Wampler, Bryan Burkholder, Reid Hoover, Bob Kreider, and Jay Bomgardner (not pictured).

Grain meeting set

EPHRATA, Pa. - Pennsylvania grain dealers will meet near Lancaster on June 27 to participate in the annual grain meeting sponsored each year by PennAg Industries Association, a trade organization of some 400 Pennsylvania agribusiness firms. The meeting will be held at the Sheraton-Conestoga Motor Inn north of Lancaster.

The grain meeting will get underway with dinner at 6:30 p.m. Claude Freeman, acting director for the Grains, Oilseeds, and Cotton division of the USDA's Agricultural Stabilization and Conservation Service, will speak to the group about the Carter administration's views on agricultural programs. He will also discuss the factors influencing this year's markets for food and feed grains.

Freeman has been with the USDA since 1951. Over the years he has been closely associated with the department's price support and production adjustment programs for grain crops.

Earlier in the day, from 2 to 4 p.m., there'll be a grain seminar devoted to an update on grain quality, farm legislation, grain inspection changes and air pollution control at grain elevators.

The seminar will be conducted by Dr. Harvey L. Kiser and Paul A. Nelson. Kiser is director of economic services for the Nation Grain & Feed Association, while Nelson heads up the association's information services.

ASCS programs explained to Berks Countian

By LAUREL SCHAEFFER
Berks County Reporter

LEESPORT, Pa. – The Beef Referendum and ASCS's present request for new acreage reports were the topic of a meeting held June 15, at the Berks County Agricultural Center.

Richard A. Pennay, agricultural program specialist, Pennsylvania ASCS office, explained to nearly 40 interested farmers the purpose behind the referendum and how it would work.

Anyone owning cattle during the past 12 months, including dairymen, are eligible to vote if they registered before June 17. Voting will be between July 5 and 15 at local ASCS offices throughout the country. To have the beef referendum passed, two-thirds of those producers who vote, must vote yes, and at least 50 per cent of the registered voters must vote.

Pennay explained that the purposes of the referendum was for the promotion of beef, consumer education, and research. "The USDA is disinterested in the referendum," he explained, "it is a producer referendum." ASCS is only a vehicle to answer questions and get the votes, he added.

The referendum would allow a beef board of not more than 68 producers appointed by the Secretary of Agriculture from nominations submitted by eligible producer organizations. These members would not draw a salary but would get expense money, Pennay explained.

The program would be funded by taking three-tenths of one per cent of the price of all cattle sold for the first three years. Afterwards, the board could decide to increase the amount to a maximum of five-tenths of one per cent.

Veal calves would work the same way, Pennay continued. Dispersal sales would also be eligible, but not for more than the slaughter value of the animals, the speaker explained. It is up to the beef board to decide how to determine the slaughter value, if they are to include them in the program. "The board can change the rules so that dispersal sales would not have to pay, he added.

There would be no deduction for beef used for home consumption, Pennay told the interested farmers, and the contribution is voluntary, but the deduction would be automatically taken off. A producer could apply to have the money returned if he has proof of sale, said the speaker.

Richard A. Pennay, agricultural program specialist from the ASCS office, explains the beef check-off program to Berks Countians.

Pennay also told the listeners, that if the secretary of the Board or 10 per cent of the producers who voted feel there is dissatisfaction with the program, a new referendum could be called.

Pennay also explained why farmers are being asked to give crop reports. "We want to update our farm history data," he explained. "The problem is determining what the price of the crops will be."

The agricultural program specialist told the farmers that presently there is a carry-over of more than one billion bushels of wheat, enough to supply the United States for two years. He also told them that this year the expected harvest is for two billion bushels.

Wheat seems to be the worst grain problem this year, he stated, but feed grains are at a threshold level. "Presently we are at a point of having 32 million tons in stock, and with favorable weather it can go to 60 million tons by the time 1978's crop is ready," said Pennay. "We could be in trouble with feed grains by next year," he concluded.

"Irrigation is a big contributing factor to our increased production," he continued to explain, "other countries are also increasing production, especially Argentina and Brazil."

"This is why the ASCS wants to decrease the physical acreage of some crops The target price system is part of our marketing system, a way to give you a fair price for your product." explained Pennay. "You have to have your share of the national dollar so you can run your farm," he added.

"Do you know that one year in Pennsylvania, 500,000 acres were out of production?" he asked.

Silviculture similar to vegetable gardening

By JAMES C. FINLEY
Area Forest Resource Agent
operative Extension Service Penn State University

IVERSITY PARK - Silviculture is the art and e of growing trees. An analogy can easily be drawn en silviculture and a vegetable garden. When a n is planted, weeded, and thinned, one can expect to t a good crop, provided the plants receive adequate ure and are protected from disease and insects. But ables planted in the wrong site, forced to compete weeds, or left in crowded rows will not produce r crops.

est, like gardens, need to be weeded and thinned in to produce good crops of timber and water. In time, e will do the weeding and thinning, but often we do ve the time or patience to wait.

ough the years foresters have learned how in- ual trees and other organisms interact to influence nother's growth. They have studied tree species and mined specific requirements for growth. This study e requirements is called "silvics." Silvics has fied several needs which influence a plant's ability ive and grow. Light, water, and nutrients are ry regulators of a species' competitive ability.

, and nutrients are primary regulators of a species' etitive ability.

eful observation reveals that certain species are in particular locations within a stand. For instance, ock frequently occurs on north facing slopes or along n banks in coves, but is seldom seen on south facing . Hemlock grows best on these sites because of dant moisture. It does not grow well on dry areas. ock has a wide-spreading shallow root system ing moisture near the soil surface.

mlock frequently occurs in nearly pure stands- gs or areas that contain essentially nothing but ocks. Hemlock's tolerance to shading is the reason his characteristic. Hemlock forms a very dense gy and allows very little light to reach a forest floor. species that can grow under very heavy shade will ve, and hemlock can survive in heavy shade. Consequently, hemlock seedlings will become established in the shade of the parent tree. They will survive, grow, and replace older hemlocks (when the older hemlocks die). Hemlock is classified as a climax species because once it fully occupies a site, it will continue to dominate the site and exclude other species. Species composition of a climax forest will persist until either a natural disturbance or man alters the stand.

Another example of a species influenced by moisture is chestnut oak (rock oak). This species is most often found on dry ridge sites. It grows on more moist sites, but is unable to compete successfully for light against species such as hemlock. As a result, chestnut oak grows where other species cannot find sufficient moisture.

It soon becomes evident that light and moisture can limit successful growth of any species. Foresters have studied the natural occurrence and growth rates of species and have constructed charts of relative tolerance to shade. These charts are used to explain why trees occur where they do within a forest and to understand their vigor.

A list of relative tolerance to shade follows:

Very Tolerant - Eastern Hemlock, Beech, Sugar Maple, Basswood, Hop Hornbeam.

Tolerant - Red Maple, Silver Maples, Yellow Birch.

Intermediate - E. White Pine, Elm, Amer. Hornbeam.

Intolerant - Black Cherry, White Ash, Yellow Poplar, White Oak, Red Oak, Hickory.

Very Intolerant - Paper Birch, Black Locust, Aspen, Larch.

Tolerance within a species is recognized by a number of characteristics. Tolerant species such as hemlock or beech persist in a forest understory. They respond to release from competition for light and moisture with accelerated growth and improved vigor, even after being suppressed for many years.

Under the same competitive conditions, lower branches of intolerant species usually die and break off many years earlier than those of tolerant species. This natural process is called self-pruning. Crowns of shade tolerant species have a denser appearance, and more leaf layers than do intolerant species, because lower branches remain alive much longer than those of intolerant trees. As a result, tolerant species frequently are slow to self-prune. They also tend to have more taper in the sawlog portion of their boles (trunks) in order to support their crowns.

Within mixed stands, tolerant trees persist and compete very well with species of equal size. Consequently, they tend to form stands that are dense, with more stems per acre than stands of intolerant species.

In even-age situations, such as occur after fires or clear cuts, tolerant species are quickly overtopped by faster-growing intolerant species. The tolerant trees will persist until the intolerant species is removed. The tolerants will then dominate the stand.

However, in a situation where both tolerant and intolerant trees are being established under an existing canopy, tolerant trees will dominate from the start. Because tolerant species prosper under shaded conditions they eventually become a major stand component, regardless of circumstances leading to stand regeneration.

The chart of relative tolerances shows that some of our more valuable species are found among intolerant species (black cherry, yellow poplar, white oak). These intolerant species have growth characteristics that make their wood valuable. Stands of intolerant species often have widely spaced stems, thus promoting rapid growth in height and diameter of each tree.

Crowns on intolerant trees will be small, resulting in relatively little log taper. Intolerant species in properly stocked stands will self-prune quickly, yielding high quality lumber with few knots.

Various species compete for a position within a developing stand. Left to nature, this competition can leave a lot to chance. Timber Stand Improvement (TSI) Practices shorten the time required to develop desirable forests. One common set of TSI practices is intermediate harvest cuttings.

TSI practices include weedings (of inferior trees and tree species), thinning (so that growth within the stand

Driver's licenses now split into six classes

HARRISBURG - Effective July 1, 1977, the Department of Transportation will begin to implement the "classes of driver's license" provision of the Motor Vehicle Code.

Frank X. Garber, director of PennDOT's Bureau of Motor Vehicles, announced that any individual renewing a driver's license on a July, 1977, renewal application form will be required to indicate on the application the type of vehicles they are qualified to operate.

Those drivers currently licensed as school bus drivers or motorcycle drivers will automatically have those "classes" endorsed on their license.

Any applicant who does not qualify for a 2, 3, 4, 5, or 6 class will automatically receive a Class One. The floowing are the description of classes of licenses:

Class 1 - (Minimum age - 16) A Class One license will be issued to those persons who are qualified to operate a single vehicle not in excess of 30,000 lbs. registered gross weight or any such vehicle towing a trailer not in excess of 10,000 lbs. gross weight.

Class 2 - (Minimum age - 18) A Class Two license will be issued to those persons who are qualified to operate a single vehicle over 30,000 lbs. registers gross weight or any bus or any such vehicle towing a trailer not in excess or 10,000 lbs. gross weight. Class Two will include Class One.

Class 3 - (Minimum age - 18) A Class Three lincense will be issued to those persons who are qualified to operate a vehicle while in combination with or towing a trailer in excess of 10,000 lbs. gross weight. Class Three will include Class One and Two.

Class 4 - (Minimum age-18) A Class Four license will be issued to those persons who have demonstrated their qualification to operate school buses.

Class 5 - (Minimum age - 16) A Class Five license will be issued to those persons who have demonstrated their qualifications to operate a motorcycle. Class Five will include Class Six.

Class 6 - (Minimum age - 16) A Class Six license will be issued to those persons who are qualified to operate a motor-driven cycle or motorized pedacycle (motorcycles with less than five horsepower).

Instructions have been inserted in every application that is being mailed from the Bureau of Motor Vehicles beginning with the July, 1977, applications.

All applications should be returned in the self-addressed return envelope to expedite the processing of the application.

Only the central office in Harrisburg will receive and process the applications. The regional offices in Pittsburgh and Philadelphia will not have the facilities to process these applications.

Because of this change in procedure, it is suggested that all applicants return the completed application to the Bureau of Motor Vehicles upon receipt of their application.

The applications are mailed out approximately seven weeks prior to expiration date. This change in procedure was implemented for the protection of the applicant.

Applicants must self-certify that they have had experience in the operation of the classes of vehicles that they have checked. If any individual self-certifies that they have had experience driving a certain vehicle of a class other than a passenger vehicle and it is documented later that this constituted a misstatement of fact, the penalty upon conviction for a misdemeanor of the second degree is a $5000 fine.

Those persons who at a later date wish to add an additional class to their driver's license after they have received their new driver's license will be required to obtain a learner's permit and successfully complete a driver's examination administered by the Pennsylvania State Police.

This new "class of driver's licenses" is an important new feature in the interest of safety on our highways.

York 4-H'ers competed at PSU

YORK - York County 4-H members participated in the Junior Livestock Field Day, held on June 18 at Penn State University. The Field Day attracted more young people this year than any other year in the past, with 223 youth members from all over the state registered for the livestock judging contest. The members judged beef, sheep, and swine with a total of six classes being judged.

Tim Beck, Seven Valleys, was second high individual with a score of 287 and Jeff Sneeringer, Hanover was tied for 10th place with a score of 285.

There were 33 members from York County participating in the contest. Other high placers in the contest were: Mark Ebaugh, Delta, with a score of 280. Jim Caudill, Airville - 279; Don Flory, Red Lion - 279; Jon Kinsley, York - 278; Brian Bankert, Hanover - 277; Steve Trostle, Red Lion - 276; Brenda Walter, Airville - 276.

In the sheep showmanship contest in the junior division, Jon Janney, Brodbecks, was first; Lisa Dobrosky, Glen Rock was third; and Mark Ebaugh, Delta was fourth. In the senior sheep showmanship contest, Laurie Dobrosky, Glen Rock was first and Judy Waltersdorff, York was fourth.

In the beef showmanship contest junior division, Chris Kinsley, York was second and Rachel Holloway, Seven Valleys was third. In senior division, Tim Seven Valleys was third.

The members participated in workshops management, nutrition, fitting and showing discussions.

Pistons and turbines display power

By DIETER KRIEG

BUCK - There are ents in any sport when tators are silenced by nation and wonder. It's hypnotic minute just to the big play. Or the en display of awesome which leaves body gasping.

itors to the Buck tor Pulling Stadium are ed to such occasions at weekly pull, but for seeking the more al, last weekend was a for thrills.

veral jet-powered hines were entered into l-hour long contests and noises from them ed more like a Boeing screaming down the ay, rather than a or laboring in the field. g, the jet-powered ters sounded like the nged jets stationed at terminal awaiting nce for take-off.

ith their turbines ing at 25,000 rounds per te, these strange- ng machines tackle the on sled and drag it a hard clay track with ingly little effort.

t these screaming ters aren't the only hines which display ome power. One ettor driving a tractor ed by two V-8 engines, for example, roared down the track with power to spare. When the heavy load got to be too much, the rear wheels just spun and the try for pay dirt came to a grinding halt. Then, before officials had unhitched his mechanical monster, and his pull was officially over, the driver hit the accelerator for just a split second. Power was instantly transferred from engines to rear wheels and in that brief moment, both wheels dug a small trench.

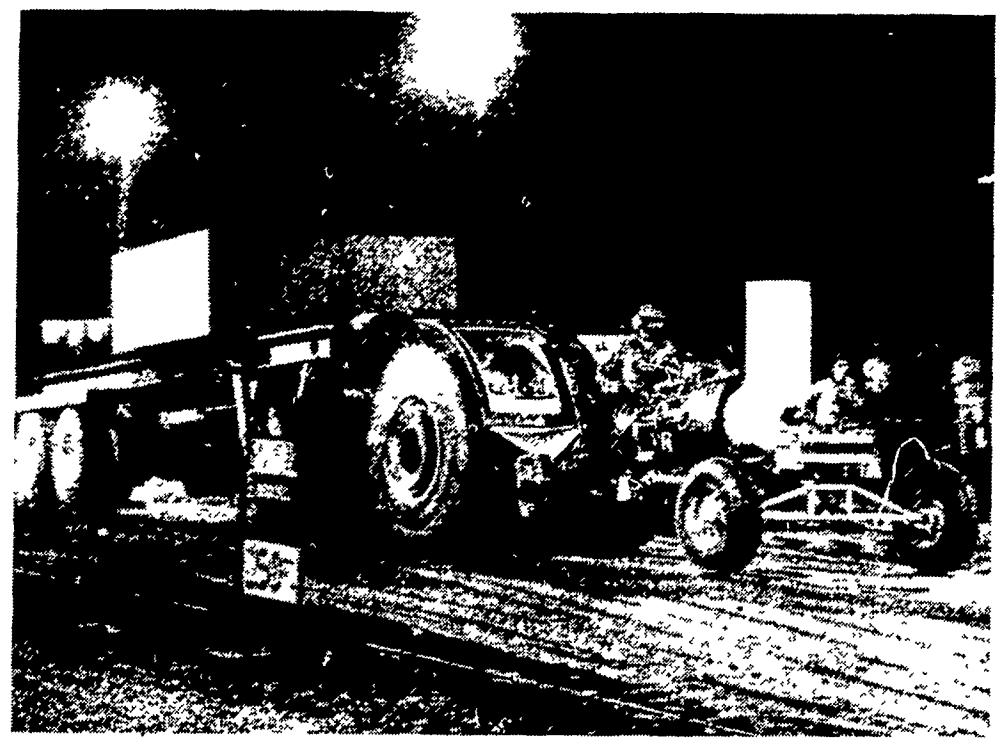
Some of the tractors pulling here develop several thousand horsepower. The engines are extremely well tuned and drivers have to be highly skilled to control all those "horses." At times, the machines take off like a wild mustang, with the front end coming off the ground and jumping from side to side. The crowds love it.

Visitors to the Buck track last week were fascinated by the method used to start the jet-powered tractors. An auxiliary tractor is used to provide electrical current to spin the rotors at high speed. Meanwhile, the jet hums and whines. Then there's a scream and possibly a burst of flames as the rich fuel is ignited and harnessed for work. In comparison to the modified tractor models which are run by as many as four V-8's, Allison aircraft, or tank engines, these versions are relatively quiet. They scream and hum. The sound of suction is also predominant.

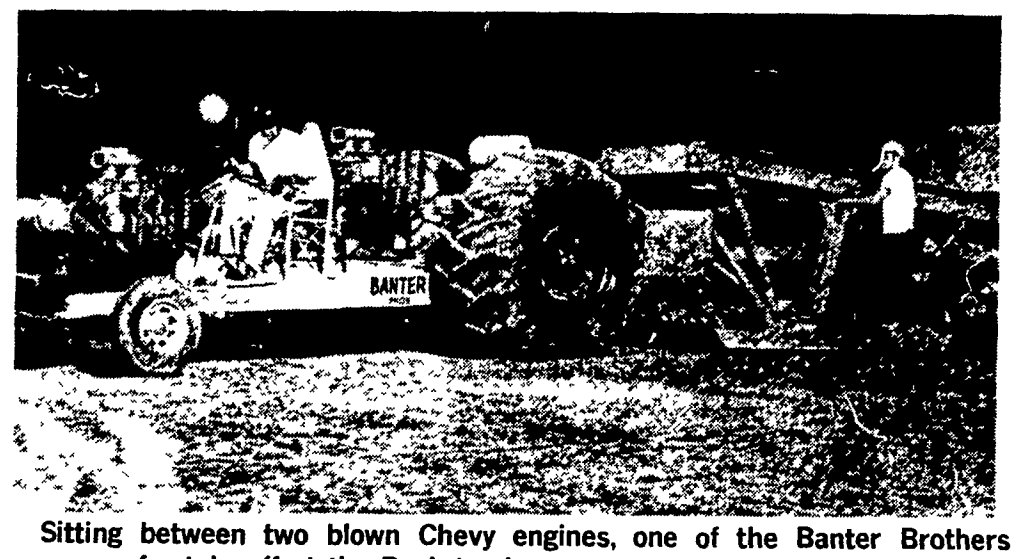
Providing the traction are huge rear tires which measure nearly a yard wide and six feet in height. They themselves cause astonishment for first-time visitors to the pulls.

At the Buck last week - as in most major tractor pulling contests - competition was divided into two categories: super stock and modified. The super stock tractors are factory models with variations as allowed by the National Tractor Pullers Association. Such variations include bigger tires and larger bores in the original block. Some pullers have applied some of their own engineering ideas to commercial farm tractors and increased horsepower tenfold. In the other category - modified - the competitor is allowed to go all out with his engineering ideas. Consequently, jet-powered and other bizarre machines were born. Exotic fuels are used by most pullers, with alcohol being a favorite. The end result is a performance of power which thrills crowds.

[Continued on Page 31]



This jet-powered machine had power to spare, but a moist track gave him traction problems.



Sitting between two blown Chevy engines, one of the Banter Brothers prepares for take-off at the Buck track.

Alfalfa looking

[Continued from Page 1]

alfalfa is therefore questionable," he added, "and don't look for a good situation next Spring either."

Baylor explained that yields of seeds out West are very low due to the prolonged drought that area has experienced. Only about a fourth of the normal irrigation water is available for seed fields. Other seed producing areas have had dry spells as well, and those regions where growing conditions have been favorable cannot make up for the losses encountered elsewhere.

A spokesman at a Lancaster County seed dealership confirms Baylor's warning, adding that the shortage will be more acute with better varieties. Some of the cheaper grades are likely to be available. The shortage is a nationwide problem, the spokesman added.

Baylor and Shirk made their remarks at a field meeting held near here on the Harold Ranck farm. A second meeting was held that evening at the Daniel Stoltzfus farm near Honeybrook. The purpose of the meetings was to show progress of various seed varieties and management practices. One of the more recently developed techniques to come up for discussion was lime coating of seeds. Baylor believes the idea has merit and expresses considerable interest in continuing research on it. Fifteen varieties of alfalfa seed were available for the farmers' inspection, with Baylor describing the qualities of each.

A big part of the program centered on alfalfa diseases and pests. Baylor emphasizes that anthracnose is the most serious alfalfa disease farmers have had to cope with in recent years. It is a high-temperature, high-moisture disease which generally makes its first appearance in late July or August. Shirk pointed out that alfalfa has been plagued by too much moisture in many areas during the last several years and therefore sees the lack of excess moisture so far this year as a key factor in turning the crop around.

Anthracnose is usually discovered in newly seeded fields first, although it may be found in established stands as well. The first sign of destruction is when individual stems die.

Three pests - weevils, leaf hoppers and leaf miners - came to the attention of the farmers who attended the meeting.

The leaf miner is more of a problem in second and third cuttings, says Baylor. The more ideal conditions there are for alfalfa, the less effect any of the pests have on the crop, the Penn Stater commented. Although aphids are a problem in some fields, they don't pose a threat under most conditions.

Questioned about spraying programs, Baylor emphasized that the economic factors have to be taken into consideration. That's especially true with leaf miners. A thumb rule is that if one leafhopper is caught per two sweeps of the net, spraying is justifiable.

The time of spray applications is determined by results of sweeping for bugs. Again, the thumb rule is to spray when regrowth is four to six inches tall. Baylor pointed out, however, that optimum spraying times vary for different species of bugs. To get rid of them economically requires some compromising on scheduling.

Baylor noted that weevils are the predominant bug problem in first cutting alfalfa; while miners and leaf hoppers come later. A compromised spraying schedule would perhaps catch weevils and miners on the first pass, and miners and leaf hoppers at a later spraying.

"Please don't treat new

[Continued on Page 25]

Chester County farmers gather around a newly established alfalfa stand on the Harold Ranck farm near Russellville. Penn State's Extension agronomist John Baylor led a program concentrated on diseases, weed control, varieties and hay preservation.

p food policy so the mber of unthinking s will vote them ffice!

chain stores ad- eef. They say they r sale at a certain ey don't promote telling how good it how good it is for us. They might advertise beef, but they sure don't promote it.

Advertising and sales promotion are but two facets of merchandising. Much more than this is envisioned when this program is implemented. To mention a few:

- Better packaging and handling of beef since industry methods have changed little in 100 years.

- Research in the human nutrition field, as more is known about poultry and swine nutrition than human.

- Scientific, not emotional, investigation into the cancer and cholesterol controversies as far as beef is concerned.

- Material for diet and nutritional education in the schools.

- Better cattle and beef statistics, as USDA figures are notoriously unreliable and manipulative.

- Public relation campaigns to counter future consumer beef boycotts that are sure to come when prices rise, as rise they must if we are to stay in business.

This program gives cattle producers a chance to get a hold of their own industry and affairs and to run them for their better benefit.

Another correspondent moans about the voting procedures. The present voting procedures are not those originally advocated by the Beef Development Task Force. They were arrived at through negotiation and compromise with USDA and ASCS. It was this or nothing and three years of hard work would have gone down the drain with the opportunity for such a program probably never arising again.

Another of your letter writers sent me a copy of a brochure on the Beef Referendum put out by the National Farmers' Union (NFU). Their literature was true to form, full of half-truths, outright falsehoods and not even clever innuendoes.

I don't think that intelligent cattle producers in touch with today's economic realities can vote any other way than "yes" in the Beef Referendum July 5 through 15.

Sometime ago a letter writer from Iowa in another ag publication stated that farmers and cattlemen are being ground down by the millstones of increased costs, controlled markets and many other things. We all know this, but he added "...you will have to find a way out from between the millstones....If you don't you are doomed to a future of peasantry, and you had better give up the idea of saving the old family farm and save the children instead by sending them into the city."

Maybe so, but there are a whole lot of us who believe very strongly that The Beef Market Development Plan will go a long way in preventing what that Iowan fears.

Vote "yes" in the Beef Referendum July 5 through 15.

Sincerely,
John W. Stump,
Chairman
Maryland Beef Development
Task Force

Farm Calendar

Alfalfa looking

[Continued from Page 24]

seedings as an established stand," Baylor advised when he began to talk about the management of newly established stands. He recommends letting the crop come to full bloom during its first year to eliminate any undue stress factors. That gives the roots a chance to strengthen and develop and will boost yields in future years.

The Penn State agronomist also says that there is no harm done in allowing a field of alfalfa to stand over Winter. "Smothering is not a problem," he asserted. "It's more of a question of whether you need the feed and whether or not rodents will harbor in the field if you don't cut it," Baylor said.

In another part of the field meeting, Nate Buckwalter, representative of a feed additive manufacturer, explained the use of hay preservatives. According to Baylor, this relatively new practice might save a field of hay if weather threatens. The cost of the applicator is $350 and the propionic acid retails for $1.30 per pound. The rate of application is two pounds per ton of hay baled. The treatment enables a farmer to bale his hay at a higher moisture level, which often times represents greater protein content since the sun has not drawn the nutrients out of the hay while it's laying in the field.

Grangers

Continued from Page 1

out, is the nation's fifth largest producing state in the nation and ranks second in the production of ice cream and other frozen dairy products.

"We know consumers have problems," Shelhamer declared, "and we know farmers have problems. The job is to get these two groups together and seek a mutual level of understanding of each other's problems."

Shelhamer's remarks were made during a panel discussion of the basic role of agriculture, and of its importance on state, national and international levels.

He told 458 Grangers attending the session that one of the primary needs in Pennsylvania is "to help our farmers make money and keep their families on the farm."

Other panelists pin-pointed the widening spread between prices farmers get for their products and prices consumers pay for food.

David R. Lambert, director of regulatory affairs for the National Grange in Washington, D. C., said the idea of "cheap food" that prevailed from the mid-30's was changed in the last decade by the combined impact of inflation, worldwide drought and the Arab oil embargo.

"The energy shortage is not a myth," he warned, "and we do not have enough oil to run our economy unless we import it." As a result, he pointed out, the balance of trade with foreign countries - which had been favorable in the past because of large exports of agricultural products - is running against us. "American industry," he added, "is not competitive in the world market today.'

The stage was set for their comments by three Grange members who discussed operations and problems on their own farms.

Donald Trostel, of Biglerville, an Adams County fruit grower, criticized government controls, particularly rules and regulations pertaining to migrant workers, as a major factor in increasing production costs.

He focused attention especially on the widening gap in prices, declaring that "on the basis of what we get, big retail outlets are operating at markups of 50 to 120 per cent."

He said that he had recently checked apple prices and discovered that fruit he had sold for 30 cents for a three-pound bag was being retailed in Ohio stores at $1.29 to $1.39 a bag.

A Washington County beef producer, John M. Lindley of Prosperity, declared that "beef is a bargain on today's market, but the only one gaining is the consumer." He said that he is losing as much as $60 a head on steer calves produced on his farm, and that feeders who buy 400-pound calves and market them at 1,000 pounds are currently losing $20 or more a head.

A Montgomery dairy farmer, Charles E. Wismer, Jr., of Collegeville, is summing up the farm situation and problem, declared that "we must have a steady income and a steady market for our products."

He added that "while prices received for milk are not as secure or stable as they were several years ago, the cost of producting is constantly on the rise."

The panel moderator was William Buffington, of Chadds Ford, Chester County.

In the keynote address opening the school, John W. Scott, master of the National Grange, likened leadership to a race and pointed to all the training and preparation that is necessary for winning efforts.

"This week," he told Grange leaders, "you are preparing for your part in carrying the Grange forward in the year ahead." He urged them to focus attention on youth, and cautioned them not to fear or be discouraged by failures. "After all," he concluded, "Thomas Edison failed many times before he invented the light bulb."

Picnic pointers offered

YORK - York County home economist Joan Lamberson makes the following suggestions to make picnics more enoyable and safer.

Be meticulously clean in preparing the food. Use plenty of soap and water on hands as well as utensils. Do the same when washing the dishes at picnic grounds before using again.

Keep all perishables in the refrigerator until needed. Freeze foods such as sandwiches, meats, fish and poultry products, and let them thaw on the way to the picnic. Water frozen in half-gallon milk cartons will help keep the picnic basket cool and supply ice for refreshing drinks at the picnic.

Hot foods should be kept at least 140 degrees F. Large insulated jugs, preheated with hot water, will usually maintain temperature while transporting foods to picnic.

Take along as many non-perishable foods as possible - potato chips, fresh or canned fruits and unopened canned meat for fish.

Avoid using foods which are particularly susceptible to food poisoning such as - creamed dishes, cream sauces, gravies, custard and cream pies, eclairs and cream puffs.

Use acid ingredients to discourage growth of bacteria. Vinegar, lemon juice, tart salad dressings, pickles and relishes can help safeguard the very vulnerable sandwiches and potato salad.

Check on drinking water supply and if necessary, take drinking water along. Rember that clean running water is not always pure.

Do not let left-over food sit in hot sun after the meal is over.

Line picnic basket or box with newspapers for extra insulation. They also come in handy for covering picnic table.

Place heavy foods on bottom of basket or box, crushable foods such as potato chips and desserts on top.

Disposable plates, forks, drinking straws and spoons save time and energy.

Don't forget paper napkins and a roll of paper towels always come in handy.

Fill vacuum bottles or jugs just before leaving.

Chilled melons are a quick and easy dessert and also help keep the picnic basket cold.

Keep picnic seasonings in a particular place - individual salt and pepper shakers, catsup, mustard, sugar in a glass jar or shaker. Having them all together will save time when packing the basket - and you won't forget the essentials.

Chilled individual 6-ounce cans of juice are a convenient and popular beverage. A Vacuum bottle of cold milk always goes well with sandwiches.

Keep picnic food simple and easy to carry and prepare. Quality is more important than great variety of food.

New officers elected at Solanco

The Solanco FFA Chapter recently elected new officers. They are, bottom row, left to right: Brent Hess, president; Les Hershey, vice president; Dan Hershberger, vice president; and Sam Long, vice president. Top row, left to right: J DeLong, reporter; Ron Clark, sentinel; Tim Han parliamentarian; and Scott Frantz, chaplain.

Hubbard manual offered

WALPOLE, N.H. - A new 1977 edition of the popular Hubbard Breeder Pullet Management Guide was recently released by the Research and Development Division of Hubbard Farms, Walpole, N.H.

Several changes have been made from the editions of previous years, reports Dr. J. H. Smith, division head, particularly in feeding and weight control recommendations.

The new 1977 edition contains a completely revamped center fold chart to reflect new feeding recommendations and performance goals. This 16-page booklet, covers in detail such topics as lighting programs for optimum laying performance, body weight control, feeding recommendations, nutrient levels, housing and e ment requirements.

Copies of the 1977 Hub Breeder Pullet Manage Guide may be obtaine writing Hubbard Fa Walpole, NH 03608.

Interest boosted

WASHINGTON, D. C. - The U. S. Department of Agriculture has announced that the Commodity Credit Corporation (CCC) has increased interest rates for financing sales of U. S. agricultural commodities eligible under the CCC Export Credit Sales Program.

CCC increased six and 12 month financing by one per cent. The new interest rate is seven per cent if the loan is guaranteed by a U. S. bank, or eight per cent if guaranteed by a foreign bank. Twenty-four month financing was increased by ½ per cent to 7-½ per cent for U. S. bank, and by ½ per cent to 8-½ per cent for foreign bank guarantees. Three-year loan rates will remain at eight per cent for U. S. banks and nine per cent for foreign banks.

spberries

Continued from Page 1

ng just before the fruit d. Too much rain when rries are ripe causes to be mushy. On the hand, cool, clear, days such as the state ienced last week helps ke them top quality. olies are also smaller sual because growers hat acreage of raspgrown has decreased years.

To add the quick disappearance of this perishable crop, the demand is high.

Eckman, who has been growing raspberries for 17 years, says that customers have been "driving me crazy for raspberries" this year. Last Monday his workers picked 14 crates of the fruit from his 1-½ acres of stalks. Converted to quarts, that comes to 224.

Other Lancaster County growers confirm this fact. Herrs Fruit Farm, Lancaster R2, has had their crop picked clean every day "pick-your-own" has been open to the public.

The average price at market for the raspberries is $1.50 per quart with slight variations to both the higher and lower trends. Irrigated berries run as high as $1.55 a quart, while others went for 20 cents less than that.

String beans also went to market for the first time last week. They will be in season from now until the first frost of the season. The first crop of beans was reportedly of "fair" quality due to dry weather through the early part of the growing season. However, the rest of the crop is expected to be of better quality because of improved climatic conditions.

The prices at market last week averaged around $.50 per quart box, but were expected to level out at a lower mark near to last year's average when the beans come into full season.

Blueberries, another seasonal crop, are expected to last for five or six more weeks.

Geib earns

Continued from Page 1

received $100 from A. O. Smith Harvestore Products, Inc., and Keystone Steel and Wire, Division of Keystone Consolidated, Inc. He is now eligible for the North Atlantic Regional competition in the proficiency award program. Competition in the FFA proficiency award program follows a progression through state, regional, and national eliminations. At the national level, one FFA member is named as national winner of the

Earl Geib

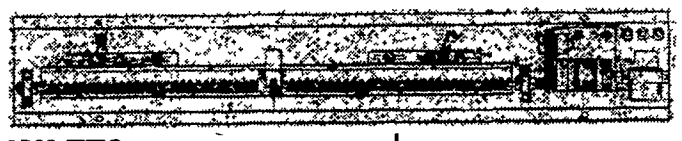
Diversified Livestock Production Award and receives a plaque and a check for $500.

Contributing to his success in the diversified livestock proficiency award program were Geib's agriculture and community activities. He is the president of the Manheim Agriculture Poultry Service as well as belonging to the Red Rose Beef and Sheep Club. Holding down two jobs, Geib works for both his father on the farm and at Plain and Fancy Egg Ranch, Elizabethtown, on a part time basis. He is a member of the Chiques Church of the Brethren.

CHORE-TIME®

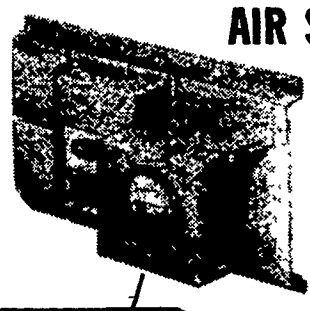
ENVIRONMENTAL CONTROL FOR POULTRY & LIVESTOCK BUILDINGS

INLET POWER PACK

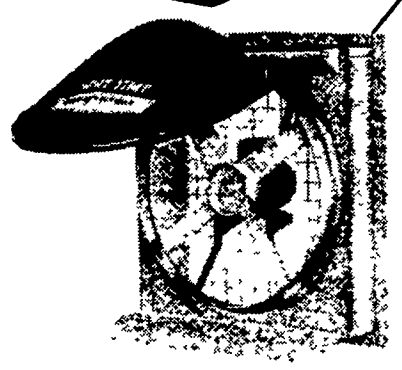


AIR INLETS

AIR SYSTEM CONTROL



Four basic components go into the makeup of this ventilation system...the fan, the inlet, the air inlet power pack, and the controls. Coordinated, these four basic components can provide you with better conversion and performance by removing stresses due to lack of oxygen, excess humidity, noxious gases and temperature extremes.



Reliability through simplicity, Chore-Time's advanced air system provides automatic control of incoming fresh air, moisture and heat for productive environmental control in agricultural buildings.

AUTOMATIC HOOD FAN

Whether you are updating an existing facility or building a new one, before you decide on an air system for your operation, call your local Chore-Time representative.

Ag promotion taking shape

LANCASTER, Pa. - Last Monday evening the Lancaster County Farmers Association met to formulate plans for this year's planned Park City shopping mall agricultural promotion. During the evening, committees were appointed and several activities were planned.

Heading up the crops and soils committee is Donald Hershey, Manheim; fruits and vegetables Daniel Rohrer, Manheim; beekeepers, James Metzler; sheep, Clyde Brubaker, Lancaster; beef, William Dean, Jr., Strasburg; swine, John Henkel, Strasburg; dairy, Jesse Balmer, Lititz; poultry, Wilmer Esbenshade, Manheim; machinery, Charles Rohrer, Paradise; home economics and crafts, Miriam Kauffman, Elizabethtown; safety, Helen Wivell, Marietta, and Jack and Shirley Garner, Mt. Joy.

This year's promotion chairman will again be Mrs. Roy Shertzer, Lancaster.

The next meeting of the committees will be held August 29 at 7:30 p.m. at the Farm and Home Center, Arcadia Road, Lancaster.

Health tests offered

LANCASTER - The monthly testing program, sponsored by the Lancaster County Lung Association, will be conducted at the Association office, 630 Janet Avenue, Lancaster, on July 5.

Tuberculin testing will be done from 10 a.m. to noon and 1 to 5 p.m. Cost is $1.00. Persons having this test will return for a report on Thursday, July 7.

Diabetes screening, conducted by the Lancaster County Diabetes Association, will be done from 10 to noon and 1 to 4 p.m. Cost is $1.00. A normal meal should be eaten two hours before having the test.

The American Heart Association will be checking blood pressure from 10 a.m. to noon and 1 to 5 p.m.

Free educational materials are available about all lung diseases as well as smoking in the Lancaster County Lung Association office.

Know Where the Activities Will Be?
Read the Farm Women Calendar.

Peach program planned

MOORESTOWN, N. J. - A Northeastern Peach Marketing Conference will be held at the Mallard Inn here the evening of Monday, July 11.

Information about peach crop prospects for the Northeastern United States will be the main points of discussion, but there will also be reports about the peach situation in other parts of the nation, and information concerning competing fruits.

Designed to provide information to producers, handlers and buyers, the conference is sponsored jointly by the Cooperative Extension Service at Rutgers University, the New Jersey Peach Promotion Council and the National Peach Council.

The meeting will open with a social hour at 6 p.m. following by a Dutch Treat dinner at 7 p.m. Presentation of reports will begin about 7:30 p.m. Those who plan to eat with the group are requested to call Ray Battle, (609) 881-1200 for a reservation to help planning for the dinner. Battle is Gloucester County Agricultural Agent.

New Jersey Secretary of Agriculture Phillip Alampi will greet the group and speak briefly at the opening of the business session.

Others who are expected to take part on the program are Ernest G. Christ of Rutgers, Raymond F. Reiter of the Pennsylvania Department of Agriculture Marketing Service, Anthony J. Rubion of Blue Goose, Malvin McGaha of the Agriculture Marketing Service, USDA, and a representative of National Peach Council.

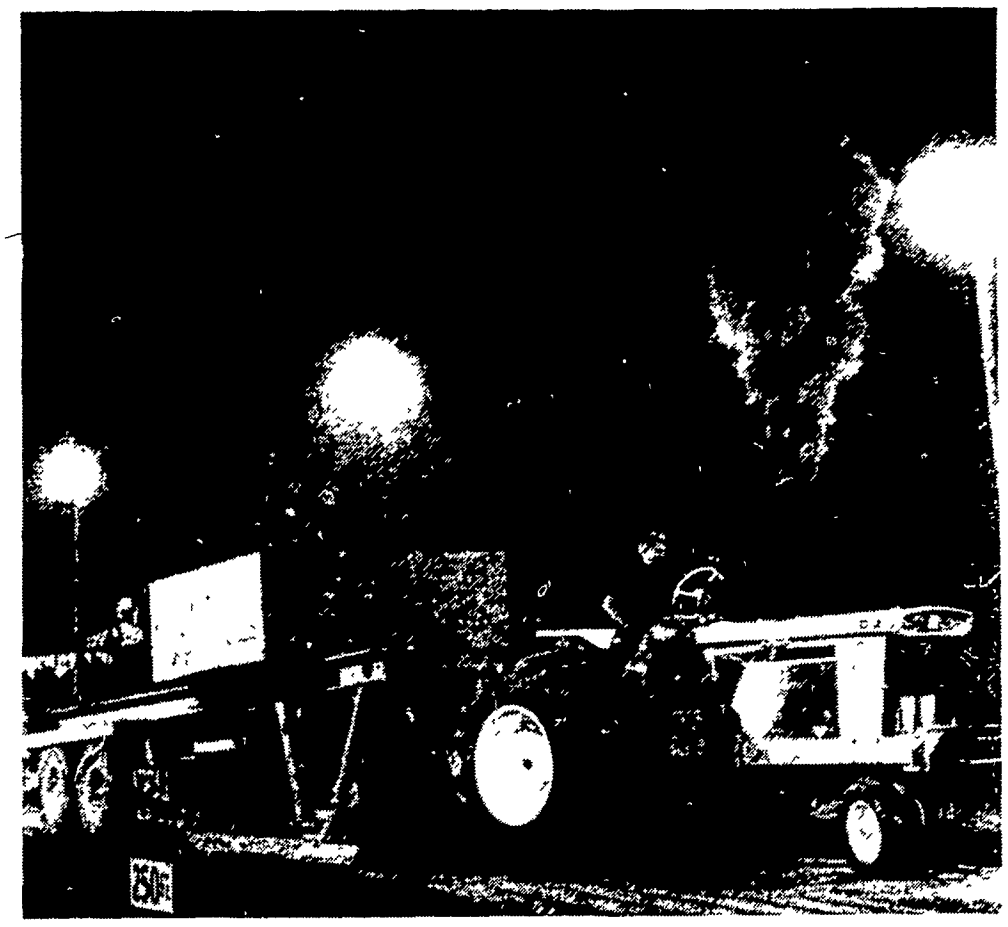
1. Larry Fuhrman, Decatur, Ill., 225-5; 2. David Becker, Mount Joy, Pa., 217-8; 3. Lloyd McVey, Oakwood, Ill., 215-4.



One of the super stock tractors strains past the 250-foot marker at the Buck. A full pull is 300 feet.

Employee commended

ELIZABETHTOWN, Pa. - Ethel Brandt, Mastersonville, has been named employee of the month for June at Plain and Fancy Egg Ranch, Inc., according to Paul Hess Jr., vice-president of the Elizabethtown firm.

Miss Brandt has worked for Plain and Fancy for 10 years. She received a $25 savings bond as recognition of her outstanding work in the processing department, where she hand packs eggs and stamps cartons. Hess said Miss Brandt can also function proficiently in several other positions in the processing department.

SALES REPRESENTATIVES NEEDED

Poultry

[Continued from Page 1]

the Year went to Glenn Kime, independent producer, from Gardners R1.

"Industryman of the Year" awards are presented to outstanding individuals from each of the three segments of the poultry industry -- the turkey, broiler, and egg divisions.

A. Eugene Bailey heads Grimes Poultry Processing Co., Fredericksburg, Pa. A member of PPF for 13 years, Bailey was cited as being a pioneer in the formulation of poultry regulations with the United States Department of Agriculture, as a promoter of automation, and as a member of national and international organizations.

He is the president of the Pennsylvania Poultry Processors Association, and is on the board of directors of the Poultry and Egg Institute. In the Pennsylvania Poultry Federation he serves on the board of directors as well as the executive committee.

Bailey also served as president of the Delmarva Poultry Industry in 1963 and has worked on international trade development committees.

He and his wife reside at 954 E. Maple St., Palmyra.

Robert Shelly

Robert Shelly, recipient of the honor in the egg division, is involved in the marketing facet of the egg industry. Producers Pride, Inc., of which he is president, is a farmers' cooperative. This coop markets anywhere from 300,000 to 350,000 dozen eggs per week, most of which are produced in Lancaster, Lebanon, and Berks Counties.

Cited on Thursday evening as "a man who climbed the ranks of the cooperative to the presidency," Shelly heads up several other organizations, as well. At present, he is the director of both the North American Poultry Coop in New York City and the Pennsylvania Association of Farmer Cooperatives.

He also serves on the public affairs committee of the North Eastern Poultry Producers Council and is on the agriculture advisory committee at Penn State University.

Past offices Shelly has held include president of the Egg Marketing Association and president of the Pennsylvania Poultry Federation. While he no longer holds office with PPF, he remains on the executive committee and board of directors. He has been a member of that organization for eight years.

Along with his egg related activities, Shelly is a member of the Lansdale Kiwanis, as well as treasurer and member of the deacon commission of the Ambler Church of the Brethren.

He and his wife Betty live on Winding Drive in North Wales, Pa.

Glenn Kime

Glenn Kime, Gardners R1, who took the top honors in the turkey division, is a turkey and capon farmer who processes his meat independently.

Kime has been raising and dressing turkeys for approximately 25 years, and in 1970, built his own processing plant. The facility has the capacity to handle up to 800 turkeys a day or 1000 capons in that same amount of time. It is run mainly during the months of November and December. Last year Kim processed over 16,000 birds, all told.

A dedicated poultryman, Kime has been a member of the Pennsylvania Poultry Federation since 1937, never once missing a yearly meeting. At present, he is the first vice president of the organization and will take over the reins as president next year. He is also a past president of the turkey division of the Federation.

In his home county, he is president of the Adams County Poultry Association and is a member of NEPPCO..

His interests and activities are not limited to poultry farming, however. He serves as township supervisor, is on the local fair association, and is a member of the board of the Adams County Farm and Home Association. He is also a 32nd degree Mason.

As a gift of appreciation to each of the three chosen individuals, the Poultry Federation awarded each man an inscribed plaque.

The bestowing of three awards was indicative of changes in the structure of this year's poultry conference. From 1958 to 1976 the procedure had been to recognize only two individuals in the industry – a poultryman and an allied industryman. But, clarification and redefining of structure in the poultry conference, as a whole, led to the changes in this year's award presentations. Therefore, each man honored on Thursday evening has the distinction of being a "first" in each segment of the industry.

John Hoffman, executive director of the Pennsylvania Poultry Federation, was extremely pleased with the turnout for this year's conference. A total of 220 producers and allied industrymen attended the day's sessions. This total far exceeded last year's attendance.

Hoffman attributed the growth of the conference to changes in structure, an increased budget, and wide ranging speakers. This year the conference was divided into four smaller conferences for turkey, egg, and broiler divisions of the organization. A hatchery seminar was also held during the morning.

Speakers this year came from all over the United States, representing key organizations and institutions to the poultry industry. During the annual board of directors meeting, this year's president was elected. Melvin Mitchell, of Victor F. Weaver, Inc., New Holland, will take the reins of the organization for 1977-78.

$7800 in scholarships available through 4-H

HICAGO, Ill. - icultural college llments increased 75 per in the six-year period 1969 to 1975.
ny ag school deans bute the enrollment to young people's erns about world food uction, a growing in- in ecology, and the k-to-nature movement began in the last 1960s.
esent or former 4-H bers who plan to major in agriculture or related fields may be eligible for college scholarships offered by private-sector donors this year through National 4-H Council.

4-H scholarships range in value from $600 to $1000. They are awarded on the basis of interest in attending college, 4-H background, grades, leadership ability and financial need.

DeKalb AgResearch, Inc. offers four $800 scholarships to young men and women who plan to enroll for their junior year of college in the Fall of 1977, and who expect to major in some phase of agribusiness. Recipients also will spend two days studying operations at the company's research headquarters in DeKalb, Ill.

Alpha Gamma Rho Educational Foundation provides one $600 scholarship to a 4-H member planning to enroll as an agricultural college freshman in the Fall of 1977.

Two scholarships of $1000 each are donated by Allied Mills, Inc. These go to current or former 4-H members who will be juniors majoring in animal science at a college or university this fall.

Champion Valley Farms, Inc., Recipe Division, provides two Lassie 4-H Veterinary Medicine scholarships of $1000 each to former 4-H members currently enrolled in a college of veterinary medicine.

4-H scholarships are a means of recognizing outstanding 4-H work and furthering the college education of present or former 4-H'ers. Recipients are chosen by the Cooperative Extension Service.

Full information on scholarships and special application forms are available from the state 4-H office.

Cumberland Valley pull results posted

NEWVILLE, Pa. - The Cumberland Valley Tractor Pullers' Association held their second farm tractor pull of the 1977 season on June 18 at the Newville Community Fairgrounds. There were 88 entries in 10 clases. The results were as follows:

5000 Stock

1. Clarence Forrester, Ford Major, F. P. - 78 feet 6½ inches; 2. Harry Barrick, Oliver 88, F. P. - 65 feet 2 ¼ inches; 3. Danny Forrester, Ford 6000, 157 feet 9 inches; 4. Donald Lehman, MM4-Star, 132 feet 11 inches.

7000 Stock

1. Rodney McKendrick, Ford Major, 133 feet ½ inch; 2. Francis Speck, I. H. 674, 131 feet 5½ inches - Pulloff 77 feet 6½ inches; 3. Les Motter, I. H. 574, 131 feet 5½ inches - Pulloff 74 feet 8½ inches; 4. Bruce Lemmon, MM602, 130 feet 10¼ inches.

5000 Open

1. Stan Graver, Case - 427 Chev., F. P. - 172 feet 1¾ inches; 2. Kirby Skinner, F20 - 396 Chev., F. P. - 153 feet 1½ inches; 3. Gerald Forrester, F20 - 406 Ford, 242 feet 4¼ inches; 4. Nelson Egolf, Oliver 239 feet 1½ inches.

7000 Turbo

1. Clarence Forrester, Ford 7600, 158 feet 3¼ inches; 2. Charlie Forrester, Ford 7700, 128 feet 3½ inches.

9000 Stock

1. Ronald Showaker, I. H. 756, 130 feet ¼ inch; 2. Joe Piper, M. F. 285, 129 feet 9½ inches; 3. Boyd Weary, A. C. 185, 118 feet 3¼ inches; 4. Paul Hoch, J. D. 4020, 157 feet 6¼ inches.

7000 Open

1. Stan Graver, Case - 427 Chev., F. P.; 2. Jay Forrester, F20 - 406 Ford., 238 feet 1 inch; 3. Nelson Egolf, Oliver, 185 feet 7¼ inches; 4. Ted Small, Oliver - 406 Ford, 176 feet ¼ inch.

12000 Turbo

1. William Weaver, I. H. 1066, F. P. - 126 feet 10¾ inches, 2. Joe Eckenrode, I. H. 1566, F.P. - 144 Feet 4½ inches; 3. Harry Barrick, Oliver 1855, F. P. - 112 feet 1½ inches; 4. Boyd Weary, A. C. 200, F. P. - 67 feet 10½ inches.

12000 Stock

1. Fred Chestnut, Case 970, 113 feet 5½ inches; 2. Mike Miller, Oliver 1750, 95 feet 5 inches; 3. Greg Gress, Case 970, 92 feet 10 inches; 4. Paul Hoch, Case 1070, 92 feet 4½ inches.

15000 Turbo

1. Jake Hykes, I H. 1066, 183 feet 7½ inches, 2. Ronald Showaker, I. H. 1066, 134 feet 11½ inches; 3. Dale Hair, I. H. 1466, 131 feet 1¾ inches; 4. Tom Eckenrode I. H. 1566, 130 feet 3 inches

The next scheduled pull for garden tractors is on July 9 at 6:30 p.m. and a farm tractor pull is set for July 16 at 6:30 p.m. All pulls are held at the Newville Community Fairgrounds

Junior Cooking Edition

There's no doubt about it, when school is out and Summer is in, the time to perfect baking and cooking skills arrives as well. This week we have two cakes, two pies, and two fruit salads for all the budding cooks out there to practice on. Why not try them all and have some fun.

CHOCOLATE PUDDING CAKE

1 cup shortening
2 cups sugar
2 eggs
1 teaspoon vanilla
1 cup buttermilk or sour milk
3 cups flour
2 teaspoons salt
two-third cup cocoa
1 cup hot water
1-½ cups sugar
2 tablespoons cocoa
2 cups hot water

Mix together shortening, two cups sugar, eggs, vanilla, buttermilk or sour milk, flour, salt and two-third cup cocoa. Then add one cup hot water and pour batter into 13 by 9 inch pan. Next, mix together 1-½ cups sugar, 2 tablespoons cocoa, and two cups hot water. Pour over cake batter and bake in a 350 degree F. oven for 50 to 60 minutes.

Mary Ann Martin
Selinsgrove, Pa.

BUSY DAY CHOCOLATE CAKE

¾ cup cocoa
2 cups sugar
2 cups flour
2 teaspoons baking soda
1 teaspoon baking powder
1 egg
1 cup milk
1 cup boiling water
½ cup butter, melted

Combine all ingredients and mix well. Place in a 9 by 13 inch pan and bake for 30 to 35 minutes at 350 degrees F.

Shirley Wenger
Manheim, Pa.
Age 8

FRENCH RHUBARB PIE

Filling:
1 egg
1 cup granulated sugar
1 tablespoon flour
1 teaspoon vanilla
3 cups diced rhubarb
Crumbs:
¾ cup flour
one-third cup margarine
½ cup brown sugar

Mix together egg, granulated sugar, flour, and vanilla. Then add diced rhubarb. Place in a nine-inch pie shell. Next, combine ¾ cup flour, one-third cup margarine, and ½ cup brown sugar for crumbs. Place on top of filling and bake at 400 degrees F. for 10 minutes. Reduce heat to 350 degrees F. for 40 minutes.

Alma Burkholder
Kutztown, Pa.
Age 13

RICE KRISPIE PIE

1-3 cup corn syrup
1-3 cup peanut butter
2 cups rice krispies

Mix ingredients together and press into pie plate. Fill with approximately one quart of ice cream, and then pour one can of cherry pie filling over top.

Thelma Martin
Pine Grove, Pa.
Age 10

PEACH BANANA WHIP

1 envelope plain gelatin
¾ cup cold water
½ cup syrup from canned peaches
Few grains salt
¼ cup fresh lemon juice
6 tablespoons sugar
1 banana
1 cup canned peach slices
½ cup whipping cream

Soften gelatin in ¼ cup cold water. Heat peach syrup, add softened gelatin and stir until gelatin is dissolved. Blend in remaining water, salt, lemon juice, and sugar, Cool until slightly thickened. Mash banana and fold into gelatin mixture. Fold in peaches and stiffly beaten cream. Pour into mold and chill until firm. Makes six to eight servings.

Doris Sauder
East Earl, Pa.

LEAH FISHER'S MARSHMALLOW SALAD

2 cups miniature marshmallows
2 pounds grapes
2 cups pinapple tidbits - drained
½ cup nuts
1 cup whipping cream, whipped
½ cup pineapple juice
1 egg, beaten
4 tablespoons sugar
1 tablespoon flour

Combine first five ingredients in salad bowl. Then boil together the pineapple juice, beaten egg, sugar, and flour. Cool and pour over marshmallow mixture.

Lydia Smucker
New Holland, Pa.
Age 13

Lehigh 4-H'ers garner awards

UNIVERSITY PARK, Pa. - Lehigh County garnered four awards at the 4-H Field Day held on June 18 at Penn State University.

Senior winners in judging and showing beef within the state were: Ardith Wetzel, New Tripoli, third; Grant Grim, Breinigsville R1, fourth; and Brian Ruch, Jr., Breinigsville R2, fourth.

Other 4-H members who participated were: Sarah Fretz, Joe and Jane Sikorski, Willia Wilson, Ruth Grim, Theresa Fink, Gail Snyder, and Diane Krause.

Carter taps lady for USDA post

WASHINGTON, D.C. - Henrietta Duncan McArthur, 32, former assistant vice president of Cititzens and Southern (C&S) National Bank in Atlanta, Ga., recently was named deputy assistant secretary of agriculture for rural development.

She is deputy to Assistant Secretary Alex P. Mercure, who directs the operations of the Farmers Home Administration, Rural Development Service, Rural Electrification Administration, and Rural Telephone Bank. The Farmers Home Administration is the largest federal credit agency serving rural people with $7.5 billion a year in funds for farming, business-industrial development, housing and community facilities. The Rural Electrification Administration and Rural Telephone Bank provide about $4.8 billion a year for electric and telephone service in rural areas. Rural Development Service coordinates the rural development programs.

Born in Vidalia, Ga., Jan. 17, 1945, Ms. McArthur is a 1967 graduate of the University of Georgia.

In 1967, she joined the C&S National Bank as an assistant training officer. In her ten-year tenure at C&S, she moved up as a marketing officer, corporate financial analyst, and in 1975 was named an assistant vice president of the bank.

Most recently, Ms. McArthur worked on the Carter-Mondale transition team, helping to establish a talent bank for the presidential personnel office.

Ms. McArthur was recognized in Who's Who in Young Women in America in 1976, as one of 10 Leading Ladies of Atlanta in 1976, and as one of 10 Outstanding Young People of Atlanta in 1972.

She has been a working member of the University of Georgia Alumni Society, serving on the board of trustees of the University's Foundation as an ex of member, as a chairman committee member various University Georgia Alumni Sem committees, and has active in Atlanta civic cultural groups.

Sire summaries out

NIVERSITY PARK - The g 1977 USDA Sire maries have been sed, announces Larry Specht, Extension rman, The Pennsylvania State University. Each dairyman or A. I. unit who owns one or more bulls should have received the summary data within the last few weeks.

A survey of the latest information shows that there are now 136 Holstein sires owned by AI units with a predicted difference for milk value of plus 1000 pounds or more. This is almost a 25 per cent increase over the number available last Winter. About one-half of the sires have repeatability values of 70 per cent or more. This is the mark of a reliable sire proof, says Specht. Such a figure lends considerable confidence to a sire's predicted difference value. It indicates that the summary was made by 40 to 60 daughters scattered in a number of herds and that the PD milk value is likely to remain at, or near, the level presently reported for the sire.

It is worth noting that 13 of the 14 plus 1000 pounds PD sires owned by Pennsylvania A. I. units have repeatability values of 70 per cent or higher. High repeatability values are largely a consequence of well-run progeny test programs. Pennsylvania studs are doing a good job of testing young sires, concludes Specht.

Cold-flow ammonia technique saves time and energy in field work

UNIVERSITY PARK - Farmers using anhydrous ammonia as nitrogen fertilizer have a new process for applying ammonia into the soil. Known as cold-flow ammonia, the process was developed and patented by agricultural engineers at Penn State University.

The process converts high-pressure anhydrous ammonia into a stable cold liquid and vapor. High-pressure ammonia is metered through a conventional flow regulator into a conversion chamber. Here rapid expansion produces cooling and releases pent-up energy.

Output from the converter, about 85 per cent liquid and 15 per cent vapor, flows into the soil through tubes connected behind shanks or blades of chisel plows, field cultivators, or disks. Pressure in the distribution system is minimal - near atmospheric pressure. The liquid ammonia is exceptionally free-flowing and moves by gravity into channels cut into the soil by tillage tools.

Paul M. Anderson and William L. Kjelgaard, Penn State agricultural engineers who developed the process, said the system works very well with chisel plows and field cultivators. Research is continuing to apply the technique to disk tools.

The big saving is in time and energy, they reported. Cold-flow ammonia can be applied at a depth of four to five inches during chisel plowing or cultivating, eliminating one field operation. The demand for power is less, as well as the wear on machinery, because of easier soil trapping of cold-flow ammonia.

Agricultural engineers Paul Anderson, left, and William Kjelgaard, right, with the new cold flow ammonia application system as installed on a heavy disk for testing at the Rock Springs Research Center of Penn State's Agricultural Experiment Station.

High-pressure anhydrous ammonia, on the other hand, must be placed six to eight inches into the soil using special applicators.

Research and development of the cold-flow ammonia process was made possible through partial funding from the USS Agri-Chemicals division of U. S. Steel, which has licensed the process.

Ammonia for cold-flow application systems, the Penn State engineers point out, must be handled with the same safety precautions needed for conventional application systems.

New vehicle code

[Continued from Page 1]

temporary. "There were too many amendments to be taken care of before the July 1 deadline," Lammb told Lancaster Farming. "This will hopefully give us some time to work up practical regulations," he added.

Farmers may continue to operate their farm implements as they have been, said Lammb, explaining that implements up to 14½ feet in width can still be taken on the road without a permit. Self-propelled combines require a permit, however, if they're travelling on the road. Limits for the operation of a farm truck remain unchanged.

Changes in the motor vehicle code which apply to farmers will be acted upon at unannounced future dates.

By DIETER KRIEG

Except for the anger displayed by the bolts of lightning and accompanying thunder, the look of the sky mirrored my mood — gloom.

The makings of a disaster were in front of me and there was nothing I could do about it. Mother Nature was angry, or if that wasn't the case, she was being overly generous with the amount of water she was handing out.

Sheets of water, driven by strong winds, were beating young plants of corn to the ground and tearing many of them out. A river of muddy water swirled its way around the house, carrying with it some of the gravel of the driveway. I watched the scene helplessly, hoping only that the damage would not be too great.

Picking up a pair of binoculars, I observed a portion of the field which was most vulnerable to erosion. Rampaging water was cutting through the topsoil and depositing debris along a fence at the bottom of the field. A good sized lake was also forming there.

Down in the pasture, the water carried tin cans, bottles, and other refuse along its path. They had been dropped off by careless motorists and now posed a closer threat to livestock and tractor tires.

The fence near the stream at the other end of the farm was being pressured by the excess water and floating debris. With a little bit of luck it would hold, but quite often it broke, thus creating that much more work for us.

Although the rain was welcome and needed, coming down as fast and violently as it did, it had created a lot more harm than good. Valuable topsoil was lost, fences were broken, plants were washed out or covered over with mud, gullies were formed, and hazardous objects such as bottles were strewn across the pasture.

The sight was frustrating and an unfortunate chapter of life on the farm.

Hanks wins speaking cont

David Hanks

GETTYSBURG - David Hanks, from Drumore, Lancaster County, won the Grange Leadership School's speaking contest on Wednesday evening in the 19 to 35 year olds age group.

Hanks, along with the other contestants, spoke on how the Grange could improve in individual communities and on a national scale. Speeches were limited to between four and six minutes in length.

Runner-up in the senior division contest was Sherrie Higinbotham from Smock, Fayette County. Taking third place was Anna May Snyder of 126 South 17th Street, Camp Hill. Her younger brother, James, placed second in the junior division contest, which is limited to 14 to 18 year olds.

Taking home the honors for the younger set was July Paull From Lemon nace. In third pla Mary Styer from R2.

The contestants p their speeches foll Wednesday evening which had the First the National Gr Dorothy Scott - a speaker. She is the National Grange John Scott. Her th "Quality Plus" a Grangers can and strive for it.

Triplets born on Berks County farm

Robert E. Kopfer, Fleetwood R2, surely knew how to celebrate Dairy Week this year. On Tuesday June 14th, he helped his cow, Rest-Easy Petri Girl, deliver triplet calves. The calves, two heifers and a bull, are all very healthy and weighted 25 to 30 pounds each at birth. The sire was Dale Pride Happy Luzerne, owned by Dale Hostetter of Annville. Kopfer also had twins born in February, the second cow he had fresh. "I just started shipping milk February 8 of this year," he told Lancaster Farming. Presently his milking herd numbers 23. Kopfer also feeds 150 steers and farms 425 acres.

Silviculture simi

[Continued from Page 21]

will accumulate on crop trees), sanitation cuttings (of diseased or insect infested stems), and prunings (lower limbs only).

Two types of thinning and weeding practices are generally recognized: (1) commercial - where cut stems are sold to recover some costs; and (2) pre-commercial - where there is no market for trees removed. An understanding of "silvics" determines which stems to leave in the stand.

For instance, a black cherry growing beneath a larger cherry probably should be cut and sold for a small sawlog. Its chances of maturing decrease the longer it is in competition with overtopping trees.

Another example is trying to favor development of paper birch in a stand with a large component of sugar maple. Unless adequate light reaches the paper birch, it quickly dies from suppression by the sugar maple.

As with forest stand classifications, cutting methods can be grouped as either even-age or uneven-age. These terms refer to the four general types of forest that will develop after cutting. Even-age harvest systems are clearcutting, seed-tree cutting, and shewterwood cutting. The one uneven-age system is selection cutting.

Many second growth forests found in Pennsylvania today can be classed as even-age stands. They developed after the turning of the century. Much of the state was clearcut then because of heavy demand for lumber, bark, and wood chemicals. Many harvested stands contained large hemlock trees. After hemlocks were cut, intolerant trees were quick to establish themselves. Valuable even-aged stands of northern hardwoods and oaks resulted from these early "ravages" of Pennsylvania woodlands.

Today, clearcutting and the other two even-age harvesting systems are used to produce stands of intolerant species. Clearcutting removes all stems 2 inches or larger so intolerants can establish themselves in cutover areas.

Before clearcutting, a forester considers factors such as sources of natural seed, advanced regeneration, and the impact of wildlife populations on regeneration.

If a seed source is sparse, either a shelterwood or seed-tree harvesting system might be considered. The seed-tree system removes all but a few high quality seed-producing trees. Seed trees are removed when adequate seed is available. Unless seed trees have windfirm roots, trees are likely to blow down before enough seed is produced.

A shelterwood system is used to establish stands of trees that may not aggressively compete with faster growing species. Two cuts are usually made. One cut opens the stand to prepare seedbeds and to stimulate seed production in the residual trees. Once the desired species is established, the second cut removes the overstory.

Many people prefer to harvest their woodlands by the selection system. Only individual or small groups of mature stems are removed. New seedlings spring up in openings created by the harvest. Repeated selection cutting produces an uneven-aged stand. Insect and disease-damaged trees, as well as some smaller trees, are cut for the same reasons as for intermediate cuttings.

The selection system is suitable for tolerant species because they will grow in shade. Weeding and thinning are also done during the harvest operation. If this were not done, a stand would quickly lose its potential to supply a continuous flow of good timber.

To know that trees require moisture, sunlight, space, and nutrients is not enough for efficient and successful timber production or wildlife management. Each species has individual requirements which must be satisfied to realize its full potential in terms of growth and vigor. Just because a tree happens to be growing on a certain site does not mean that the site is best suited for that tree. Other species may be better suited for the site.

Silviculture determines requirements of tree species and should be used to match tree species with the best possible growing conditions. Timber production or wildlife management which does not use silvicultural knowledge likely will be slow and wasteful at best and may fail entirely.

Grapefruit

The juiciest grapefruit are firm, shiny, well-shaped and heavy for their size. Avoid a grapefruit that is pointed at the stem end or has rough or wrinkled skin.

Safflower Oil

Safflower oil is pressed from the seeds of a plant that is grown on the West Coast and some Pacific Islands. Refined safflower oil is bland in flavor and almost colorless. It may be used as a salad or cooking oil. Production is limited and thus it is more expensive than other vegetable oils.

Info Helps

A wealth of information about nutritional qualities of foods is now found on can and package labels for food products. Used properly, this data will help you evaluate and improve your diet.

Aches and Pains

Approximately 50 million Americans suffer from some form of arthritis.

WHAT'S NEW

POWER RING DRIVE FOR SILO UNLOADERS

An independent power ring drive for new or existing Volumatic II silage distributor-unloaders is announced by the Jamesway Division of Butler Manufacturing Company, Fort Atkinson, Wis.

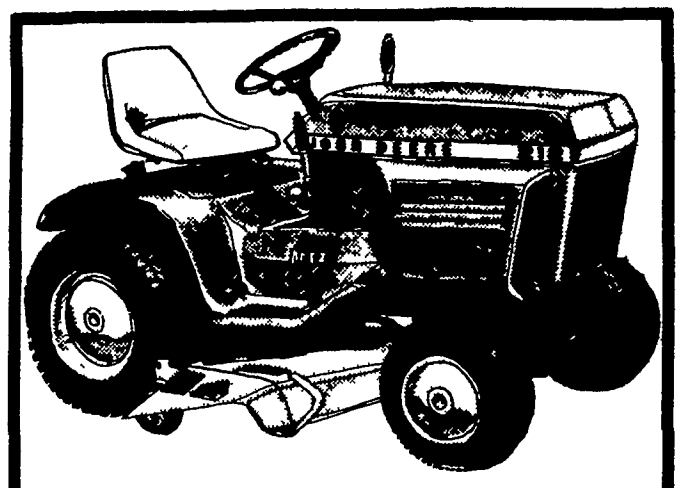
The optional drive unit for rotating the machine in the silo conserves energy and reduces silage distribution power costs during filling.

A one-half horsepower motor coupled directly to a 500-to-one gear reducer running in oil turns the drive sprocket. Teeth on the sprocket mesh with holes in the stationary drive ring to turn the machine for distributing silage or for unloading silage.

The cast iron gear casing holds seven pints of oil. A drive sprocket slip clutch in the hub center is easily adjusted.

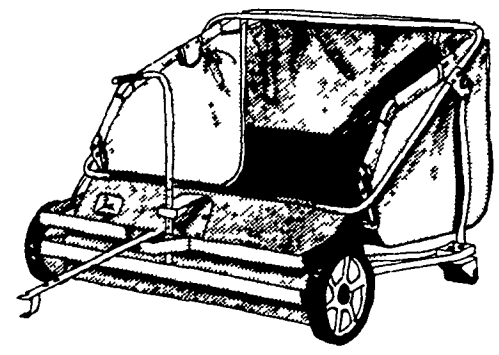
Use of the new optional drive unit releases the full power of the auger drive motor for feeding out silage fast in volume.

The unloading auger is shut off during silo filling and reactivated for



10- to 14-hp Tractors

John Deere 200 Series Tractors offer three power sizes: 10, 12, and 14 hp All provide built-in headlights, 3.5 U.S. gallon gas tank, and variable-speed drive that lets you change ground speeds without clutching. Optional attachments include 38- and 46-inch mowers, front blade, snow thrower, and rotary tiller.



Lawn Sweepers

John Deere Lawn Sweepers clean up leaves and grass clippings fast Tow one behind your lawn tractor or riding mower to save hours of raking Choose from sweeping widtns of 31 or 38 inches capacities of 14 or 19 bushels Heavy-duty hampers give non-stick cleanout and long wear

Ladies Day Ou set for July 18

Betty Groff

LANCASTER, Pa. - The Pennsylvania Farmers Association Region I Ladies Day Out will be held on July 18 at the Treadway Resort Inn, Lancaster.

Featured speaker will be Mrs. Henry Hager, whose husband represents the 23rd Senatorial district and is Senate Minority Leader. She will talk about "Why I Let My Husband Go Into Politics."

Betty Groff, Mount Joy, noted Pennsylvania Dutch food expert and author, will demonstrate making egg cheese. Lancaster County Agricultural Agent M. Max Smith will discuss the television program, "Today's agriculture."

Also in attendance will be Joanne Zink, Donegal Mills Plantation, and Elaine Benner, state women's committee chairman. The regional talent contest will be held and door prizes awarded.

Registration, featuring PACMA snacks, will begin at 9:30 a.m., and the program will be at 10 a.m.

Tickets cost $6 and can be purchased up to one week before the program from: Linda Kreider, Quarryville R1, 284-2242; Helen Wivell, Columbia R 1, 426-1303; Marian Brenneman, Mount Joy R 1, 653-4213; and Joan Rohrer, Nottingham R1, 215-932-8920.

ood problem is three-pronged

SITY PARK - The d problem has at three major - chronic hunger million people, famine in low roups throughout and the dilemma tion outstripping ction. That's the by Dr. Wayne A. r, economist g in international l development at nsylvania State y.

tput in both the and less nations is at about 2.7 per ally, Dr. Schutjer ently. However, in the "have not" is expanding at per cent annually - practically no food supplies.

he explained, the of the developing was about 1600 by 1970 it was n. As a result, a 2.5 per cent yearly increase in population of the developing nations - not matched by an equal increase in food production - could result in nearly 20 million more deaths from starvation than would have occurred under similar circumstances in 1950, he affirmed.

"To avoid such famine, food production in the developing nations must increase at 3.5 per cent annually instead of the current 2.7 per cent," Dr. Schutjer declared.

In contrast, population among the developed nations is increasing at only one per cent annually. This allows a reasonable increase in food supplies, he pointed out.

Dr. Schutjer indicated programs and policies are available for the U.S. and other nations to assist the developing countries to meet their food needs. Ultimately, however, the solutions must be found in the food-deficit nations themselves, he stated.

For such nations to produce adequate food, birth control must be used widely and other social and economic changes must be introduced into agriculture. Such changes would redistribute income downward so that poor people would have income to buy food. And farmers, he added, must have access to land and captial needed to increase food production - both lacking in many developing nations.

"The transformation will be difficult, expensive, time-consuming, and not without political turmoil and occasional violence," he declared. "To redistribute assets and create institutions to benefit the poor and those who are currently not well served goes against the existing patterns of wealth and power."

For 13 years, Dr. Schutjer has been responsible for studies of international agricultural development in the College of Agriculture. During an 18 month leave-of-absence from Penn State, he served as the Southeast Asia program advisor for the Ford Foundation. Earlier he directed the Research and Training Network of the Agricultural Development Council. Prior to this he was an international economist in the Policy Planning Division of the Agency for International Development (AID).

A major role exists for U. S. assistance in providing food aid in developing agricultural technology, he said. Food aid would be directed at the malnutrition and famine phases of world food problems. Technology suited to conditions in poor countries would ease the food production problem. However, he concluded, it is not likely that the "have not" nations will welcome foreign assistance in changing the distribution of wealth and power.

Tax views aired

HARRISBURG - Proposed state spending for the next year - requiring from $470 million to $600 million in new taxes - "is a frightening, alarming prospect," according to the Pennsylvania Chamber of Commerce.

In a letter sent to all members of legislature, Robert Hibbard, president of the statewide business organization, cautioned the lawmakers that "there is a politically popular attitude that business must always participate in any new tax increase program."

The Chamber spokesman critized the school subsidiy bill now being debated by the legislature. Calling the legislation "fiscally irresponsible," Hibbard said it had a built-in escalator "mandating that the Pennsylvania General Assembly increase public school subsidies by more than $100 million each year for the next three years."

Hibbard said that if the General Assembly finds that additional state taxes are needed, the Chamber recommends that serious consideration be given to increasing the sales tax rate. "Pennsylvania's sales tax is equitable," he said. "It's paid by both business and individuals."

He also suggested that consideration be given to financing some additional school costs at the local level by authorizing an increase in the earned income tax rate for local school district use only.

Top seamstress named

HARRISBURG - A blue denim gaucho pants outfit made by 15-year-old Carol Weyand of Rockwood R3, Somerset County, won one of five first place winners in the final competition of the annual National Grange sewing contest.

Carol's outfit was one of 185 garments from all parts of the nation that were judged in the national finals in New York City. First place state winners in each of the five classes of competition were entered in the finals.

Last month Carol's entry took first place in Class B (for 10 to 17 year old competitors) of the Pennsylvania State Grange competition, then was awarded the best-of-show honors.

Winner of the national best-of-show honor will be announced at the annual convention of the National Grange to be held at Greensboro, N. C. Nov. 14-22.

Two years ago, Mary Louise Schuler of Fleetwood R3, Berks County, who was then 17 years old, won first place honors in state and national Grange competition in the 10 to 17 year age group.

Sales were negative

WASHINGTON, D. C. - Sales of grain sorghum, corn and cotton, the first reduction in total soybean sales this marketing year, and exports of barley, soybeans and cotton led commodity activity for the week ending May 29, as reported recently in the U. S. Department of Agriculture weekly U. S. Export Sales Report.

Sales cancellations of soybeans more than offset reported new sales, with the result that net sales were negative.

Reported exports of soybeans, 318,800 metric tons, continued strong. Principal destinations were the European Community, Japan, and Taiwan.

Reported sales of corn showed a pick up in activity over the preceding two weeks.

Reported exports of barley continued heavy for the second consecutive week. Principal destinations were Denmark, United Kingdom and Columbia.

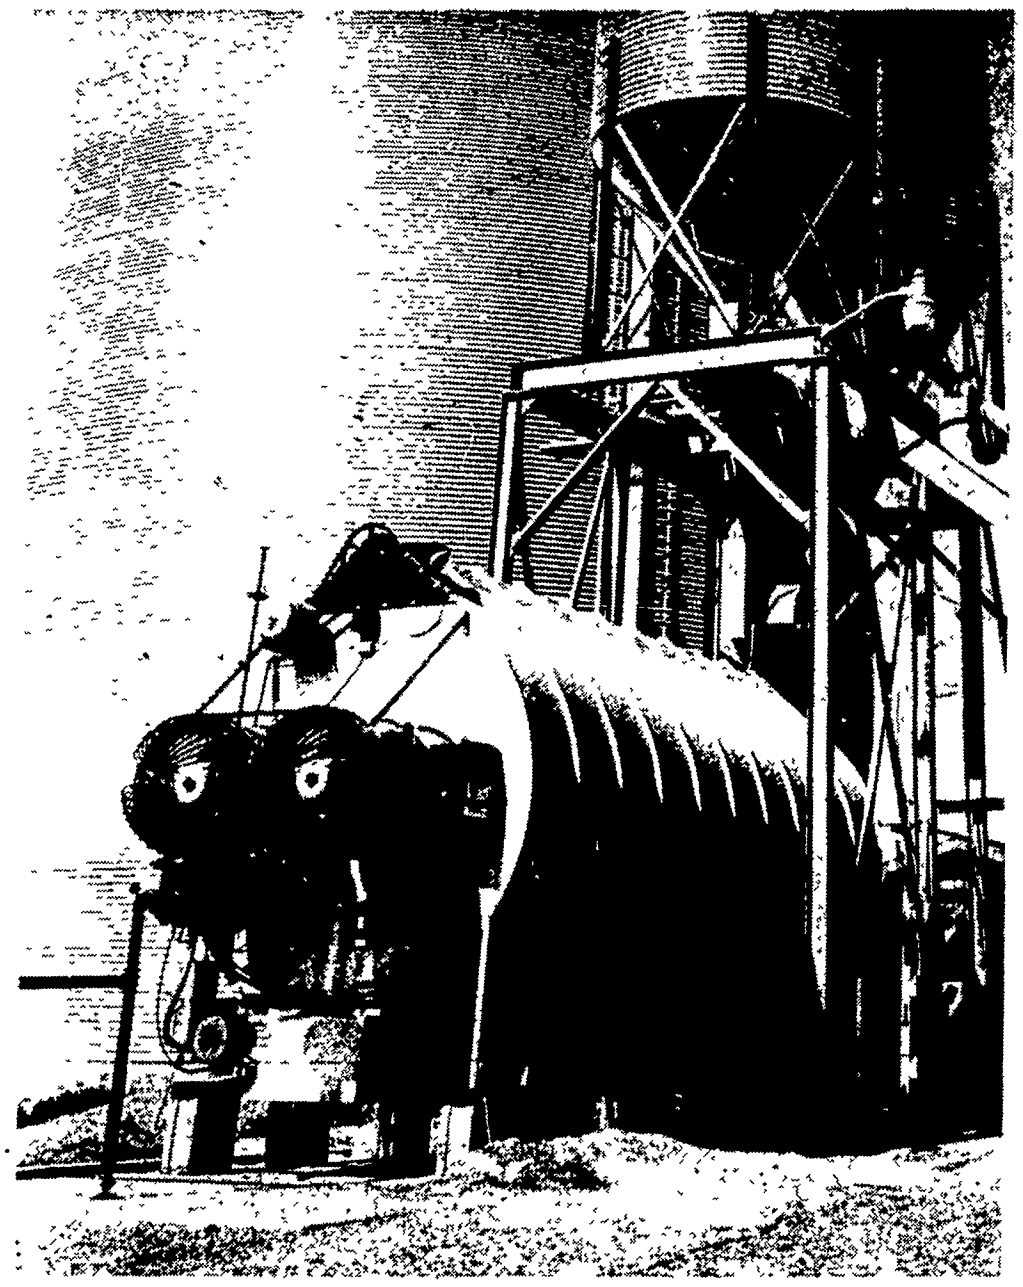
Pay to dry corn.

Or feed the water.



You decide.

Hard telling how high those drying costs will go this year, but you know whose pocket the money will come from. You don't have to pay it. With a Harvestore® system, owners go directly from the field to storage and feed the water you pay to dry out of your corn.

If you're going to feed corn, what sense does it make to spend a lot of money drying and shrinking it first? With a Harvestore system, there's no shrink. No drying costs. No grinding and mixing. And no worry about fuel shortages.

Ask your representative to show you how quickly you can pay for a Harvestore system with the money it saves you.

WAYNE
DARI-FORAGE BALANCER FOR SUMMER FEEDING

Maxine
The New Dairy Computer Shows It Really Pays

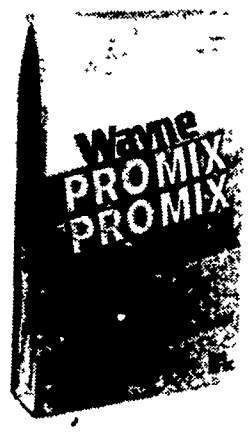
Let Maxine, the new Wayne Dairy Computer, show you how. Contact one of the Wayne Feeds dealers listed below today.

WAYNE FEEDS
WAYNE ANIMAL HEALTH AIDS

Wayne Dari-Forage Balancer gives you a complete one-feed milking ration for summer pastures or green chop. You can feed for full bred-in production. Yet keep feed costs in line by paying for only the protein you need when you need it.

Wayne Dari-Forage Balancers are formulated according to protein level - 12%, 14% and 16%. Cows get a full measure of nutrition. You don't pay for nutrients they are already getting from pasture or green chop.

Ask an expert - your Wayne dealer - for your dog and horse feed needs.



WAYNE PRO-MIX
Provides complete and balanced nutrition for your dog.

You'll never go wrong with Power Pack.

Wayne Power Pack is an economical, high energy building feed. It provides what hay or pasture alone lacks. The perfect choice for horses saddled up just two or three times a week.

Library facility at Quarryvill serves southern Lancaster Co

Melanie Moyer (left), project supervisor; Sherrie Snyder, consultant for the Lancaster County Library Extension Department; and Fran Entrekin, library center coordinator, discuss the Summer's reading project.

HOMESTEAD NOTES

By SUSAN KAUFFMAN
Feature Writer

"The community support is fantastic, it is really great; more than any of us could ever have expected," says Fran Entrekin, coordinator of the newly opened Southern Lancaster County Library Center. She summed up what has been a year-long successful attempt to open a reading center for the Southern Lancaster County residents.

At 304 St. Catherine Street, Quarryville, stands a brand new library filled with 3,000 new hard-bound books, many records, pamphlets, paperback books, films and cassettes, current magazines, reference materials, and even puppets. The modular building is fully equipped with air-conditioning, and is built to give easy access to handicapped individuals confined to wheelchairs. There are special lounge chairs for youngsters to use when browsing through books, as well as record players, a film projector, and many displays throughout the center.

The brightly colored oranges, reds, browns, and whites of the interior of the reading center make it an attractive place to browse, read, view a film, or learn a craft. The library is not simply a room full of books but a place for opportunities to explore with sights, sounds, and the printed word.

Recently Lancaster Farming spoke with Fran Entrekin, library coordinator at the Southern Lancaster County Reading Center; Melanie Moyer, project supervisor; and Sherri Snyder, consultant at the Lancaster County Library Extension Department to find out how this new building, its contents, and goals came to be.

As is the case with most federally funded programs, much paperwork, public speaking, and endless meetings preceded the reality of the finished product. But all three young women involved unanimously agreed that the fantastic community support is what really made the undertaking work.

In 1976, the Lancaster County Library system which includes the main library in Lancaster City and eight reading centers in Adamstown, Intercourse, Leola, Manheim, Manheim Township, Mountville, Rohrerstown, and Strasburg, received federal funds through a grant from the Library Construction Act to open a new reading center at some town with a population of under 2000 in the county. Five places were selected as possibilities, and the Extension Department of the Library went out to these municipalities to take their proposals to the borough or town councils.

Support was immediate at Quarryville. The borough offered the land for the building site, named individuals who might be willing to help organize the center in the form of an advisory committee, and promised financial assistance after the 12-month long grant expires.

Although the building is within the borough limits of Quarryville, the new library actually serves the greater Solanco area including nine townships and the borough, or a population of nearly 18,000 people.

The real need for and interest in this type of project has been demonstrated by statistics from the first six months of operation. The average circulation of the other staffed reading centers in the Lancaster County system is 500 books per month. Immediately upon opening, the library at Quarryville tallied 2000 to 2500 books per month in circulation.

To Mrs. Moyer and Mrs. Snyder, the two women in the Lancaster County Library Extension Department who worked with this project, the beforementioned statistics proved that opening an attractive library which contains a quality collection and is operated by a competent, paid staff member is a formula for success.

Mrs. Entrekin, local coordinator of the library at Quarryville, lives at Pequea, R1. She received a degree in library science from Millersville State College, and for a time worked at Massachusetts Institute of Technology developing a scientific library there. Presently her job as library co-ordinator at the new reading center involves a 25-hour work week in which she schedules the volunteers to cover the hours the library is open, sets up special programs to be used at the library or from the library facilities and taken to public schools and nursery schools, writes press releases for promotion of programs, and handles the requests for special materials by patrons.

Presently, there are 30 volunteers who staff the library during the 31 hours each week the library is open. Mrs. Entrekin explains that she always tries to have two volunteers, adult as well as school students, on duty at the same time to help the patrons. She says, "I really could use more volunteers now. We are very busy."

Mrs. Snyder and Mrs. Moyer were quick to acknowledge the enthusiasm they received from the public school librarians in the Solanco School District. Mrs. Moyer said they were very supportive of the project and were very pleased to see such a center open in the district. Many of the school librarians volunteer their time and interest during the open hours and at adv committee meetings.

"The school ministration has been much in favor of ou forts," Mrs. Snyder "The superintendent s special greetings an center was publicized i school district newsle

In addition to sched volunteer help, Mrs. trekin also organizes s programs such as demonstrations. Since November 1976 openin center has held de strations ranging macrame and croch knitting and making cone wreaths. Several instructors were women who had neve the opportunity to te class before.

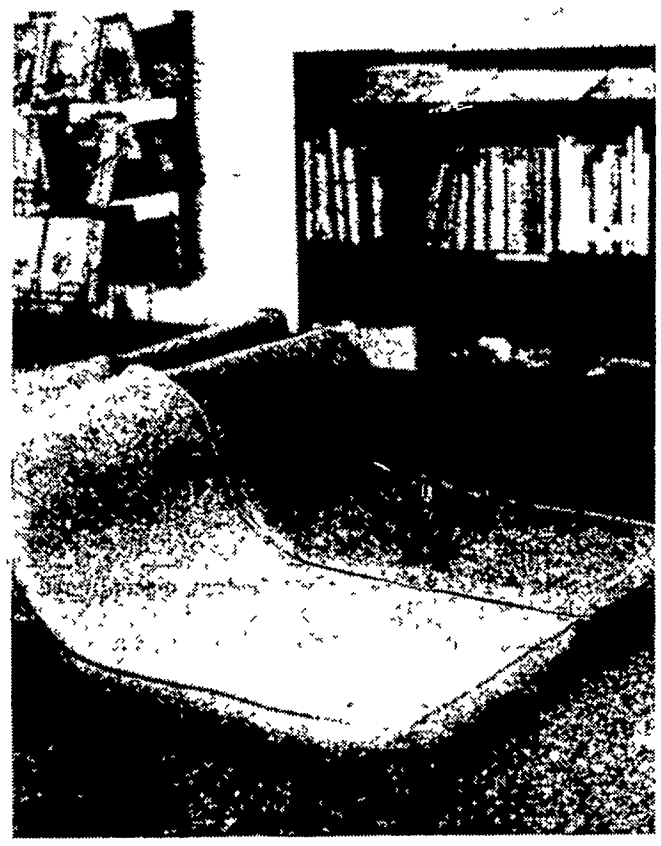
"They were very teachers!" Mrs. En commented about tutoring.

In addition to offer chance to learn a new at the center during cl the library also offe opportunity to view fil scheduled evenings ples of the movie fare a July 1 program on ca and fishing, the Ju cartoons, and the Ju oldies starring "Our G Shirley Temple, and and Costello.

Many elementary classes came to the li this Spring for orient and they especially del in the puppet show put Mrs. Entrekin. She there will be a perm puppet collection estab at the center to be used nursery schools in the as well.

Not neglicting a family member fro youngest to the olde center also provid consumer awarenes formation display

(Continued on Page 4



The newly opened Southern Lancaster County Library is a modular building decorated with brightly colored modernistic furniture. These comfortable lounge chairs offer a tempting seat for browsing through books and displays.

Reading, in itself, creates fantasy lands of new ideas and make believe worlds, but this Summer, children from the ages of seven through 14 will actually be able to read their ways into the tangible Fantasyland located near Gettysburg.

The program involved is the Southern Lancaster County Library Center's Summer reading program which will be held from July 5 through August 13.

The participants must read six books - three fiction and three non-fiction, all on the child's reading level - and a short review of each work must be written. The forms for this review are available at the library center.

Everyone participating will also receive mobiles at the beginning of the Summer program. As each book is read, a new section will be added to the hanging artwork.

Certificates and free Fantasyland passes will be awarded on August 13th at the library center.

Anyone interested in the program can take part in registration on July 5 at the library center, 304 St. Catherine Street, Quarryville.

For the readers' enjoyment, 3000 new hard-bound books stock the shelves of the library center in Quarryville. The facility also offers records, pamphlets, paperb books, films and casettes, cur magazines, reference materials, puppets.

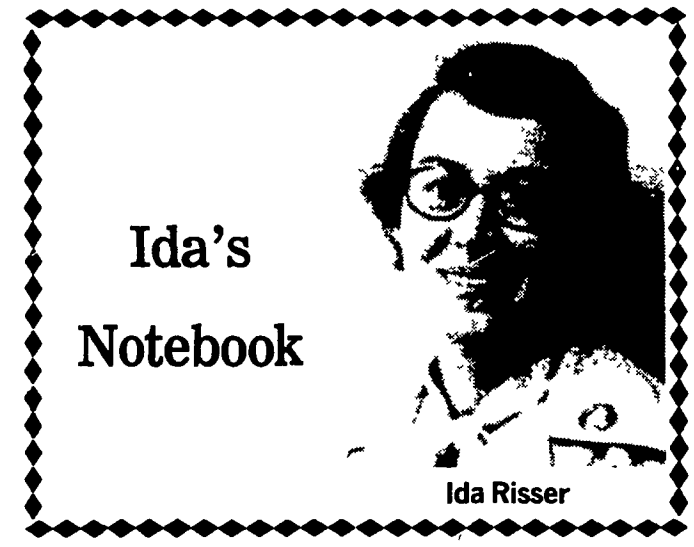
gives information about repairs, costs, comparisons of workmanship, and any information one might like to have before making a purchase or a complaint about damaged merchandise.

"Just last Friday a gentleman came in here. He said he was 64 years old and could finally afford a color television and he wanted to check for himself to see what kind to buy!" remarked Mrs. Entrekin.

Mrs. Entrekin is now getting ready for the July 5 opening of the Summer Reading Program for children ages seven to 14. Those children who have read six books and written short reviews by August 13 will receive certificates and free passes to Fantasyland.

The Southern Lancaster County Library Center is definitely filling a need for its community by providing books as well as many learning opportunities for all ages. It has served since opening as a model for such projects for several greater library systems which have been hosted by the Lancaster County Library System. Presently, the system is requesting an $18,000 redevelopment grant to continue additional improvements such as paving the parking area, landscaping, and staffing the facility for another 12 months. If this grant is not approved, the community will have to meet an $8,000 budget on its own starting October 1 of this year. Local residents are working hard to find the necessary funding in the event that the center may need to be totally financially supported by the community.

The first six months' operation of the library center has been very successful and community support has been very successful and community support has been favorable. The southern end of Lancaster County has a reading center to take pride in and to utilize through a variety of programs.



Ida's Notebook

Ida Risser

In my mind there is no other way except to acknowledge that "food" is the best bargain available. I don't have statistics at my finger tips to prove my point, but just general knowledge of present situations.

My dander really rises when I'm forced to pay fifty to one hundred dollars an hour to professional people like doctors, dentists or lawyers and then have them question my charging one dollar for a quart of vegetables or fruit. Sometimes they, who earn enormous amounts, will actually tell me that they can buy the same thing for ninety cents some place else. When I think of the weeks and even months of back-breaking work that went into growing the food...!

We are at their mercy as to when we may see them for their services and as to how long we may see them and we must abide by their decisions. It surely makes me wish that for a few years we could charge just what we think our services are worth. After all - food is essential.

xxx

Between hay crops the men have been making a new meadow fence where it runs along a woods and down to the river. Usually our cottagers take more and more land by gradually mowing into the fields. But this time, the tenant decided he wanted less woodland area to trim so we put up a new fence.

Philip's dog, "Buster" likes to go along with them but sometimes he wanders far afield and doesn't come when called. The other day, after having his doghouse moved from the corner of the yard to the back of the barn and yelping all day about the change, he ran away when he was unchained. I could just imagine Philip's long face if he weren't found and an "ad." had to be placed in the newspaper. However, he was finally discovered snooping around another cabin where he had found a rabbit hole and was brought home in disgrace.

Homemaker's Camp set for August

Homemaker's Camp will again be held this year at Camp Swatara on August 16 to 18. This year's theme is "Living with Change," which will be woven into the three day event via crafts, speakers, and devotions.

The program will begin on August 16 at 7 p.m. and conclude on August 18 at 4 p.m. The cost is $18.

For further information, contact Mrs. John Denlinger at 717-392-5761.

On being a farm wife

—*And other hazards*

By JOYCE BUPP

Phew! It's almost a relief that this Juné Dairy Month is nearly over. I don't think my blood pressure can take too much more of the emotional involvement the month has been triggering.

Oh, don't get me wrong! I'm a dedicated supporter and user of pure, real dairy items: milk at every meal, butter, cheese, sour cream, cream cheese and quality ice cream. Not to mention splurging on a favorite - banana splits, topped with gobs of real whipped cream.

But what's bugging me are the imitations riding along on the dairy month promotional push.

One local supermarket featured a full page of "Dairy Month" items. Know what they are pushing? Three kinds of margarine on sale, advertised in great big print, with not a mention of the product butter. Another carried a push for shoppers to buy a popular brand of imitation sour cream. Then, during this past month, I read several times of a new imitation chocolate milk product, based on coconut fat, chomping into the dairy product dollar. They're about as close to an authentic cow product as I am to resembling Farah Fawcett-Majors - and believe me, that's so far that you'd need a UFO to get there.

Know what else bugs me? Dairy farmhouse refrigerators harboring oleo margarine, with the farmer-owners complaining that they're not being paid enough for their milk. Restaurants that serve "shakes," carefully omitting the milk prefix, bug me too. And so do coffee whiteners, anywhere, anytime, by anyone.

They're all trading on the years of goodwill, great taste, and super nutrition built up by the real thing, coming from a genuine four-legged cow.

Okay, that's enough sermon; now for the morning offering. May I offer a few off-the-top-of-my-head promotion suggestions?

Our local school district now offers chocolate milk with lunches to students, and has dramatically cut down on the previous 10-15 gallons daily of unopened white milk throwaways. But while milk is better - most children eat too many sweets already. White milk cartons artistically designed to resemble little toy village buildings would make neat reusable toys with small trucks, cars, and people when the original contents had been consumed. And it might help to reinfor positive attitude to drinking white chocolate milk.

Or how about free gif housewives who save mail in designated am of proof of purchase many gallons of milk?

One final suggestion h while I watched patron well-known fast food c Decorative glasses being "given free" purchased filled with a drink. The glasses being sold as fast as cashiers could ring the up.

Why not do it with m

Clothing Outlook

Clothing prices are expected to go up in the first nine months of 1977, but probably not as much as the prices of most other goods, according to Greta C. Vair, Extension home economist at Penn State University. Last year the average consumer spent $345 on clothing and shoes. That's an increase of 5.2 per cent, or about $18 per person, over what was spent in 1975. A similar rate of increase is expected for 1977.

Home on The Range

nly fitting that we ut the month in the in which we began - ury recipes. During ury Month we have run the gamut of all foods made with dairy products and are returning this week to milk drinks - a favorite Summer refresher.

If you've been concerned over the past month with the calories you'll be taking in when you eat these scrumptious foods, you may be interested in the following information: 1 cup whole milk equals 150 calories; one cup skim, 90 calories; one cup "two per cent milk", 145 calories; one cup buttermilk, 90 calories; ½ cup yogurt, 60 calories; 1 tablespoon dairy sour cream 25 calories; ½ cups cottage cheese, 85 calories; 1 ounce cream cheese, 105 calories; one ounce Chedder type cheese, 70 calories; and ½ cup ice cream, 130 calories.

ORANGE BREAKFAST BRACER

1 cup cold buttermilk
3 tablespoons frozen orange juice concentrate
1 teaspoon honey
Orange slice

Combine buttermilk, orange juice concentrate, and honey. Blend well in a blender or with a mixer. Garnish with orange slice. Yields approximately 1-¼ cups.

LIME LUNCHEON FREEZE

2 cups cold milk
1 pint lime sherbet
¾ cup (one 6 oz. can) cold pineapple juice
Lemon juice
Sugar
Fresh mint

Combine milk, sherbet and juice. Blend well in blender or with a mixer. Serve in lemon-frosted glasses. Dip rim of glasses in lemon juice, then in sugar; chill. Garnish with fresh mint. Yields approximately four cups.

DESSERT MOCHA SHAKE

2 cups cold milk
1 pint chocolate ice cream
¼ cup chocolate-flavored quick milk mix
2 teaspoons instant coffee
Cinnamon Whipped Cream
Cinnamon stick

Combine milk, ice cream, chocolate mix, and coffee. Blend well in blender or with a mixer. Garnish with Cinnamon Whipped Cream and cinnamon stick. Yields about four cups.

Cinnamon Whipped Cream: Whip together ½ cup whipping cream, one tablespoon sugar and ½ teaspoon cinnamon in a chilled bowl with chilled beaters, until stiff peaks form, scraping bowl occasionally.

United Dairy Industry Association

OLD FASHIONED HOT CHOCOLATE

2 (one-ounce) squares unsweetened chocolate
½ cup water
¼ cup sugar
Pinch of salt
3-½ cups milk
1-3 cup heavy cream

Heat and stir chocolate, water, sugar, and salt in the top of a double boiler over simmering water until the chocolate is completely melted. Slowly stir in milk and let uncovered to serving temperature. Serve in mugs topped with whipped cream. Makes four to six servings.

Scoops strawberry ice cream

Blend ice cream with strawberries and banana in a blender, or with electric mixer. Gradually add milk and orange juice. Pour into large glasses. Top with scoops of ice cream. Yields one quart.

Cindy Rutter
York, Pa.

SPICY ICE CREAM FLOAT

1-3 cup sugar
¼ teaspoon ground cinnamon
1 quart cold milk
1 teaspoon almond extract
½ teaspoon vanilla
1 pint vanilla ice cream

Combine sugar and cinnamon; add milk and flavorings and stir until sugar is dissolved. Pour into tall glasses and top each with a generous spoonful of ice cream. Serves six.

GRAPE COOLER

1 pint vanilla ice cream
1 pint milk
1 (six-ounce) can concentrated grape juice

Place all ingredients in a blender or mixer and mix well. Garnish top with extra ice cream if desired. Makes three generous servings.

Above two recipes by:
Mrs. Carl S. Bacon
Felton, Pa.

500 CALORIES
MEAL-IN-A-GLASS

1 cup cold milk
2 eggs
2 teaspoons sugar
½ cup vanilla ice-cream (soft)
½ teaspoon vanilla
Nutmeg to taste.

Beat together all ingredients, except nutmeg until frothy, using an electric mixer or blender. Pour into a chilled tall glass and dust with nutmeg. This high-protein formula can be used instead of solid foods and makes one serving.

Mrs. John Kiser,
Codorus, Pa.

FRESH STRAWBERRY MILK SHAKE

2-½ cups vanilla icre cream
1-½ cups milk
½ teaspoon vanilla
½ cup fresh strawberries

Place all ingredients in blender. Blend.

Minute Markets cited

ALLENTOWN - Farmland Industries, Inc., parent company of Turkey Hill Minute Markets, received an award last week for energy conservation.

The Lancaster-based firm earned Pennsylvania Power & Light Company's Energy Saver Award for using energy efficient systems in new markets, as well as for modifying lighting, heating and insulation in existing stores.

Brent S. Shunk, vice president of PP&L's Lancaster Division, praised Farmland for its conservation efforts and continual energy use inspection program. He pointed out that the Turkey Hill Minute Markets saved six million kilowatt-hours of electricity in 1976, compared with the previous year.

Shunk presented the award to David Cook, Farmland president, and Ronald J. Regar, vice president, real estate.

Farmland Industries operates more than 80 markets in PP&L's Lancaster Division service area, which includes most of Lancaster County and parts of Berks, Chester, Lebanon and York counties.

Women's Calendar

Saturday, June 25

Lancaster County Society 1 meeting at 6:00 p.m. at Stonebridge Farm.

Lancaster County Society 4 meeting at noon for a luncheon for members and friends. The group will tour "White Chimneys."

Carefree cotton now in fashion

WEST CHESTER - Cotton is now appearing as one of the most important fabrics for summer, according to information from Gertrude Dougherty Chester County's Extension home economist. While cotton never really left the fashion scene, it disappeared to be blended with polyester or rayon.

Now that cotton is made so that it doesn't wrinkle and is as easy to care for as any synthetic, the fashion pendulum has swung the other way. Many customers want cotton that wrinkles, even cotton that is prewrinkled.

Cotton is available in heavier weights, and the predition is that suiting weight cotton will return for wear on hot summer days when women want a tailored look with cotton's breathing capacity.

On the other side of the coin is light cotton which is known as gauze everywhere but in Britain where they come right out and call it cheese cloth. Gauze is not only sheer and cool but fits well into the increasing volume of the fashion silhouette.

Cotton gauze and its cousins cotton voile and cotton organdy are naturals for billowy sleeves on peasant-influenced blouses. Cotton in these sheer weights will probably prove popular for some time to come, and with the variety of patterns and styles, it could develop into a basic.

Denim, always popualr, is part of the cotton story, and its supremacy is assured. In denim, some synthetic is often used, but many customers like that wrinkled look in their denim dresses and skirts too.

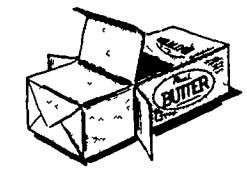
Alumni Choir to sing at Longwood Gardens

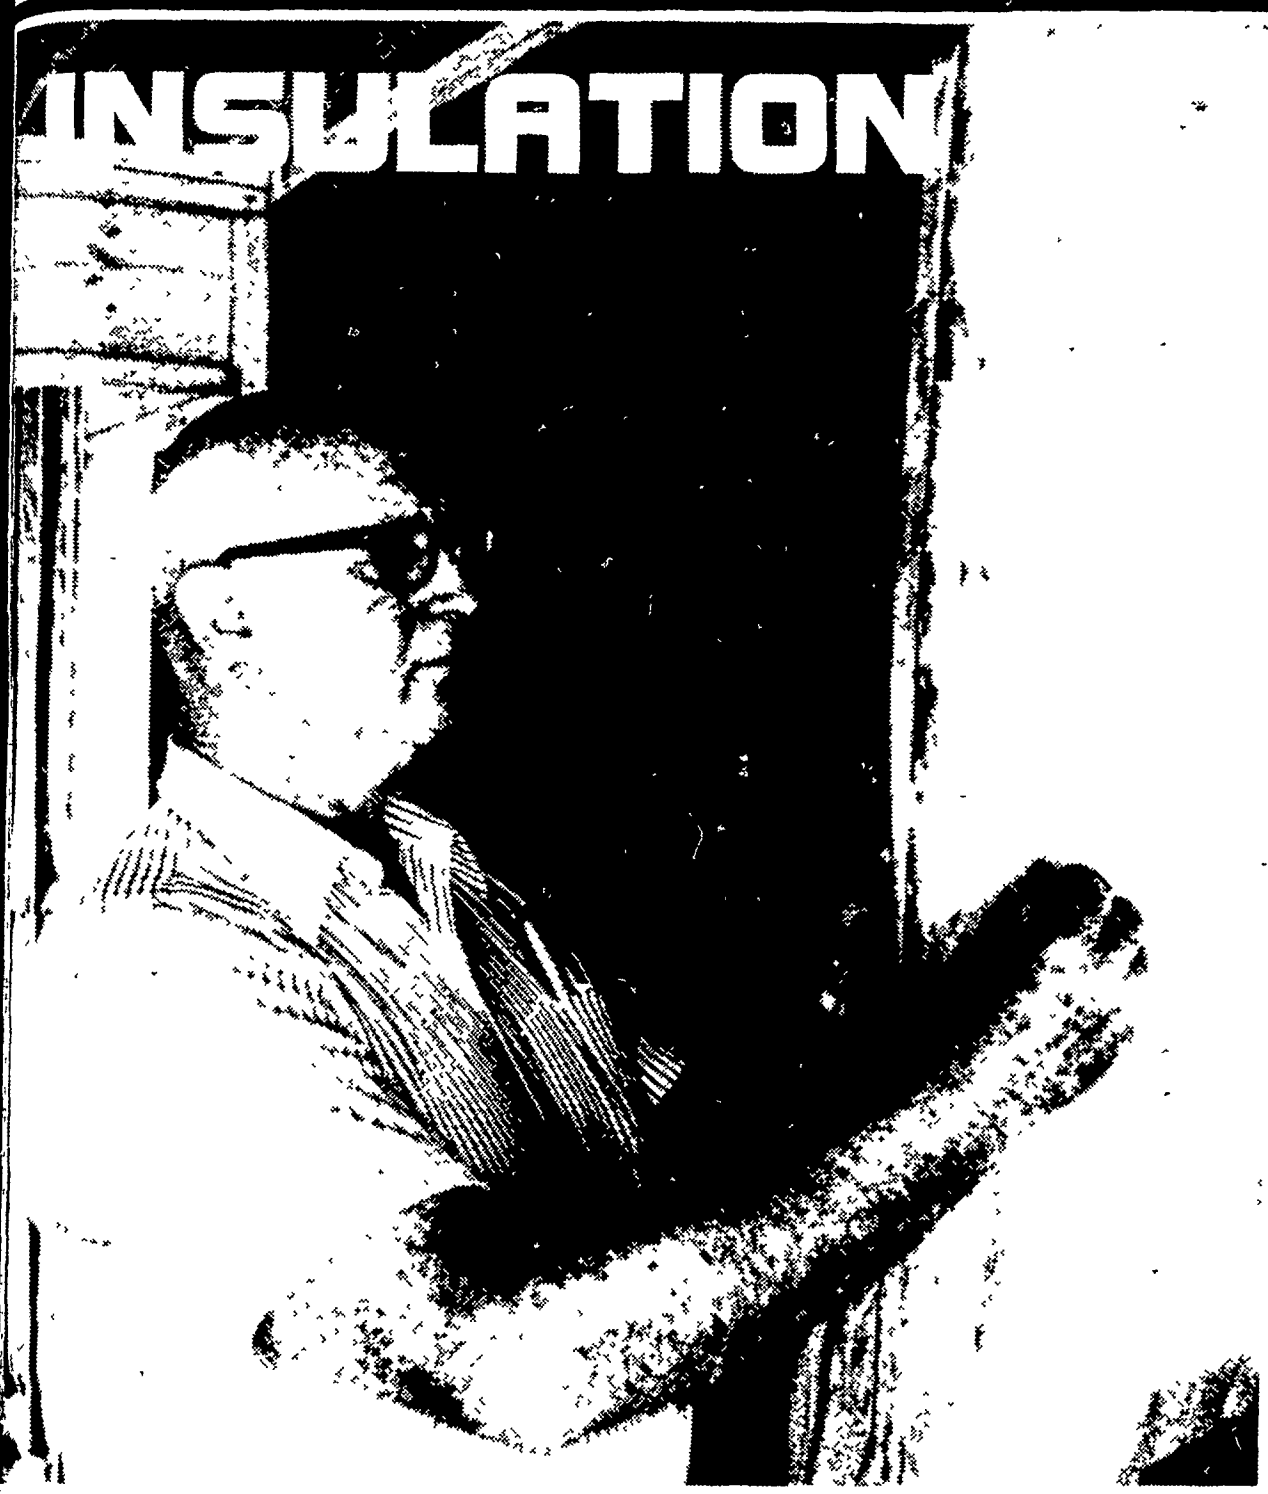
KENNETT SQUARE, Pa. - The University of Delaware Alumni Choir will present an outdoor concert at Longwood Gardens on Sunday, June 26. The concert begins at 7 p.m. in Longwood's Open Air Theatre. Seating is available on a first-come basis to anyone who pays the regular admission fee to the gardens. Later in the evening, there will be an illuminated water show in the main fountain garden.

The University of Delaware Alumni Choir may very well be the only such choir in the United States. It was founded in October 1973 as an artistic outlet for singers no longer at the college level.

Other concerts in Longwood's summer series are the Brandywine Cathedral Brass on July 3; flutist Priscilla Ochren on July 10; the Diamond State Saxaphone Quartet on July 17; the Brandywine Woodwind Quintet on July 31; the 553rd Air Force Band of the Pennsylvania National Guard on August 14; and Festival Trumpets on August 28. Programs are open to all visitors at the cost of daily admission. No rain dates are scheduled.

Longwood Gardens is located northeast of Kennett Square, Pa. The outdoor gardens open daily at 9 a.m., the conservatories at 10 a.m. Admission is $2 for adults, $1 for children ages 6-14, and free for children age five and under.





If you're planning to buy an electrically heated home...

Energy-Efficient Homes Offer More

Insulation not only adds comfort to your home but saves you money season after season. In winter, it holds heat in to lower heating bills. In summer, it keeps your home cooler to reduce air conditioning costs.

That's why PP&L-approved Energy Efficient homes are super insulated. In ceilings it's as much as 10-inches thick . . . full thickness in every exterior wall. Even floors, over unheated areas like basements and garages, are heavily insulated. And, in the case of slab floors, you'll find insulation all around the perimeter.

The sheathing used in Energy Efficient homes insulates too. It's tongue and groove . . . 1-inch thick polystyrene. With 4 times the insulation value of standard type sheathing, it is one of the best insulating materials on the market today.

Doors and windows must meet PP&L's insulation requirements as well. Fact is, everything that should be insulated is . . . right down to hot water pipes and heating ducts.

So, if you're thinking of a new electrically heated home, look for one that qualifies for the Energy Efficient Home Award It's your assurance that you'll be getting the most practical energy-saving features money can buy.

PP&L Award — Energy Efficient Home

If your builder is not familiar with the requirements of an Energy Efficient Home, call PP&L.

Ask for a residential consultant who can supply you with materials and equipment specifications and builder information.

Lancaster Home Economist

CORRECT FREEZING METHODS CAN PRESERVE MEAT FLAVOR QUALITY

Freezing preserves the natural fresh qualities of meat better than any other method of preservation.

Although freezing may tenderize meat slightly, it will not make tough meat tender.

If you cut your own meats, remember that equipment for handling meat products should be as free of seams and cracks as possible and should be scrubbed in hot water with a good detergent and sanitized after each use.

Many families prefer to select cuts of their choice from the market and freeze these at home. All store-packaged fresh meats should be repackaged in freezer materials at home, since "butcher paper" usually is not moisture-vapor proof and contains air pockets.

Recommended storage time in the freezer for roasts, rolled roasts, steaks, chops, stew meat and frying meat is eight to 12 months. Store ground meat for three to four months, and liver no longer than three months.

Use only good quality meat for the best results in the freezer. Cut them as for cooking, removing as much bone and other waste as possible, and package them in family-size servings. Keep meat cold while it is being cut and wrapped. Large pieces should be wrapped individually in freezer foil, film or paper. Steaks or chops should be wrapped the same way except a double layer moisture-vapor-proof material should be placed between each piece of meat to make separation for cooking easier. Ground meat should be packaged in family-size servings and wrapped as large pieces. Ground meat has a shorter shelf life in the freezer. For short storage periods, the cuts may be frozen in plastic freezer bags

CHECK PROPERTY VALUE BEFORE BUYING A HOME

Before buying a home, decide how much to spend. One guide on buying is to invest not more than two to two and one-half times your gross annual income, with taxes as they are. A second guide is to select a home and a mortgage plan so that your monthly expenditures for housing-mortgage principle and interest, taxes, sewer rental, etc. - do not exceed one week's take-home pay.

Count on a wife's income only if her plans to continue working are firm and definite. If a mortgage must be set up for more than 25 years to permit you to stay within your budget, the house might be too expensive for your income.

Though you might think you are buying a house to keep for the rest of your life, buy one that is re-salable. Avoid buying a house with faddish architecture, a house priced too much above or below surrounding houses, or one with an odd floor plan. A three bedroom house will be more salable than a one or two bedroom house. Naturally a basement, modernized kitchen and a second bath add to resale value.

Think ahead before buying property. Check at city and county offices for information on school bonds, taxes, water, sewer and garbage assessments, and urban renewal plans. Find out about highway construction, zoning, flood probability, surrounding land values, and business growth. All might influence the future value of your property.

Oil to affect Clothing Prices

As the price of petroleum oil continues to rise, so will the prices of everything made from petroleum-based chemicals, including clothing.

Extension Service

The Pennsylvania Cooperative Extension Service offers educational programs and materials without regard to race, color, sex or national origin is also an equal opportunity employer.

Farm Women Societies

ncaster Co. Society 3

ster County Farm Society 3 toured ltzer's Greenhouse at June 18 meeting.

Following the tour, the group held a business session in which they voted to donate $100 to the New Life for Girls Center and $50 to the S. June Smith Center.

Helping at the Ephrata Community Hospital's June Fete were: Esther Petticoffer, Mrs. Gilbert Paul, and Mrs. William Eberly.

Members and their families are invited to a picnic on Sunday, July 17 at the Shady Grove Picnic Area. Lunch will be served at 12:30 p.m. and members are requested to bring a salad or desert covered dish and place setting for their families.

Lancaster Co. Society 8

Lancaster County Farm Women Society 8 met in the Lutheran Church, Maytown, on June 18.

The special feature of the program was given by Christine Erb, a 4-H ambassador to Europe. Miss Erb showed slides taken during her visits to farm homes in Holland, Belgium, Switzerland, Germany, Russia, France, and Denmark. She showed artifacts which she had purchased along the way.

A group decision resulted in an agreement to give $25 to the International Youth Exchange program.

The county picnic is to be held August 3, at the Lancaster County Park in Pavilion No. 3.

The Homemaker's Convention date at the Farm and Home Center is November 8th.

The date for the Society Picnic to be held at Lilian Eby's Cottage has been changed to July 13 at 12:30 p.m. Members are requested to bring a covered dish and their own place setting. They will meet at the Mount Joy Mennonite Church at 11:30 p.m. to be directed to the location.

Lancaster Co. Society 15

Members of Lancaster County Farm Women Society 15 met on June 9 at Black Rock Retreat for a covered dish luncheon. Their guests were county officers as well as Lancaster County Societies 3 and 20.

Mr. and Mrs. Ralph Schneider presented the featured entertainment with a demonstration of "Crafts with Gourds." Bonnie Wagner, soloist, also sang several selections. She was accompanied on the piano by Lavoyne Feister.

Society 15 has been invited to be guests of Society 27 at that group's meeting at the Donegal Springs Church on July 26.

The county picnic will be held August 3 at the Lancaster County Park pavillion Number 3.

The president reported that she presented a war bond to a home economics student at Solanco High School. A check for $50 was also given to the local midget baseball team in the Kirkwood area.

The Society will have a food table at the George Rinehart farm sale on July 22. A food for supper sale will be held at the July 21 meeting.

Lancaster Co. Society 25

Members of Lancaster County Farm Women Society 25 took a tour of White Chimneys after their June meeting, held at the home of Mrs. Harry Schied, Lancaster.

The next meeting will be held on July 9 at 1:30 p.m. The planned program is miniature golf at Indian Springs, and is intended to be a family fun day.

Lancaster Co. Society 29

Mrs. Mildred Zink from Donegal Mills Plantation was the featured speaker at the June 20th meeting of Lancaster County Farm Women Society 29. Mrs. Zink spoke on the three basic kinds of herbs - culinary, aromatic, and medicinal.

During the business meeting, the group voted to donate $200 to the S. June Smith Center. The women have also been asked to help out at the Elizabethtown Fair on September 26.

The next meeting of the group will be a pig roast at Musser's Spring House on September 19. They will entertain husbands, Society 17, and county officers.

Lebanon Co. Society 5

Lebanon County Farm Women Society 5 met for a tour of Wilbur Weik's store as part of their June meeting. Following the walk through three floors of furniture, fabrics, carpet and other home furnishings, the group met for the

Susan Pepple is Chester County dairy princess

By DIETER KRIEG

OXFORD - Susan Pepple, a 1977 graduate of Oxford High School, began her reign as Chester County Dairy Princess last Saturday, when she received the symbolic tiara and sash from outgoing Chester County Dairy Princess Carol Yeager. Nearly 200 persons were present to witness the evening ceremonies, held here at the Nottingham School.

The daughter of Mr. and Mrs. Shannon Pepple, the 17-year-old princess makes her home on one of the largest dairy farming operations in southeastern Pennsylvania, and she's actively involved with the work. Milking some of the family's 650 cows is nothing new to her, and she'll be keeping at it for the time being before charting plans for college. She owns 15 head of dairy cattle and claims that life on the farm is for her.

The new dairy princess is also a sports enthusiast, having played on the hockey, basketball and softball teams while in high school. In addition, she was on the student council, was a member of the homecoming court, and serves as treasurer of the Oxford 4-H dairy club. She entered the dairy princess pageant in order to have an opportunity to promote dairy products.

Miss Pepple was one of five Chester County girls to vie for the title. She was chosen as winner of the pageant by a panel of three judges. Master of ceremonies for the evening activities way Boyd Gartley, director of member and public relations for Inter-State Milk Producers Cooperative.

Runner-up in the pageant was Denise Andrien, 17, the daughter of Mr. and Mrs. Bruce Andrien, West Chester. A Jersey and Guernsey enthusiast, Miss Andrien is a perennial contender for top honors at local, state and regional shows. She has her own herd of cows and is actively involved in their management. Her extra-curricular activities at Downington High School during the last three years have included the marching and concert bands, girls choir, volleyball and track teams. She has also been involved in numerous 4-H projects and is a member of the 4-H County Council. She plans a career as a veterinarian and currently spends some of her time as a veterinarian's assistant.

The other three girls taking part in the co were:

Joyce Kolb, 17, daught Mr. and Mrs. Daniel K Spring City. Nadine Pra 18, daughter of Mr. and Horace Prange, Coch ville. Donna Roney, daughter of Mr. and Harold Roney, Oxford. five girls received gifts their efforts and time w made the dairy pagean success.

Susan Pepple and Denise Andrien

LIQUID MANURE SPECIALISTS

PEARSON takes the work and waste out of manure . . . with Better-Bilt Liquid Manure Systems for hogs, dairy, beef and poultry.

• Two types of manure spreaders handle liquid, semi-liquid and heavy slurry fast and easy • Eight models, capacities up to 3150 gallons • Truck mounting optional for all models • Manure is spread over 35'-40' swath or injected into soil (up to 12") • Three PTO powered, heavy-duty pumps agitate and break up solid manure into massive slurry, pumps are reversed for filling spreader • Powerful mono pump is used in irrigation systems • Heavy-duty electric pump available

Twila Brubaker crowned midst gala affair

By SALLY BAIR
Feature Writer

LANCASTER, Pa. - Twila Brubaker, Manheim R4, is not only pretty, but popular, and the combination made her a double winner Saturday night when she was crowned the 1977 Lancaster County Dairy Princess at ceremonies at the Farm and Home Center. She also received the Miss Congeniality award, based on a vote by all contestants.

Seventeen-year-old Twila was first alternate in the 1976 contest, and made several appearances on behalf of Deb Kreider, who crowned her successor.

First alternate in the contest was Susan Lynn Skiles, Narvon R2, the daughter of Mr. and Mrs. Kenneth A. Skiles. Susan graduated from Pequea Valley High School this month and will enter Lancaster General Hospital School of Nursing in the Fall.

The daughter of Mr. and Mrs. Harold Brubaker, the new dairy princess graduated from Manheim Central High School in June. She wishes to train as a licensed practical nurse, and must wait until September of 1978 to be enrolled at Willow Street Vo-Tech because of the courses' popularity.

Twila said her work as first alternate helped prepare her for the coming year. "It gave me an idea about how busy I will be."

In an interview following the contest, she said, "I am honored to be chosen, and I feel it will be a very rewarding experience." She said she will plan to continue programs of promotion carried out in the past, but added, "I hope to develop some new ways of promoting milk."

As a contestant, Twila spent time promoting milk with the other contestants at the Mall Day Dairy Month promotion sponsored by the committee. About the experience she said, "I really enjoyed working with the public. I also liked helping Deb with an elementary school appearance."

In her interview before the audience and the judges, Twila had the opportunity to tell why she feels dairy products are important in the daily diet. She said, "Because of milk's nutrition. Milk helps build healthy bodies and strong teeth."

It was a gala evening for the local contest, and even a severe thundershower left the area in time for the patio-reception, as planned. The rain did nothing to dampen the spirits of the 325 dairy supporters who attended the banquest and contest.

All contestants teamed up for a milk promotion before the dinner, when they carried in ice cold pitchers of milk for the banquet tables, and sang along with Jane Ayers in a specially written rendition of the promotion song, "Milk is a Natural." Everyone enjoyed seeing the contestants doing the "natural" thing for anyone interested in being a dairy princess.

The on-stage part of the contest began with an audience-pleaser when the 10 contestants appeared in a musical number attired as "southern belles" complete with parasols and bouquets. Jane Ayers led the girls in singing, and she appeared on the program later in her own musical numbers. Glenn Hough, well-known organist, provided the accompaniment throughout the evening.

The "southern belles" carried through on the southern theme of decorating which featured high white columns, abundant greens and spanish moss, and "doll" cakes at each table.

The rest of the contest was carried out on a more traditional level, with master of ceremonies Grover Gouker, Jr., of the Dale Carnegie Institute, leading the girls through interviews and questions.

Judges were Mrs. Raymond Armacost, dairyman's wife and active dairy princess promoter from Upperco, Md.; Eugene Richard, vice-president, American Bank, Myerstown; and Alfred Brandt, retired dairyman from Lebanon R2.

Other contestants were: Margo Armstrong, daughter of Joan Armstrong and Hugh Armstrong, New Providence R1; Sheryl Boll daughter of Mr. and Mrs. Warren F. Boll Lititz R4; Linda C daughter of Mr. and

My Thoughts

And welcome to them

By JOANNE SPAHR
Associate Editor

cracker pudding the same as monkey food?" nnesota hostess inquired with open eyes and terested face.

g your pardon," I said, extremely perplexed s odd question.

cracker pudding the same as monkey food?" tiently asked once again without batting an sh or changing the expression on her face.

nd my mind whirling in circles as I tried to of an answer. During my 10 days in "The land 000 Lakes," I'd had many questions fired at out Pennsylvania's agriculture and cultural e I could answer the simple questions like crops are grown out there?" and "how is the doing?", but, never in my wildest dreams had I programmed to answer the monkey food on I kept feeding it into my brain, and my kept spitting out a blank.

had to be kidding, I decided. But, after ng her face for the third time I realized that she wasn't. And, unfortunately, it was time to say something.

Gingerly, I began a polite but cautious reply.

"I'm not sure," I said slowly. "What exactly is it that they are feeding monkies these days?"

Instantly, her face turned red, and she let out a laugh to alleviate the pressure.

"Monkey food is a kind of pudding we have out here," she laughed, tears rolling down her cheeks by this time.

To prove her point, she got out her recipe book and pointed her finger at a title which, remarkably, said "Monkey Food." The concotion sounded very close to cracker pudding, except for one thing- it lacked crackers, a major ingredient, I made clear.

After a mutual laugh over the misunderstanding, we enjoyed a chat over the nomenclature differences between the two states.

She had never heard of sticky buns (and almost thought it was a dirty word, as a matter of fact,) and had no concept of the taste of sweet bologna.

By the same token, some Minnesota words were totally foreign to me. For instance, I didn't know what a sugar beeter was. (Sugar beeters are workers who hoe the beet fields).

And, I didn't know that a "Mullah" was a polled Hereford or that the grove of intertwined trees near the farmhouse provided protection from the northwest wind.

But, regardless of the differences in terminology and heritage, my Minnesota host family and I came together on many common grounds for one of the most enjoyable vacations I may ever have.

Plant lovers' corner

Spray lilacs early to stop mildew

Powdery mildew is a fungus disease that attacks many types of plants, but perhaps none worse than the lilac. The white coating becomes so thick on the leaves that many curl and drop off. This in turn reduces the amount of bloom the following Spring.

James J. McKeehen, Delaware County agricultural agent says that he sees lilac bushes are often loaded with mildew every August and September. Their owners say that they started to spray as soon as they saw the disease and it didn't help. It doesn't help to spray at that time. Rather, spraying must start just after the color fades from the last cluster of flowers. Then the spray must be repeated every week to 10 days, until early July. The best material to combat mildew is benomyl or Benlate at the rate of one tablespoon in two gallons of water. This is also an excellent chemical to control rose mildew.

Twila Brubaker

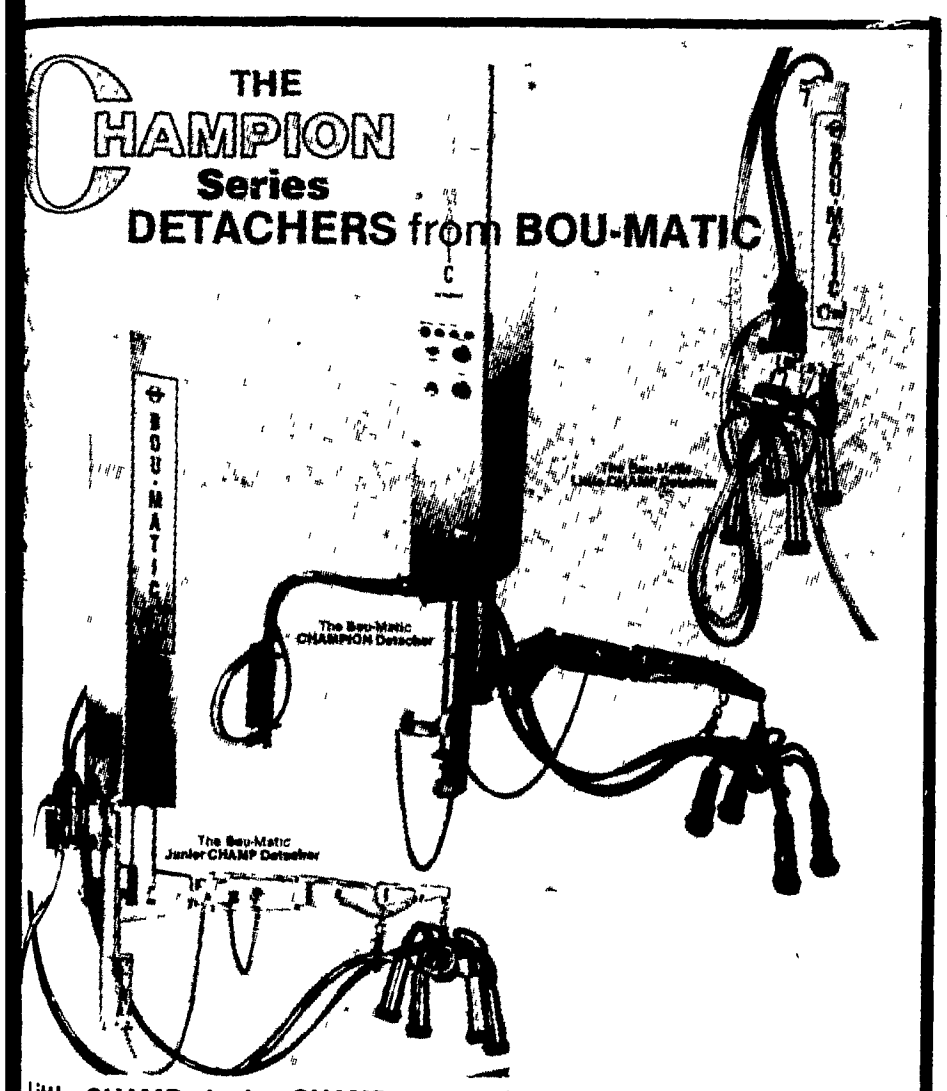
[Continued from Page 52]

Howard Coates, Nottingham, R2; Martha Gregory, daughter of Mr. and Mrs. Robert E. Gregory, Lititz R1; Linda Lou Kauffman, daughter of Mr. and Mrs. Robert H. Kauffman, Elizabethtown R1; Ellen Louise Schmuck, daughter of Dr. and Mrs. Larry Schmuck, Peach Bottom R2; Vickie Warfel, daughter of Mr. and Mrs. George M. Warfel, Quarryville R1; and Linda Jo Wood, daughter of Mr. and Mrs. Jesse Wood, Nottingham R2.

Twila, as dairy princess, will receive a wardrobe donated by Sperry New Holland. Susan will receive a wardrobe contributed by Agway, courtesy of W. Martin and Melvin Stoltzfus. All contestants received gifts from C. B. Hoober and Sons, and from Bernard C. Morrisey, Agway Insurance Counselor.

Chairmen for the contest, and for promotions throughout the year, were Mr. and Mrs. Fred Crider, Nottingham R2. Co-chairmen were Mr. and Mrs. Charles Rohrer, Paradise R1.

THE CHAMPION Series
DETACHERS from BOU-MATIC



Little CHAMP, Junior CHAMP or The CHAMPION. Three Bou-Matic Champion Series Detachers with a range of features and prices designed to fit most dairy operations milking from 30 to several thousand cows.

First there's **Little CHAMP.** A basic detacher at a very basic price, designed to fit either parlor or around-the-barn pipeline systems. Basic in design yet with detacher functions equivalent to units costing many times more.

Next is **Junior CHAMP.** A detacher designed for the dairyman who wants detacher functions incorporated with some dairy proven convenience features that, until now, were available only on units costing much more. **Junior CHAMP,** by far, the finest intermediate detacher available.

Then, for the dairyman interested in the ultimate in automated dairy management tools, there's **The Bou-Matic CHAMPION** Detacher. With reliable, consistently accurate, dairy-proven features that all add up to more cows milked per man-hour of labor.

Three Champions, three solid reasons to consider Bou-Matic when investing in detachers Ask your nearest Bou-Matic dealer for more information and a demonstration, today.

Sandy Miller is Berks County Dairy Princess

By LAUREL SCHAEFFER
Berks County Reporter

WYOMISSING, Pa. -- When emcee A. Wayne Readinger, regional supervisor of the Pennsylvania Department of Agriculture, posed the question; "Can you dream up something new for the dairy industry...?" Sandy Miller, Hamburg, R2, didn't have to hestitate one second to answer.

The lovely Dairy Princess contestant gave a long list of suggestions such as milk flavored lollipops shaped like a cow, and milk fountains to replace the traditional water fountains in public buildings.

Sandy was crowned the new 1977-78 Berks County Dairy Princess, before a crowd of well over 200 at a banquet held at the Sheraton-Berkshire Inn on June 18.

The "moment of glory" came for this blue eyed, 5 feet-7 inch, 19 year old only after a long week of activities with the other seven impressive contestants. They were involved in dairy promotion activities throughout the week at the Berkshire Mall, and also participated in a fashion show sponsored by Pomeroy's, and many other clinics and workshops designed to educate and help prepare the girls for the climax of Berks County's Dairy Week: the Pageant.

During the banquet, while the judges were deliberating on their final decision, past dairy princess Nedra Jo Yoder, gave her farewell remarks. Nedra highlighted on her past experiences as being Berks County's Dairy Princess and thanked the dairy farmers who had made the opportunity available.

Nedra traveled 1,355 miles during the past year, making public appearances at many various places as princess.

Comments were also by Peggy Staub,

|Continued on Page 5

Berks County's Dairy Pageant winners are all smiles about milk. The new princess is Sandy Miller, center. Sue Clay, left, is second runner-up, and Martha Herbert is first alternate.

Sandy Miller

[Continued from Page 54]

...a Dairy Princess; ...id Duncan, Berks ...y Milk Promotion ...ittee president; and ...Reese, co-ordinator of ...pageant and Berks ...y milk promotion.

...new princess, ...ter of Mr. and Mrs. ...Miller, Hamburg, RD ...looking forward to her ...y acquired task as ...entative of the Berks ...y Dairy Association. ...recently graduated ...New York State ...ltural Tech College, ...ngdale, N.Y. where ...studied biological ...logy.

...is also looking forward ...rking at home on her ...s' farm this Summer ...ans to look for a full ...job, hopefully as a veterinarian's assistant, in the Fall. Sandy has been very active in tennis, basketball, softball, hockey, band, 4-H, Grange, and has been on the dean's list at college.

Chosen as first alternate was Martha Herbert, daughter of Mrs. Elva Herbert and the late Paul Herbert, Kutztown R1.

Martha is a recent graduate of Kutztown High School and plans to major in accounting at Kutztown State College. This enthusiastic young lady has been very active in many activities also. She is a member of the Junior Holstein Board of Directors, Eastern Berks 4-H Dairy Club, Fleetwood Grange and State and National Grange, National Honor Society, and her church choir.

Martha is looking forward to assisting the 1977-78 Berks County Dairy Princess throughout the year with her duties to promote milk throughout the County.

Suzanne Clay, daughter of Mr. and Mrs. Donald Landis, Myerstown R1, was second alternate.

Suzanne is a recent graduate of Tulpehocken High School. She will attend Shippensburg State College to major in elementary education. She is active in band, chorus, ski club, National Honor Society, and is pianist for her Sunday School.

The other well qualified contestants were: Donna Hoffman, daughter of Mr. and Mrs. Richard Hoffman, Bernville R1; Cindy Jean Howard, daughter of Mr. and Mrs. LeRoy Howard, Oley R2; Kathryn Leiby, daughter of Mr. and Mrs. Bruce Leiby, Hamburg R2; Janis Malsbury, daughter of Mr. and Mrs. George H. Malsbury, Jaimore Farms, Rehrersburg; and Eileen Rohrbach, daughter of Mr. and Mrs. Alton Rohrbach, Shoemakersville R1.

All of the contestants were awarded prizes from various organizations for their time and efforts.

Farm Women Societies

[Continued from Page 49]

business meeting at the home of Mary Hartman.

Discussion included Lebanon County's new cataract machine and the donation of $50 to a worthy cause. Vic Dinger, Lion's Club member, is in charge of all the donations.

The July meeting will be held at the Mt. Zion Fire Hall. Society 5 will entertain Lebanon County Societies 11 and 14 as well as Dauphin County Society 4.

York Co. Society 26

The Etters, Green Valley Society of Farm Women Group 26 celebrated Flag Day at their June meeting held at the home of Mrs. Ethel Conley, 1761 North View Road, York, Pa. The group heard the reading on the making of the first United States flag by Betsy Ross, and also participated in a hymn sing of patriotic songs.

During the business meeting led by Mrs. William Hake, it was discussed that the Society will participate in the York County Farm Women's bake sale to be held today (June 25). Society 26 will man the stand from 12 to 1 p.m. when they will assist in selling.

Some of the planned activities of the bake sale will be craft tables held by the various societies and demonstrations of quilting.

It was also announced during the meeting that the members of Society 26 will attend the York County Farm Women picnic to be held on July 27 at the 4-H Center in Bair.

The next meeting of Society 26 will be held at the home of Mrs. Anna Shoop, Etters R1, on July 12 at 12:30 p.m. Each member is to bring a chair for the meeting which will be a Summer patio event.

Berks Co. Society 1

Members of Berks County Farm Women Society 1 met at the home of Mrs. Emma McLean, Douglassville R2, for a nutrition program and salad smorgasbord as part of their June meeting. Each of the 18 members attending brought a different salad.

The group will be taking a trip to Bucks County on August 25.

Eight members attended the 25th anniversary party of Society 2.

The annual family picnic will be on August 21 at Levengood's Grove.

The next meeting will be a hot dog roast for the members and their families on July 13 at the home of Mrs. Agnes Noll, Oley R1, at 7:30 p.m.

Dauphin Co. Society 1

The Dauphin County Society of Farm Women Group 1 held their June meeting at the home of Dolly Pickel. Co-hostess for the evening was Joann Pickel.

The meeting was conducted by Bertha Kennedy, president. One item discussed was the family picnic to be held in July. This picnic will be held at the home of Dorothy Rutt. Every member is to bring a covered dish.

Plans for a bake sale are underway. The Group will be setting up a stand at the Colonial Park Plaza on July 1 starting at 2 p.m. The stand will be located in the outside Sears mall.

The Blood Bank project was another topic of discussion. Enrollment cards for Group 1 members may be obtained from Bertha Kennedy.

The plans for the group's

Joyce Moyer is Lebanon County dairy princess

By JOYCE BUPP
York Co. Reporter

LEBANON, Pa. - The crowning of a new Lebanon County Dairy Princess on June 17 highlighted a week of June Dairy month promotion at the Lebanon Valley Mall.

The sparkling crown and glistening white banner were won by Joyce Moyer, daughter of Mr. and Mrs. Albert Moyer, Lebanon R2. A slender blonde, Joyce is a 17-year-old senior at Cedar Crest High School, with plans to become an ecology teacher.

Joyce is well-known on the Lebanon County dairy show circuit. Her aged Holstein cows have walked away with the Grand Champion trophy for the past four consecutive years at the county fair. A member of the Norsolebco Club and Cedar Crest Dairy 4-H club, Susan owns a total of six registered Holsteins. When not helping with the family herd of 85 cows, she is active in the school chorus, Pep Club, German Club, the Youth Education Association and the Lebanon County Ski Club.

"I really wasn't expecting to win," the new Princess confided. "When they announced the runner-up, I looked at my parents and shook my head to indicate there was no way I'd placed at all."

Other participants in the pageant were Natalie Hostetter, daughter of Mr. and Mrs. Penrose Hostetter, Annville R2; Sheila Light, daughter of Mr. and Mrs. James Light, Lebanon; and Joann Hostetter, daughter of Mr. and Mrs. Harold Hostetter, Annville R2.

Judges for the annual pageant were: Karen Laughman, Thomasville, the past Southeast Dairy Princess Coordinator; Dr. Dorothy Gish, head of the home economics department at Messiah College, Grantham; and Willis Ritchie, Lancaster, of Atlantic Breeders Cooperative. Entertainment during the program, held in the Boscov store auditorium, was a monologue by Joyce Bupp, York County farm wife.

The five contestants praticipated in the week-long mall display, helping to distribute milk samples, recipe booklets, pads and pencils. They also presided over a baby calf petting area, delighting visiting children with souvenirs in the form of small cow-shaped erasers. Pennsylvania State Dairy Princess Peggy Staub, visited with shoppers on Friday, sharing dairy and nutrition information.

"Area 4-H clubs helped set up the Mall educational area, including one on 'Milk and Makings,' which presented background information on milk and the inputs required to produce nature's most nearly perfect food," related Ruth L. Miller, Myerstown R4.

"Another display on the history of dairying detailed the coming of cows into our country," she added. Miss Miller chaired the committee behind the pageant and promotional displays.

Dairy breed associations contributed posters for an exhibit showing the milk and butterfat productions of the various types of milking cows. From Dairy Council there was a "Cool Cow" recipe display.

The equipment side of the story was shown, too, with Swope and Bashore of Lebanon loaning the use of a tractor from the early 1900's and brand new a comparison model of today. Searle Manufacturing brought a milk tank for interested urban visitors.

A coloring contest, using a cow picture printed earlier in an area newspaper, brought in over 100 entries. Winners in the Kindergarten-First Grade category were: Kenneth Myers, boy's class and Denise Kohr, girl's class. Runners-up were Betty Hunt, Tracy Feaser, David Houser, Angie Bollinger and Lisa Hostetter. In the Second and Third Grade division, Heather Stuckey was named winning girl and John Glant, the winning boy. Runners-up were Jay Lzaocik, Jodi Lynn

Thomas takes top dollar in Cowtown Rodeo events

OSTOWN, N.J. - Thomas, Woodstown p money winner Cowtown Rodeo last y night. Thomas won both the bare back ding and the bull ents. Winning does me new to this rn cowboy. He has bare back riding nce this season and ed second in the Thomas's winnings s 12 for a mark of 64 e back and 68 in the ng.

three of the 15 calf qualified in that th Quinn D'Imperio y Hill, N.J. winning 11.5 seconds for

Grant Harris of Cowtown, N.J. moved from last week's third position to first this week in the saddle bronc event, with a mark of 66 for $111.72.

Chris Gerhardt of Sicklerville, N.J. had top time for the second consecutive week for his steer wrestling. With an 8.8 seconds he won $237.16.

Consistant winner, Lorraine Alexander of Newton, N.J., ran the girl's barrel race in 17.58 seconds for $174.44. Lorraine is presently leading for the season and will be a top competitor for the cowtown barrel racing trophy this year.

Over 1700 people were on hand to watch the 97 contestants each try for their share of the $2,979.20 in prize money.

Complete results of last Saturday's rodeo follow:

Bare Back Bronc Riding

1. Stanley Thomas, Woodstown, N.J.; 2. Jay Stover, Washington, Pa.; 3. Jack Meli, St. Cloud, Fla.; 4. Buck Howard, Woodstown, N.J.

Saddle Bronc Riding

1. Grant Harris, Cowtown, N.J.; 2. Willie Ed Walker; 3. Reid Bergstrum, Miles City, Mt.; 4. Dan Aurand, Lewistown, Pa.

Calf Roping

1. Quinn D'Imperio, Cherry Hill, N.J.; 2. Bud Bramwell, Norwalk, Ct.; 3. Andy Jackson, Peach Bottom, Pa.; 4. Ground Split between the remaining 12 calf ropers.

Brahma Bull Riding

1. Stanley Thomas, Woodstown, N.J.; 2. Grant Harris, Cowtown, N.J.; 3. Bob Carrol, Philadelphia, Pa.; 4. J. B. McLamb, North Carolina.

Steer Wrestling

1. Chris Gerhardt, Sicklerville, N.J.; 2. Charles Hayde, Staton Island, N.Y.; 4. Marty Fink, Englewood Cliff, N.J.

Girl's Barrl Race

1. Lorraine Alexander, Newton, N.J.; 2. Par Aurant, Vincentown, N.J.; 3. Judy Clement, Thorofare, N.J.; 4. Kathy Troast, Lebanon, Pa.

Corn contest deadline nears

UNIVERSITY PARK - Corn producers wishing to enter the Five-Acre Corn Club, sponsored by Penn State's Agricultural Extension Service and the Pennsylvania Master Corn Growers Association, should file an official entry form at their County Extension Office by July 1.

Any farmer or farm operator who is 18 years of age or older by August 1, 1977 is eligible to enroll. There is no charge for entering the Corn Club. However, farmers are encoraged to become members of the Pennsylvania Master Corn Growers Association. One entry is allowed per farmer, or farm operator - if more than one farm is involved.

The field must be five acres or more and a complete Penn State soil test must have been taken within the last two years to be eligible for entry. If the corn is grown in contour strips, two or three strips on the same slope may be used as long as the combined acreage is five acres or more.

The entire acreage must be planted to one variety of corn. Irrigated fields cannot be entered.

There are two harvest classes - an ear corn and shelled grain harvest class. In addition, awards will be made for the highest three year average yield in each of the two classes.

YOU'RE IN GREAT SHAPE WITH EGGS!

Good management is key to successful freezing

By JOANNE SPAHR

Editor's Note: It's that time of year again - time to freeze, can, and eat the fresh produce available in large quantities to homemakers. To help those individuals choosing to preserve their fruits, vegetables, and meat, Lancaster County Extension Home Economist Doris Thomas held a series of seminars on freezing and canning earlier this month. Her discussion on freezing will be printed in Lancaster Farming in two installments this week and next week.

LANCASTER, Pa. - "Your success with freezing depends entirely on how you manage the freezer," declared Doris Thomas, Lancaster County Extension home economist, to a group of women from all stations of life who gathered earlier this month to participate in her seminar on home freezing.

Discussing some of the positive and negative aspects of freezing, Mrs. Thomas pointed out that this method of food perservation is easier than canning, and that the products taste better than when they are canned. In fact, foods that are frozen and kept at or below 0 degrees F. taste more like fresh foods than those preserved by any other method.

On the negative side, freezing is more expensive both in the cost of the freezer and its upkeep as well as in the cost of freezing materials. (Those materials can be reused, however).

Also, preparation of frozen foods takes more preplanning than the preparation of canned foods.

"It takes organization to have all the foods ready to serve at the same time," explained the home economist, "and, it also takes longer to prepare foods after they've been frozen. This is due to thawing."

If, after weighing the pros and cons, the homemaker should decide to preserve her foods by freezing, good management is the key.

And, according to Mrs. Thomas, that good management begins with getting top quality produce.

"Your finished product is only as good as what you begin with," she pointed out. Ideally, vegetables and fruits should be frozen within the same day they are picked, and varieties should be carefully chosen, since some varieties of fruits and vegetables freeze better than others.

Purchasing adequate packaging materials is also a key factor to success. Mrs. Thomas stressed that using the plastic containers found in the "deli section" of the supermarket is a definite taboo in freezing.

"If you are going to use plastic materials," she said, "be sure to get the rigid plastic type. We are creatures that don't like to throw things away, but the small containers we get at the deli counter in the food market are just like "one way jars" - they were meant to be used once and thrown away."

According to the home economist, the deli containers are not air tight nor are they sturdy enough for freezing.

"Don't shortchange yourself when you freeze," Mrs. Thomas pointed out, "or you may end up with freezer burn."

Although food doesn't spoil in the freezer, it can lose its color and taste, and just generally become tough and inedible. This is known as freezer burn. Proper packaging can help to alleviate this problem.

According to Mrs. Thomas, the most practical packaging material which can be used for freezing is the plastic bag and cardboard box combination. She noted that boxes and bags can be reused, but she revealed that she doesn't encourage this practice because the bags don't always get as clean as they should when they are washed for reuse.

When selecting plastic bags, the homemaker should be careful to purchase only those that can be used in the freezer.

For odd-sized packages such as meats and poultry, laminated freezer paper or aluminum foil can be used.

...n, for those women ... laminated paper, ...homas made it clear ...afe for use in the ..." should be printed on ...

... home economist ...d those individuals choosing to use aluminum foil.

"For freezing, you should buy the heavy duty aluminum foil, and you should get the extra wide rolls. This is more economical," she said.

According to the home economist, regular-strength aluminum foil is just not heavy duty enough to keep the food from becoming freezer burned.

In answer to a question raised by a member of the audience, Mrs. Thomas did say she approves of the use of freezer film, although she is concerned that it can be punctured.

Summarizing her discourse on freezing materials, Mrs. Thomas said that no product on the market is totally air tight, and that air will dry out foods in any type of container if the food is left in the freezer for too long.

"The worst culprit for drying out foods is the frost-free freezer," she told the group.

To keep this type of freezer frost free, a greater than normal amount of air is circulated throughout. And, while this air circulation keeps the frost from accumulating on the freezer, it also dries out food much more quickly than the circulation in the freezer that is not frost free. Therefore, foods stored in this type of freezer must be very, very well wrapped.

Labeling

Once the packages are wrapped, labeling is another key factor in food storage. For this part of the freezing process, masking tape and a marking pencil are needed.

A description of the food wrapped, and the date frozen should be written on the outside of each package. A note on how the food was prepared should also be placed on the outside.

The next important step is to keep an inventory of the contents in the freezer.

"A freezer inventory is like a checking account, you must keep records of what is going in as well as what is coming out so you don't get caught in a predicament," Mrs. Thomas said.

On that written inventory, the homemaker can record all the items in the freezer, including the size of the package and the date frozen. The packages should then be checked off as they are used.

This inventory should be kept right near the freezer for ease in checking off the items. If this system is kept properly, each homemaker will have an accurate inventory of what is in her freezer at all times and the packages won't be stored too long. The oldest packages should always be used first.

"It takes extra time," admitted Mrs. Thomas, "But, honestly, it's worthwhile."

Yearly turnover

Once the packages are stored, there is another trick to getting the most from the family freezer dollar - turning over the inventory two and a half times per year.

"This is difficult," Mrs. Thomas conceded, "but it is the most economical."

Many housewives, she pointed out, use their freezers only for storing Summer produce. When the supply is depleted, they wait for the next growing season to come around again.

Instead of letting this happen, Mrs. Thomas suggested filling the freezer with beef in November or December, or preparing ahead for the holidays and freezing. A third suggestion was to keep an eye on the specials at the frozen food counter in the grocery store and to stock up when a good bargain is available.

She also noted that as the supply of food in the freezer gets low, and just before the contents are built up again, every freezer owner should defrost the appliance.

For best results, a freezer without an automatic defroster needs complete defrosting at least once a year. Partial defrosting may be needed several times a year, since frost reduces freezer space and raises storage temperature.

Dairy princess chosen tonight

GETTYSBURG, Pa. - Adams County will hold its Tenth Annual Dairy Princess Contest today (June 25, 1977) at the Biglerville High School, North Main Street, Biglerville, at 8 p.m.

The reigning Adams County Dairy Princess Maryann Klinger, daughter of Mr. and Mrs. Charles F. Klinger, New Oxford R2, will crown her successor.

Four Adams County dairy farmers' daughters have entered the contest. They are Lita J. McGough, daughter of Mr. and Mrs. Oscar E. R8; Kathryn Murren, daughter of Mr. and Mrs. Thomas R. Murren, Hanover R4; Nancy Reinhart, daughter of Mr. and Mrs. Kenneth Reinhart, Jr., Gettysburg R6; and Debbie Sprague, daughter of Mr. and Mrs. Roger Sprague, Gettysburg R3.

Retail meat prices and demand expected to rise

WASHINGTON, D.C. - Following stable prices in the first half of this year, consumers will face higher retail meat prices during the second half. Smaller beef supplies, improved consumer demand, and higher marketing costs will more than offset continued large pork and broiler supplies. Third quarter retail prices for Choice beef are expected to average three to four per cent higher than in the Spring quarter primarily due to seasonal strength in demand. Hamburger prices could advance more than those for Choice beef, if slaughter of cows and forage-fed steers and heifers declines this Summer as expected. Further moderate retail price increases for both Choice beef and hamburger are expected this fall, according to USDA.

In advance in pork prices this summer over spring may average eight to 10 per cent with July-September pork supplies down slightly from the Spring quarter. Also, much of the recent advance in live hog prices has not yet been reflected at retail. The seasonal advance in broiler prices may average five per cent. This Fall increased pork production likely will result in some easing of prices for both pork and broilers, as well as temper the increases in beef prices.

Red meat supplies for calendar 1977 will be largely unchanged from the previous year. Beef production is expected to be down slightly with prices for Choice beef at retail up three to four per cent. With prospects for a seven to eight per cent larger pork supply, retail prices may average five per cent or more below year-earlier levels. Through May, retail pork prices avereaged 15 per cent under the year-earlier level. But with only a small increase likely in pork production during the second half of this year, some year-to-year increase in retail pork prices would then be expected.

Underlying these changes in retail meat prices are cyclical changes in livestock production. Total cattle slaughter will be down this year, but with an improving fed cattle market, slaughter of steers and heifers from feedlots may show a small increase. During the Winter quarter, fed marketings from the 23 States were two per cent more than a year ago. Marketings during the Spring and Summer quarters will be near those of a year earlier, and a small increase is likely this Fall. Nonfed slaughter is expected to continue below year-earlier levels during each quarter, barring unusually dry conditions.

With relatively large beef production and increased pork and broiler supplies, any price advance in the fed cattle market much above the late May levels is unlikely. For 1977, the price of Choice steers at Omaha may average in the low $40-range, up from $39 per 100 pounds in 1976. Second half prices may average between $42 and $45.

Cattle feeders responded to price strength in the fed beef market during April by increasing the number of cattle going on feed. Placements in the 7 States were record large for that month. Further increases in placements are anticipated for late Spring and Summer. With more heavy yearling cattle going on feed, larger Spring placements could hold fed marketings this Summer near those of last year. Fed marketings this fall could be up at least 5 per cent. Depending on weather and crop prospects, cow and nonfed steer and heifer slaughter is expected to be below a year ago in each quarter. Although reduced from the very high levels of 1975 and 1976, supplies of nonfed beef are relatively large.

Feeder cattle price movements are expected to closely parallel fed cattle price changes this year. Feeder prices advanced fairly steadily through early May before turning lower. Little price increase is expected during the Summer. With a large corn crop and lower feed costs, feeder steer prices could advance to the mid- to upper-$40-range by yearend. Dry conditions this Summer would force more feeder cattle to market and depress prices. An improved feeder cattle market could halt liquidation of the cow herd during 1978.

The cyclical upturn in pork output will likely continue through this Summer, though the rate of increase will slacken considerably. Hog slaughter is not likely to be up more than five per cent, and Fall slaughter may be below last year's level, despite the larger farrowings planned for March-May.

Producer intentions on March 1 were to increase the number of sows farrowing by 3 per cent during March-May and by five per cent during June-August. The increase indicated for March-May was below that reported in December. Although economic conditions improved, the severe winter and disease problems took their toll and probably contributed to this change in intentions. The breeding herd is larger than last year, but significant year-to-year increases in farrowings will likely be delayed until this Summer.

Pigs born during the Summer and Fall this year will supply most of the slaughter stock for the first six months of 1978. If feed prices continue to moderate, the slowdown in the cycle already evident should support high enough hog prices to encourage continued increases in first half 1978 farrowings. As a result, pork production could be up again in 1978.

Beekeepers tour apiary

RED LION, Pa. - The York County Beekeepers met June 8 at the home of Quay Minnich. Members were given a tour of Minnich's backyard apiary, after which they offered an educational talk to 4-H beekeepers in attendance.

Dr. Clarence Collison, entomologist from Penn State, presented a slide show on nectar and its sources.

Plans were finalized for the summer picnic, scheduled for July 10 at Rocky Ridge Park, beginning at 12:00 p.m. Activities will include a honey show to be judged by Ralph Gamber of Lancaster, and a Honey Foods Contest with Nedra Baublitz judging. Competition will begin at 2:00 p.m.

The September 22 meeting will be held at the 4-H Center, near Bair. Guest speaker will be Vernon Watts, who accompanies his slide program, "The 'Amazing Honey Bee," with a lively, humorous commentary. All interested beekeepers are invited to attend.

Free marketing brochure available

NEW YORK, N. Y. - How the federal-state market news program for farm commodities works is outlined in an updated brochure released recently by the U. S. Department of Agriculture's Agricultural Marketing Service (AMS).

The brochure, aimed at the nation's entire agricultural marketing sector from producer to retailer, gives basic information on where and how market information is collected, the commodities reported, and how the reports are disseminated. It tells users, especially potential users, where they can get detailed information on market news covering individual commodities.

Market news, offered as a public service by USDA since 1915, provides timely information on the supply, demand, prices, and movement of livestock, grain, poultry, eggs, dairy products, fruits, vegetables, cotton, tobacco, and other commodities. The program, operated usually in cooperation with state departments of agriculture, has about 220 market reporters working in 178 year-round and seasonal offices nationwide. A constant flow of information is maintained between offices by a combined teletype and data communications network operated by AMS.

Market reports reach the public through commercial news wire services, radio and television stations, newspapers and trade magazines, and printed reports mailed on request. In recent years, use of taped telephone reports has rapidly expanded in all marketing areas to give callers instant market information when needed.

Free copies of "The Federal-State Market News Service," MB No. 40, are available from the Office of Communication, U. S. Department of Agriculture, Washington, D. C. 20250. Please include zip code.

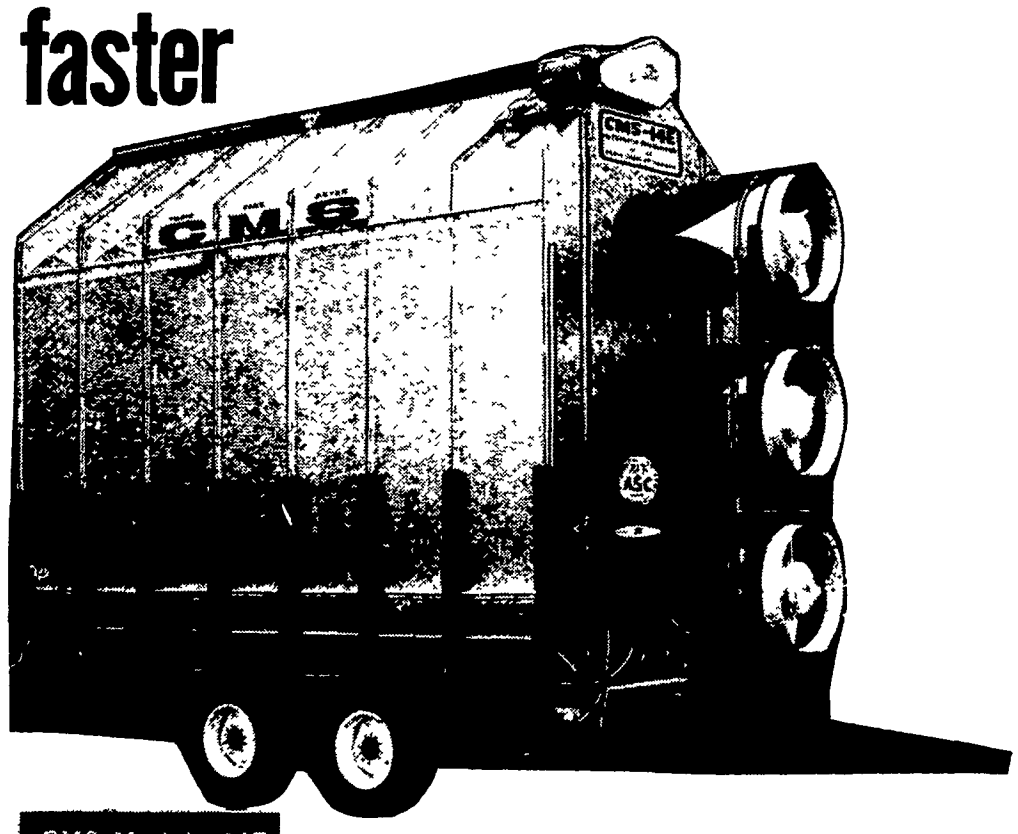
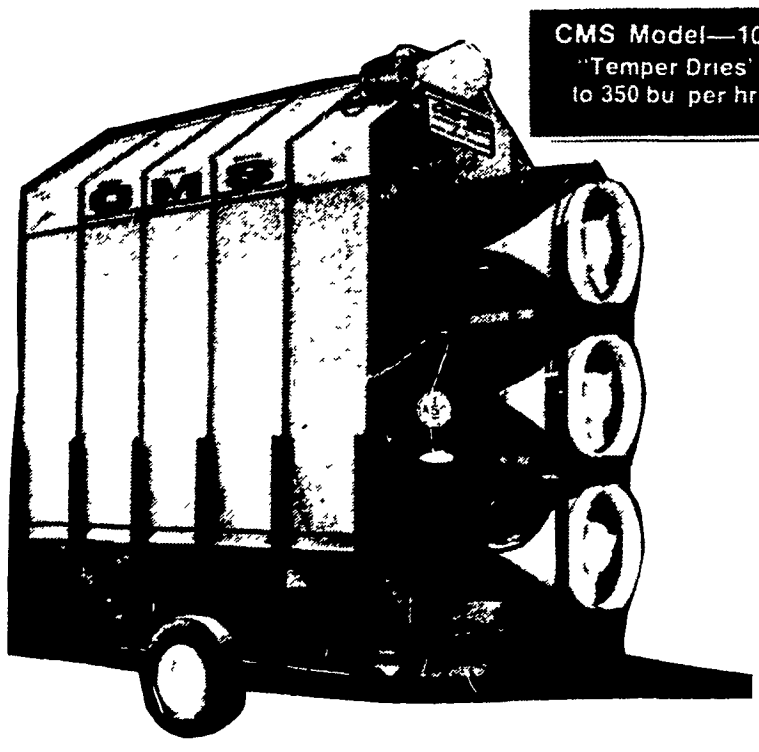
Continuous Multi-Stage Drying conditions your grain faster

FARM FANS

CMS Model—18E
"Temper Dries"
to 600 bu. per hr.



CMS Model—14E
"Temper Dries"
to 480 bu. per hr.



CMS Model—10E
"Temper Dries"
to 350 bu. per hr.

Designed for large farm commercial drying syst

The *Continuous Multi-Stage principle divides the grain columns into upper, middle and lower sections. Each section has an independently controlled fan and heater. The wet grain is fed into the top section, heated and dried for a pre-set time and released to the second section when it is again heated for a controlled period of time. The grain is then released to the third or bottom section for cooling (dry and cool process) or for drying (full heat process). Cycle time settings are determined by the condition of the grain to be dried and how much moisture is to be removed. Four stages may be utilized for "dry and cool" or three stages for "full he tinuous and fully automatic The exclusive Automatic regulates the column grain grain through the controlled also controls wet grain loa discharge. The dryer autom selected drying cycle, and p at all times and under all har The final result is grain that . bright colored kernels of g heated and cooled to produce

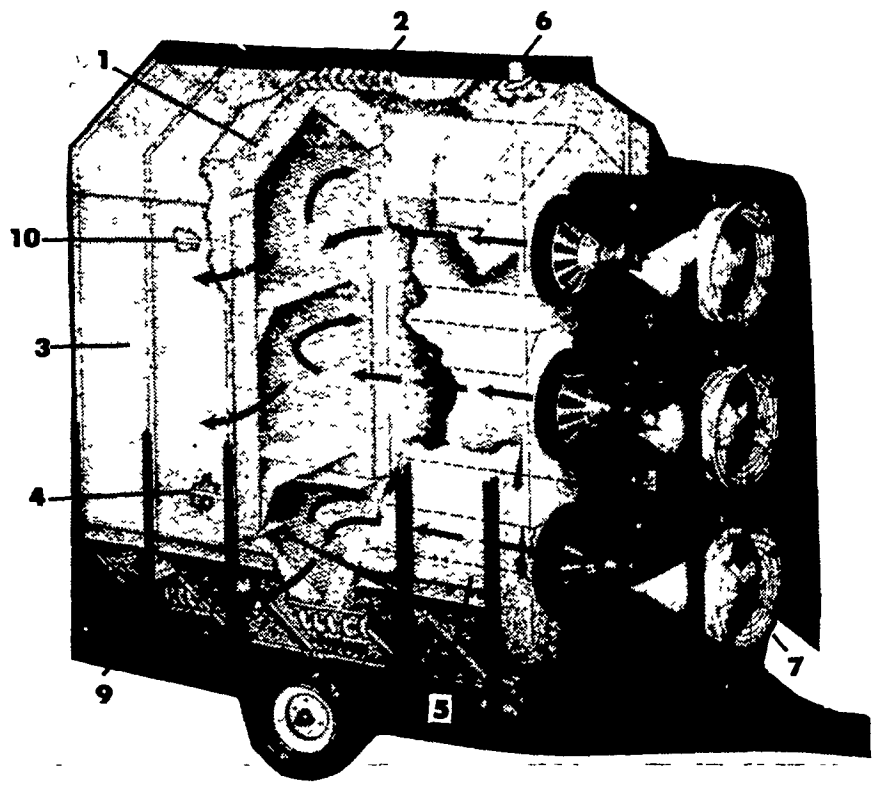
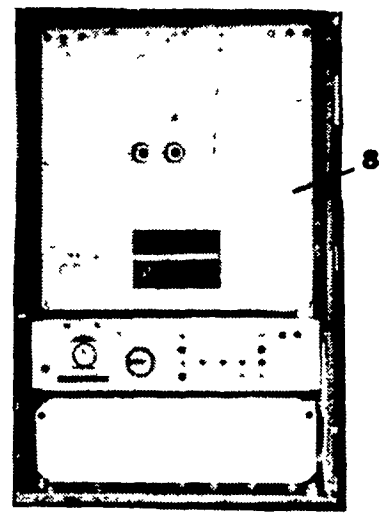
These illustrations show drying variations possible with the Continuous Multi-Stage principle of drying grain.



1. **Wet Grain Hopper** where wet grain is held in reserve and pre-heated before entering drying column.
2. **Top Leveling Auger** is automatically controlled for filling dryer.
3. **Grain Column Panels** are rigid, sturdy and louvered. Hold all types of grain in 12" columns Specially designed to provide effective air flow pattern—grain dropping down wipes the inside walls and keeps openings clean.
4. **Moisture Check Control** overrides cycle timer to hold grain for further drying if grain temperature is below control setting—no wet batches are allowed to pass through dryer
5. **Gate Assembly** located at bottom of grain column on each side of dryer, automatically indexes grain movement down through the columns Prevents grain channeling since bottom "drops out"
6. **Flow Control Switch** automatically controls filling of dryer.
7. **Fan/Heater Units** provide large volume of heated air for drying



8. **Automatic System Control** programs the dryer to automatically follow the selected drying cycle
9. **Discharge Auger** is automatically controlled to carry out conditioned grain
10. **Hi Limit Thermostat** shuts down unit automatically if grain temperature exceeds thermostat setting

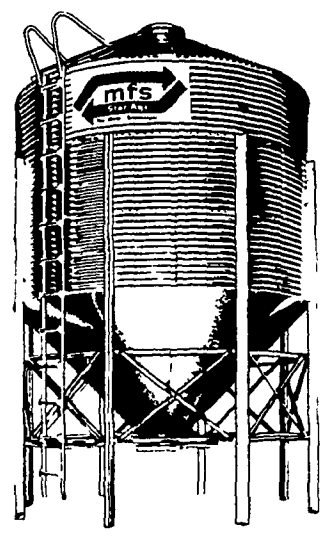
mfs

mfs HOPPER BINS

AVAILABLE IN FOUR DIAMETERS:
15'-12'-9'-6'

CAPACITIES FROM 80.9 TO 2.9 TONS

- All galvanized steel construction for rugged, long lasting service
- Specially formed hopper and roof edges for weather-tight seams and added strength
- All seams double caulked
- Large range of capacities-3 to 80 tons (118 to 3 253 bushels)
- Weather-tight Ground controlled roof hatch
- Roof ladder standard on all bins
- Heavy steel body panels pre-punched and color coded for easy assembly
- Steel bolts have the unique MFS sealing washers for solid weather and air tight fastening
- Galvanized legs are of heavy structural steel angle for strength and stability
- Full clean-out boot for 4" and 6 augers-eliminates most bridging and sticking Has flow control valve and provides auger adjustment from 5° below to 60° above horizontal
- The 15' diameter bin is especially designed for wet corn holding and is supplied with the popular MFS grain bin roof



SEVERAL MODELS NOW IN STOCK

The 12' Diameter Bin is available as a portable Bin with frame and wheels to be used as a wet holding bin for portable dryers

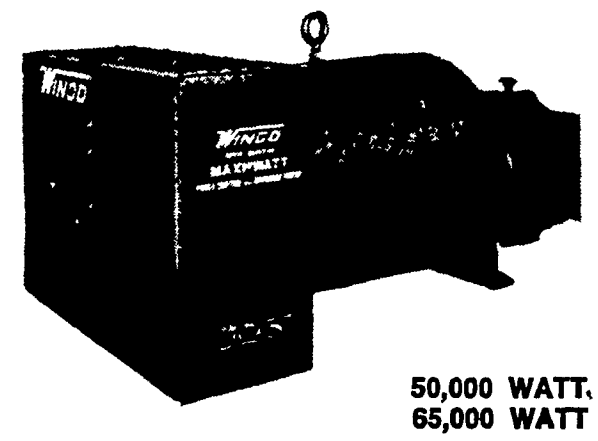
WINCO® IND'L PTO GENERATORS THE WORLD OVER

New!!! for 1977

30, 50 and 65 K.W. P.T.O. Generators



50,000 WATT
65,000 WATT

THE OCTOPUS

WINCO's exclusive new power plug-connect or disconnect the standby load with one convenient plug. This plug saves on installation costs. It is rugged and heavy duty for years of long service and is the ultimate in convenience.

PTO GEAR DRIVE MECHANISM

Precision ground helical gears eliminate potential service problems of shorter lived chain link drive.

FOR SALE — TOURIST ATTRACTION

Are you interested in promoting a new tourist attraction in this area? If you are, take time to inspect this listing. It consists of a general store, funeral parlor, furniture store, farm house with summer kitchen and stable (all circa late 1800). The buildings are situate on approx. 2 acres of land located on the corner of a busy intersection. This property is located near Rt. 81, exit and has easy access to the Hershey-Lebanon-Harrisburg tourist trade and the Penn National Race Track.

The commercial use of this property is unlimited, restricted only by one's vision or imagination. You can create your own frontier town, a Bicentennial Shopping Center. An arts & craft center w/pottery mill, blacksmith shop, etc., or you can create an antique center. The farm house can be converted to an inn. There is ample land available nearby to enlarge the attraction. The commercial buildings on property, excluding farm house, have almost 7,000 sq. ft. of floor space. Some of this space can be converted into apartments or other prosperous ventures.

There's more to gain with "precision feeding" of baby pigs.

Faster gains on less feed can be as easy as 1-2-3 with our "Precision Baby Pig Starter Program" from Master Mix Research.

Primer 1 supplements sow's milk with high energy levels for improved gains and more efficient feed conversion. Reduces scours, too.

Primer 2 from weaning to 40 lbs. body weight, contains high energy levels and amino acids the baby pig can quickly utilize for fast extra gains.

Pig-Gro 3 is formulated for all pigs up to 60 lbs. Based on an amino-acid-to-high-energy concept that maximizes quick gains with minimum feed costs.

Come in. Let us show you why there's more to gain with Precision Baby Pig Starter feeds.

Lebanon COUNTY DHIA MONTHLY REPORT

MAY 1977

Harvey Bomgardner's "Irene" pumped out 25,748 pounds of milk during her recently completed lactation, which put her into first place in last month's DHIA standings. She was more than 3000 pounds ahead of the runner-up milk production champion – "Mandy," owned by Daniel B. Shirk. Both cows began thier lactations at the age of four years and four months. In the butterfat race, Sonnen Acres' "Spice" edged Abram Lefever's "Benita" by a pound: 826 to 825. Close behind were Dan Shirk's "Linda" with 821 pounds and Melvin Horst's Number 19 which was credited with 819 pounds of butterfat. Following is a list of all lactations completed on Lebanon County DHIA last month which exceeded 600 pounds of butterfat.

Goats gaining ground

SCHUYLKILL HAVEN - The dairy goat is making a name for herself in Pennsylvania. To date, there are several hundred herds in the state. More than 200 goat herds are registered with the American Dairy Association. Pure Goat Products, a commercial dairy in Boyerstown, handles goat products exclusively. Nine Pennsylvania goat herds are licensed by the state to sell raw milk. Goats' milk is white and easier to digest than that of cows' milk. This is especially important for infants, elderly people, and people with weak stomachs.

Goats' milk is also highly nutritious. It contains many essential nutrients needed by the body. In fact to get the nutrients supplied by one quart of goats' milk one would have to eat the following amounts of food: one pound of lean beef steak, one pound of chicken, one and two-thirds pounds of peas, eight eggs, seven oranges, three and one-fifth pounds of codfish, five pounds of spinach, three and one-half pounds of oysters, six tomatoes and six bananas.

During the Summer months, hundreds of goats will be shown at fairs and goat shows throughout the state. At last year's Spotlight Sale, sponsored by the American Dairy Goat Association, the top selling goat was a seven month old Toggenburg doe. It was bought by Steve Ferguson of Pennsylvania for a record of $5,660.

The goat - a calf-sized milk producer - provides milk to millions aroung the world.

Schuylkill County has an active club for goat enthusiasts called the Blue Mountain Dairy Goat Association. Anyone interested in dairy goats or any youth interested in the 4-H program can get more information by contacting Kathy Buggy or Al Shoner at the Schuylkill County Extension Service, P.O. Box 404, Schuylkill Haven, Pa. 17972; telephone - 717-385-3431.

Dogs help the deaf

HARRISBURG - Pennsylvania Agriculture Secretary Kent Shelhamer, whose department administers the state Dog Law, today issued a call for public attention to a "hearing dog" program for the deaf which was brought to Pennsylvania in early June by the Women's SPCA of Pennsylvania in cooperation with the American Humane Association.

Under the program, Shelhamer said, dogs are trained to respond to such sounds as the ringing or buzz of an alarm clock, the cry of a baby, smoke alarm signals, door bells and knocks, and even the stealthy sounds made by prowlers. When altered, the dogs will make physical contact with their masters and lead them to the source of the sounds.

Shelhamer said the Women's S.P.C.A. of Pennsylvania "should be given a great amount of credit" for working with the American Humane Association in making the first hearing dog placement in Pennsylvania with 19-year-old Garwood F. Kaufman of Huntingdon Valley.

Shelhamer also noted that the dog, trained in Denver by the Humane Association, is a black mongrel which been abused by its owner whose life was saved by Colorado Huma Association.

Eggs praised

LANCASTER-The Pennsylvania Egg Marketing Association hosted guest speaker Christine Bushway, American Egg Board coordinator for NEMA.

Ms. Bushway highlighted the Summer egg program available through American Egg Board, briefly commenting on the top 20 markets in the U.S. and selling of eggs by the pound. She topped off the evening with some very positive comments on the broad television coverage given the "Incredible Edible Egg" especially on the Evening News Programs.

Gadget on market to ripen fruit

LYNN HERSHEY
are Extension Service
WARK, Del. - Do you
ny room left on your
n counter? Are you
with your newest toys
maker, hot dogger,
broiler, food
sor, fry baby)? Well, shove everything aside and make room for a brand new plaything. It's called a fruit ripener. Yes indeed, now there is a handy little item you buy just for ripening fruit. No well-dressed home should be without one.

Go ahead and laugh. I did, because somehow a fruit ripener represents the ultimate in civilized nonsense. We pick fruit rock-hard and green, then buy something to make it edible. It's sort of like melting ice to get water to make ice cubes.

But hang on, maybe the inventor isn't so crazy after all. When supermarkets offer tomatoes resembling green golf balls, and peaches you can't slice, perhaps it's time for the best fed nation in the world to market fruit ripeners. In fact, the F.R. could be displayed in supermarkets right next to the underripe produce. I'm surprised they haven't thought of that already.

In case you are seriously interested in this latest merchandising marvel, look in larger deparment stores and specialty shops. The F.R. is about 15 inches high and 15 inches in diameter, with a clear acrylic lid appropriately pear shaped. Vent holes permit air circulation but concentrate the ethylene gas naturally given off by the fruit to produce ripening.

Marguerite Krackhardt, Delaware Extension food and nutrition specialist, says a F.R. is O.K. for ripening green pears, apples, bananas, mangoes, avocados, tomatoes, plums, nectarines, apricots, peaches, some citrus fruits, and melons (except watermelons). She does not recommend it for use with fruits gown locally or in your own garden, since these are normally picked at the peak of ripeness.

Because the ripener works quickly, it requires careful watching lest the fruit becomes overripe. For example, green bananas placed inside the F.R. in the morning will be ready to eat by earling evening. If your forget and leave them there all night, you can conveniently throw them out next day.

The F.R. is supposed to work better than the old-fashioned brown paper bag. But I'll stick to the old way, thank you. Maybe you think it's stubbornness. Or thrift. But it's not. It's just the principle of the thing.

And in case you're wondering, I don't own a crepe maker either - or a hot dogger, a food processor, a fry baby, a bacon broiler, etc., etc., etc.

Ag trade called peace factor

TOKYO, Japan - Secretary of Agriculture Bob Bergland said here recently that "a continued and growing friendship between the people of the United States and the people of Japan" remains "a key factor" in the maintenance of world peace and that "trade is the cornerstone of our mutual friendship and cooperation."

To illustrate the importance of the Japanese market to the American farmer, Bergland noted that the United States trade with Japan is "double that of any single western European country" and "equal to more than a third of our total trade with all European nations, including the Soviet Union."

The Secretary also emphasized that the domestic agricultural policies of the United States "are geared toward expanding foreign trade."

"We have proposed a system of reserves and commodity loans which provide economic protection for farmers, supply protection for foreign and domestic buyers and support prices which which keep American grain competitive in world markets," the secretary said.

"We firmly believe," Bergland continued, "that the importing and exporting nations of the world must agree to establish grain reserves as an emergency supply and to dampen the wide price swings which trouble both consuming and producing countries."

After two days of meeting with Japanese and American agriculture, trade and government leaders, Bergland toured agricultural areas in rural Japan before departing for Hong Kong, the second stop in his six-nation tour.

Aspiring herdswoman chosen dairy princess

By JOYCE BUPP
York Co. Reporter

NEWVILLE, Pa. - Karen Smith, a 17-year-old senior at Big Springs High School, has been crowned the 1977 Cumberland County Dairy Princess. She was chosen from a field of five competitors during the June 15 pageant at Big Springs High School, Newville.

The daughter of Mr. and Mrs. Robert Smith, Shippensburg R1, Karen plans to become a herdswoman after high school graduation. Her dairying background includes several years in 4-H work; she owns eight registered Holsteins. Karen is a teen leader and also carries cooking, sewing, crafts, and flower projects as well.

Active in school activities, she is a member of the concert band, twirls a flag on the marching band front and plays on the volleyball team. Sunday mornings find Karen teaching a first grade Sunday School class.

Pitching in with the family barn chores are part of the new dairy princess' schedule. She helps milk the 50-Holstein herd, feeds calves and gets behind the wheel of the tractor when needed in the fields.

Her presentation to the audience during the princess competition included posters and background information on milk. During one-stage judging, the new princess readily shared her favorite dairy recipe from memory.

With a busy Summer already scheduled, Karen is looking forward to her year of milk promotion appearances.

"I'm especially eager for the chance to take live cows into the schools," Karen said.

First runner-up is Janice Davidson, who is a senior at Shippensburg High School. Janice, age 17, is the daughter of Mr. and Mrs. Lee Davidson, Shippensburg R2. Janice and her sister take turns rising at 5:00 a.m. to hlep milk the family's 60 Holsteins. A 4-H member for seven years, she enjoys taking her project animals to area shows, and serves as a teen leader.

Janice has won two degrees in the Future Homemakers of America and is a member of the Pennsylvania Junior Holstein Association. Her future plans include a secretarial career.

Sheree Mains, daugher of Mr. and Mrs. Richard Mains, Newville R1, was named second runner-up. A 1977 graduate of Big Springs High School, Sheree will attend Shippensburg State College in September, majoring in elementary education. She is currently employed by her father to help milk the herd of 150 cows.

Peggy Staub, 1976 Cumberland County pageant winner, is currently serving the dairy industry as Pennsylvania dairy princess. She spoke during the program, reviewing her year's activities, and offering thanks to all who had helped her. Peggy was presented with a legislative citation, recognizing her achievements, which was sponsored and presented by Representative Fred Noye.

Musical entertainment for the evening was provided by vocalist Paul Roth.

Pageant judges were Mrs. David Roth, Loysville, dairy farm wife and retired guidance counselor; David Yoder, Lancaster, general manager of Atlantic Breeders Cooperative; and Mrs. Leroy Bupp, Seven Valleys, dairy farm wife.

Peggy Staub, 1976 Cumberland County dairy princess and reigning Pennsylvania dairy princess, crow her successor, Karen Smith.

CHESTER COUNTY DHIA MONTHLY REPORT

MAY 1977

Jacob Stoltzfus had two of his 63 Holsteins complete herds with over 1000 pounds of butterfat last month, to top the list of dairymen on test in Chester County. His herd also topped the butterfat averages for the month with 2.35 pounds of butterfat per cow per day. His high individual record was established by "Mistress," a 6-year old, which produced 20,242 pounds of milk with a 5.0 per cent average test for 1009 pounds of butterfat. His other cow to go over 1000 pounds of butterfat last month was "Jill," with credits of 22,747 for milk and 1004 for butterfat. The high cow in milk production was Henry King's "Rachel," a 6-year old Holstein which pumped out 23,223 pounds of milk with a 3.5 per cent test for 815 pounds of butterfat.

U.S. called dependable source

WASHINGTON, D.C. -- "The performance of the United States over the years has demonstrated that it is the world's most dependable supplier of farm commodities in the quantities, kinds, and grades desired. We feel that responsibility. We recognize that any failure on our part -- or any fear on the part of our customers -- is the more serious for the very many reasons that we are the standard of dependability in the world, said USDA Secretary Bob Bergland recently while touring Japan.

"President Carter, and others in his administration including his secretary of agriculture, have assured our customer nations repeatedly that there will be no embargo on soybeans despite the reduced carryover this year. We have assured our customers that we would never consider an embargo on any of our commodities our customers depend on from us -- barring some unforeseen action by an unfriendly nation waging actual economic warfare. At the same time, as a dependable supplier, we must also have dependable customers.

"Being a dependable supplier does of course require more than good intentions. It requires the capacity to produce -- and an agricultural system that operates efficiently. In the United States, we recognize that we have been unusually blessed with the natural resources that include large contiguous areas well watered, with rich soil, within the temperate zone. But it is just as true that we have in the United States a tremendous production and marketing system -- based on able and well educated farmers, good transportation systems, and a hundred years of building institutions for research, marketing, price reporting, grading, handling, quality control, and other services.

"American agriculture is built primarily on a system of family farmers who make their own production decisions based on their resources, abilities, and desires. Our marketing system is also diversified, privately operated, and highly competitive -- a system that has made it possible for the United States to be flexible and responsive in meeting export demand.

"In recent years, the United States has provided around half of all the grain moving in world trade. This grain has been provided in a wide variety of kinds, grades, moisture, and protein content -- whatever the customer desired. Such problems as have occurred in past years with quality -- and with failure to deliver at specification -- have represented a small percentage of our export trade. On the whole, American agriculture is the most productive in the history of the world since Jacob sent his sons into Egypt to look for corn. It has provided for the world -- from an abundance of high quality production in a time when no other supplying country could have come close to doing the job."

Brucellosis tackled

NEW YORK,N.Y. - The need for additional research and greater flexibility on certain technical aspects of brucellosis eradication was discussed at a recent meeting in Washington, the U.S. Department of Agriculture announced.

Discussion centered upon possible improvements or innovations in specific areas of technology such as: diagnostic procedures, vaccination methods and procedures; areas of research needs; handling of infected birds; indemnity procedures; and surveillance techniques.

The need for better communication with producers about how burcellosis is spread and the steps involved in eradication was also noted.

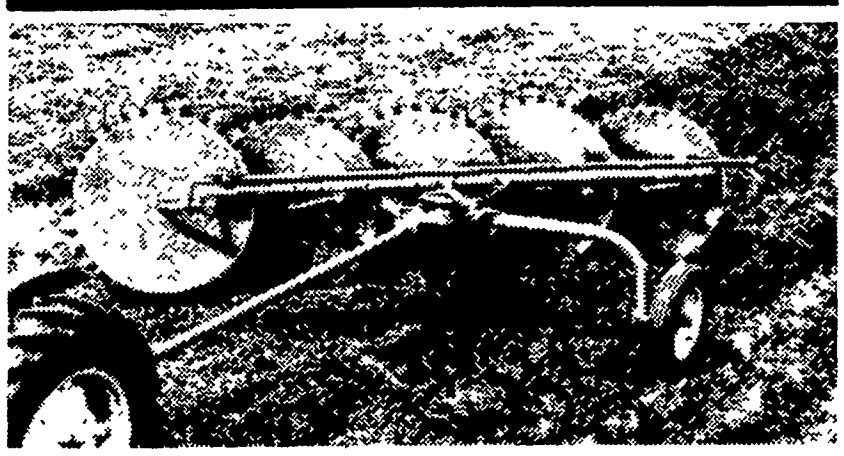
New Idea's Wheel Rake

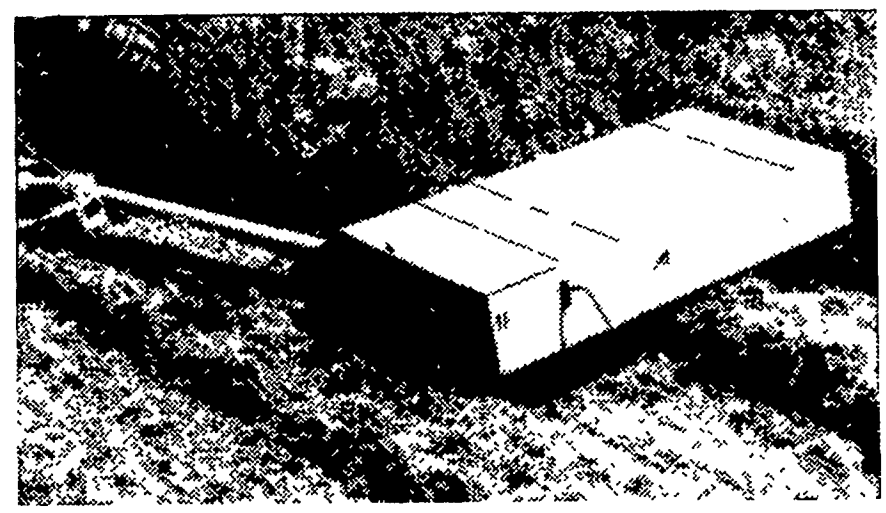


The quick 'n clean hay machine

Use the Avco New Idea Speed Wheel Rake over any terrain—smooth, uneven, hilly or contoured—and it gets the hay other rakes miss . . . and gets it fast Raking wheels feature independent spring counter-balancing so teeth follow ground contour. Gentle action builds big fluffy windrows without shattering valuable leaves. You can use the basic 5-wheel rake (8'4" width) for the first cutting, then add 6th or 7th wheel for later cuttings. Stop in and see this low cost rake for yourself!

Costs hundreds of dollars less...unsurpassed in heavy, down, tangled hay...

Cut/ditioner

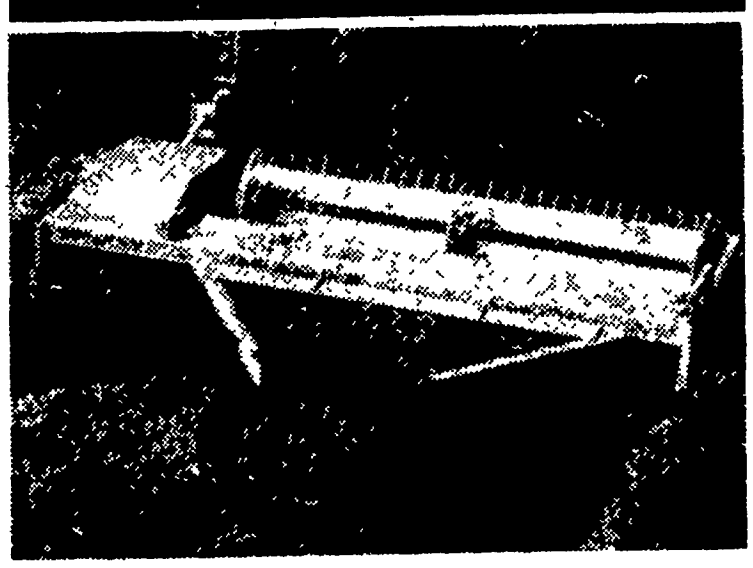


It's a simple machine, with fewer moving parts. Cuts 7-feet wide. Conditions. Makes windrow or swath. When you can't cut hay with a sickle bar, Cut/dition it! Non-stop. Plug-free.

AVCO NEW IDEA FARM EQUIPMENT

We make your job a little easier.

New Idea's Mow/ditioner



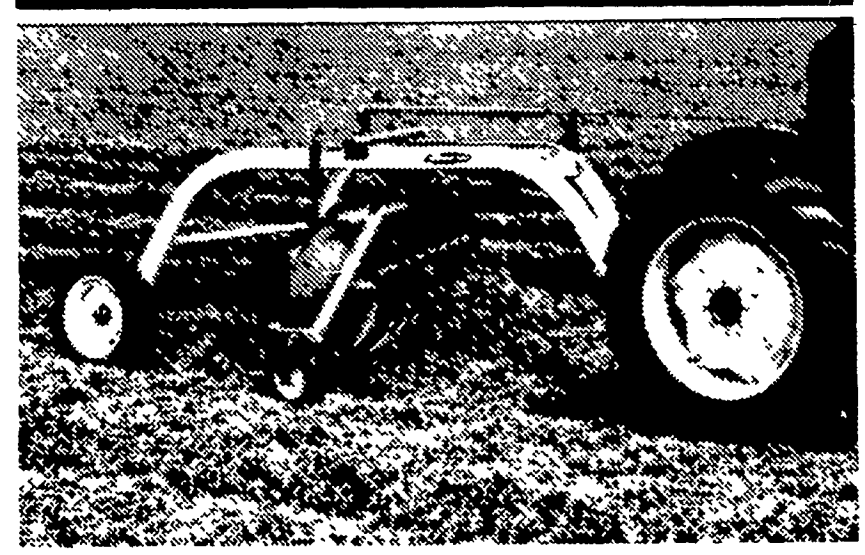
Cows can tell the difference

That's what farmers tell us. Mow and condition part of your hay with a New Idea Mow/ditioner and the other part with any other mower-conditioner—and your cows will tend to pick the Mow/ditioner hay. Why? Because cows don't like "match-stick" broken stems. They do like soft hay. The kind a New Idea Mow/ditioner makes.

This rugged 9-foot machine is the best all-around machine you can buy for making quality hay. It features a header so well balanced . . . and flotation so well controlled . . . that you avoid excessive knife and guard damage, scalping and poor cutting. Swing-out shields adjust to many positions for swaths or windrows of any desired width.

Come on in and check out New Idea's Mow/ditioner. You'll see the difference in your hay—and chances are, your cows will, too.

New Idea's Belt Rake



For turning over a new leaf...gently

Steady, positive, clean raking without noisy clatter! This is what you get with the Avco New Idea belt drive rake. Exceptionally clean raking and minimum leaf shattering are the result of the constant ratio between reel speed and forward travel. The smooth, lifting rolling action of the tooth bars builds uniform fluffy windrows . . . windrow fluffiness can be varied by tilting the basket. Long lasting optional rubber Flex-joint teeth available. And, for raking over rough terrain, there's an optional guage wheel that fits on the frame end.

Ag students honored at University of Delaware

WARK, Del. -- A er of top-achieving nts in the College of cultural Sciences ed recognition during t University of ware Honors Day ises. The event, which d annually, honors nts for their mplishments in rship and leadership, ll as for contributions ir respective colleges the entire campus unity.

demic awards are on a cumulative grade ndex of 3.00 or higher. graduates who do not e these indexes but monstrate leadership raits of outstanding ship also are ized.

of the agricultural nts receiving University-level awards was Suzanne Mason of Nottingham, Pa. An entomology - plant pathology major, Ms. Mason joins the top student from each of the University's eight undergraduate academic units on a Panel of Distinguished Scholars.

The Alpha Zeta award for the highest ranking sophomore student enrolled in the College of Agricultural Sciences went to plant science major Eugene F. Raphel, Jr., of Monkton, Md.

The Honors Day Book Award in the College went to another plant science major, W. Gary Smith of Newark. This award goes to one sophomore or junior in each college or division who has shown a sincere desire for knowledge and has been active in extracurricular activities directed toward the individual betterment of fellow students.

A fourth University-level award went to Francis J. Tarrant, Jr., of East Brunswick, N.J. Tarrant, an agricultural economics major, received the Wall Street Journal Award, which is granted each year to one outstanding senior in the College of Business and Economics and one in the College of Agricultural Sciences.

College-level awards included scholarship prizes to a number of students. This year's $650 Ralston-Purina award recipient was Joseph J. Vigilante, Jr., of Morris Plains, N.J. Southern States scholarships went to senior Mark S. Kosco, Marydel; junior Joseph R. Gibson, Wyoming; sophomore Patricia E. Williams, Hockessin; and freshman Ronnie M. Cain, Greenwood.

Among other scholarships, that from the Delaware Federation of Garden Clubs went to Karen L. Ely, Elkton, Md.; the Delaware State Grange, to David A. Hankins, Jr., Milford; and the Delaware-Maryland Plant Food Association, to Elizabeth L. Bundick, Newark.

Three new scholarships were also awarded this year. The George M. Worrilow Scholarship in Agricultural Sciences (sponsored by the Agricultural Alumni Association) went to two students: Jeremy L. Sedgwick of Newark and Bernard Sammons of Wilmington. The George M. Worrilow Alpha Zeta Scholarship (an annual scholarship based on funds raised by members of the Delaware Chapter of Alpha Zeta, a national agricultural honor fraternity) went to Constance Swierczewski of Millington, Md. And the Carvel Agricultural Scholarship for Delaware residents who want to enter the College went to Donna R. Studley of Laurel.

Five Degree of Distinction nominees were recognized during the ceremony: Francis J. Tarrant, Jr., East Brunswick, N.J. (agricultural economics); Gregg R. Hesseltine, Newark (animal science); Gary L. Benzon, Newark (entomology); John T. Greenplate, Newark (entomology) and Anastasia E. McHugh, Newark (plant science). Applicants for this degree must attain a general scholastic index of not less than 3.00 and an index of not less than 3.50 in their major. They must also prepare a satisfactory thesis on individual research.

A number of nominations to national honor societies were also announced. Mortar Board, an honorary society for seniors which recognizes outstanding scholarship, leadership and service, nominated W. Gary Smith of Newark. The plant science major was also nominated for membership in Omicron Delta Kappa.

Phi Kappa Phi, a national honor society electing students from all colleges of the University, nominated Mary R. Babcock, Wilmington; John M. Gliatto, Woodbury, N.J.; Marianne M. Hardesty, Newark; Patricia G. Hee, Millville, N.J.; Gary L. Melchior, Claymont; Bonnie M. R. Stombaugh, Newark; Judith A. Teklinski, Evandergrift, Pa.; and Dana K. Williamson, Wilmington.

The following agricultural sciences students are to be recognized in the 1976-77 edition of WHO'S WHO IN AMERICAN UNIVERSITIES AND COLLEGES: Henry C. Conner, New Castle; Martin N. Culik, Newark; Brenda J. Fry, Lancaster, Pa.; Susan D. Hance, Prince Frederick, Md.,' Gregg R. Hesseltine, Newark; Florence J. Huggins, Berlin, N.J.; Cindy G. Kilmer, Newark; Charles F. Mancino, Dover; Gerald J. Pawlikowski, Wilmington; W. Gary Smith, Newark; and Constance Swierczewski, Millington, Md.

Culik, Hance, Hesseltine, Smith and Swierczewski were all given College Council Student recognition for having demonstrated an outstanding amount of dedication, interest and enthusiasm in their college.

Nominations to the Panel of College of Agricultural Sciences' Scholars included seniors Susan F. Corsaro, Newark, and John T. Greenplate, Newark; junior Mary S. Eyring, Baltimore, Md.; sophomore Kurt Linneman, Phoenixville, Pa.; and freshmen Randall W. Blackburn, Newark; Ronnie M. Cain, Greenwood; Donald F. Kenney, Kennett Square, Pa.; Ruth A. Murray, Wilmington; and Nancy J. Stilley, Cherry Hill, N.J.

The Panel of Department Scholars - students recognized for holding the highest scholastic index - inclided Francis J. Tarrant, Jr., East Brunswick, N.J. (department of agricultural and food economics); James L. Allen, Jr., Wilmington (department of agircultural engineering); John M. Gliatto, Woodbury, N.J. (department of animal science and agricultural biochemistry); Gary L. Benzon, Newark (department of entomology and applied ecology); and Joseph G. Sullivan, Wilmington (department of plant science).

During the same ceremony, recognition was also given the following faculty members for outstanding teaching in the College of Agricultural Sciences: Ernest N. Scarborough, department of agricultural engineering; Dr. Donald F. Crossan, department of plant science; and Dr. Richard E. Fowler, department of animal science and agricultural biochemistry.

Consider the honeybee when spraying pesticides

DOVER, Del. - While pesticides are excellent for the destruction of pest parasites and predators, they can also do considerable damage to the helpful honeybee. This insect, known for the valuable honey it produces, is even more important as a pollinator of fruit trees, forage crops, vegetables, and other plants, according to Frank Boys, University of Delaware Extension entomologist. When it's time to spray for ornamental, forest, field crop, fruit, and vegetable insects, Boys urges protection of the honeybee at the same time.

This Extension specialist says that bees are most often found in fields containing vetch, alfalfa, clover and other plants in bloom. They're also attracted to dandelions, wild flowers, ornamentals and trees in hedgerows.

When buying pesticides, care should be taken to select the product which is least harmful to bees and other pollinating insects. But when treating mixed stands, timing and the method of application are also important. For example, carbaryl is very toxic to honeybees if sprayed on mixed alfalfa forage with other plants in bloom. But it will not harm the bees when it's used as a stubble spray after haying.

When using insecticides such as an organophosphate, the hazard can also be reduced by proper timing of the treatment.

According to Boys, highly-toxic materials should be applied only during periods when bees aren't visiting the plants - preferably during the night or in the early morning. In addition, spraying should be avoided on windy days when the insecticide may drift into bee yards or onto other crops.

Spraying is generally the most harmful application method for bees, regardless of whether it is done from the ground or the air. However, dusts are less effective against the pests and often drift considerable distances. But granules present the least danger to bees and other beneficial insects.

Although pest control often requires immediate action to protect a particular crop, Boys recommends giving local beekeepers a 48-hour notice before applying pesticides.

Inspection chief named

WASHINGTON, D. C. - President Carter recently nominated L. E. Bartelt, Sacramento, Calif., to be administrator of the Federal Grain Inspection Service (FGIS), U. S. Department of Agriculture. The nomination is subject to confirmation by the U. S. Senate.

Dr. Bartelt, 55, has worked his way up through California's Department of Food and Agriculture, holding several administrative positions since 1945. From 1969 to 1972 he was an assistant director of the department and chief of its Division of Inspection Services, which included federal-state grain inspection, weights and measures enforcement, federal-state shipping point inspection, egg inspection, fruit and vegetable standardization, agricultural chemical control, and other regulatory activities. Since 1972 he has been assistant director and chief of the state Division of Animal Industry, supervising animal, meat and dairy regulations. He also has been the state veterinarian.

Pesticide applicators need certification by October

HARRISBURG - "Commercial applicators of restricted use pesticides will need "certification" by October, 1977, according to Donald Lott and Dave Thompson, regional pesticide inspectors from the Pennsylvania Department of Agriculture.

Under standards established in the Pennsylvania Pesticide Control Act, anyone who is in the business of commercially applying restricted use pesticides will have to become certified as a Commercial Applicator in order to continue buying and applying restricted use pesticides. This includes people whose business is direct application (exterminators, custom crop applicators and landscapers) and people whose business requires application of restricted use pesticides to protect and maintain a marketable product or service (golf courses, feed and flour mills, food processors, private schools,etc.)

Restricted use pesticides will be those which, on a national basis, have the greatest effect on the environment and are generally highly toxic. The Federal government through the Environmental Protection Agency (EPA) is reviewing all currently manufactured pesticides and classifying each one according to it's enviornmental impact and relative toxicity. The safer compounds not being classified for restricted use will be classified as general use pesticides and will be available to the general public. Restricted use pesticides will only be available to certified applicators.

An individual can be certified as a commercial applicator in numerous categories, depending on the kind of work in which he is engaged. For instance, an individual may be certified as a "Forest Pest Control Applicator" or a "Right-of-Way Pest Control Applicator", or those concerned about the protection of finished products from pests would be certified in the broad category entitled "Inudstrial, Institutional, Structural and Health Related Pest Control."

To become certified it will be necessary to prove competency through examinations. All commercial applicators are required to pass (1) a basic "Core" exam which covers general broad-based information on pesticide application and safety, and (2) one or more category exams, depending on the applicator's specialized needs. These exams are proctored by the Department of Agriculture personnel. Test sessions are currently being held throughout the state. The local County Extension Office and the Regional Office of the Department of Agriculture can provide more detailed information regarding exam sessions, dates and locations.

A series of training manuals have been developed by the Pennsylvania State University to help individuals prepare for these tests. These are available from Penn State for a minimal fee. Since use of reference material is permitted in the exam, any of these training materials may be used when taking the exams.

Following certification, a commercial pesticide applicator will be required to pay an annual $30.00 license fee and show evidence of financial responsibility through either a surety bond, liability insurance policy or self insurance in the amount of $100,000 for property damage and public liability, each separately.

Anyone wishing additional information concerning commercial applicator certification should contact Lott or Thompson at the Pennsylvania Department of Agriculture, Region VI Office, Summerdale, or contact the county extension office.

Picnic slated

RED LION, Pa. - Red Lion Young Farmers will sponsor their annual picnic tomorrow June 26, at the Ellis Crowl farm, Airville.

A covered dish and chicken barbecue dinner will begin at 12:30. There will be games for adults and children, tours of the Crowl's new dairy facilities, and a short business meeting and election of new officers.

All chapter members and their families are invited to attend.

Pageant set

FLEMINGTON, N. J. - A baked chicken dinner will precede the Hunterdon County Dairy Princess Contest again this year, says Mrs. Marie Schwab, chairman for the event. A specialty at Stanton Grange, baked chicken was selected for the menu because of its popularity at this and other events in the past. The dinner is set for 7 p.m. on Tuesday, June 28.

The new dairy princess will be crowned by Miss Debbie Case, Ringoes, the present reigning princess. A runner-up will also be named. Cash awards will be made to the winner and runner-up gifts provided for each of the girls entered.

Serving as master of ceremonies for the event will be Frank Wright, Extension dairyman at Rutgers' Cook College.

Land once free, is now priceless

By JERRY WEBB
University of Delaware

ARK, Del. - Farming is fast becoming a closed s. One in which only the sons and sons-in-law of established farmers can gain entry. The financial requirements are so great, land so scarce, and the technology so sophisticated, that only the fortunate few who are born on the land will be farmers in the years ahead. It seems funny, but in only a few lifetimes we've evolved from a nation where land was virtually free to one where it is almost priceless.

The West was settled by young men who had little more than a desire to make it on their own. With that, and a few hand tools, they started farming, Farming became the economic marvel of pure competition - easy entry and exit, many buyers and sellers, little product differentiation and no one individual with any influence in the marketplace.

That was farming for a couple of hundred years in this country. There was plenty of land available almost for the taking and the market would accept what was produced even though the price was often not profitable.

Within that framework, American agriculture developed into the most productive and sophisticated system in the world. Our farmers were the best, even though they were underpaid for what they did, preferring their way of life to the better-paying city jobs.

But pure competion is a rough business and a lot of farmers failed. Each census of agriculture reports the toll as older farmers die off, retire, or sell out, not to be replaced. Sure their acres go right on being farmed, but usually by other farmers who are expanding, not by new farmers. So in the span of 200 years we've gone from a nation where virtually every man farmed to one where only a few call themselves farmers. We talk about a million farmers, but there may actually be fewer than 500,000 who are full-time, commercial farmers.

As time passes and the entry requirements become more rigid, that figure could be halved and halved again. Then the profession that was once for the common man will be in the hands of a select few who by accident of birth become farmers. No more pure competition, no more ease of entry. As existing farms come up for sale they will go to men already engaged in farming who will convince lenders that they have the know-how and the equipment to expand. Why shouldn't a banker go along with such a plan? A farmer who can demonstrate success with 500 acres looks like a sure bet for a second 500.

And so the land will pass on to fewer and fewer and the city boy will be virtually locked out. Even though he may be agriculturally trained and experienced, he won't be able to prove ability above the sons of farmers who are already lined up waiting to buy.

It won't be long before almost all small farms of a few years ago will vanish from commercial agriculture. They may be operated as part-time farms by the children who inherited them, but they'll make a small contribution to the total agricultural output. The commercial farm of 3 to 4 hundred acres as it exists today will have been replaced by the 4 to 5 thousand acre farm. That may happen sooner than you think. There are many such farms now and any young farmer who is looking has to be convinced that's the way to go. So as resources are available to him, he'll grow in land, machinery, knowledge and operating capital, until the 5000 acre operation controlled by one farmer will be common, and the super farm may then be 20,000 acres.

How far ahead are we looking? Not too far. The pace is going to pick up at an accelerating rate. If it took 200 years to get this far, you can bet it won't take half that long to achieve what I'm talking about. It's not too far out to think of the total crop production in a small state like Delaware being done by 500 farmers. The census report says there are now 3574 farmers in the state, so how long will it take to produce these agricultural aristocrats, these bluebloods of the soil, the twenty-first century's landed gentry. I'll guess 2050. That sounds like a good year, one that I can safely pick without fear of being proven wrong.

Which 500 farm families now tilling the soil will pass that special legacy down to their great grandchildren? I could list a few names, but I won't. I could also add that I think the 500 already display certain characteristics which will permit them to stay in the game for another 75 years and be part of that super agriculture of the next century. Look around you. You probably know some of those kinds of farmers too. I don't believe that they're too difficult to spot although they may not be judged as outstanding farmers by today's standards. Obviously it will take a different kind of farmer tooperate a 5000 acre farm. To even want to farm on that scale takes a special kind of guy.

One final thought. The most popular girls on agriculture college campuses in the years ahead could well be the farmers' daughters. To paraphrase an old saying - "It's just as easy to love a farm girl with no brothers and a lot of land."

PUBLIC AUCTION

Ag Council starts information exchange

WASHINGTON, D. C. - The Agriculture Council of America's new Media Council set the exchange information between urban and farm media as one of its major priorities at its kickoff meeting held in Washington, D. C. last month. The session was attended by about 25 representatives of the nation's leading farm media outlets.

"The exchange project is an extension of ACA's 'City-Farm Swap' program," explained Media Council co-chairman Royce Bodiford, Farm Director for KGNC-Radio of Amarillo, Texas. "That Swap involves an exchange of weekend visits between city and farm families - our project is going to target the participation of the people who work in farm and big city media."

The purpose of the project is to let a media member learn from audiences in a different market. It would involve the swapping of TV and radio programs, features and columns. The Swap was one of the activities the media group thought it could be most effective. The objective of the group is to utilize the skills of professional communicators in ACA's effort to build meaningful consumer support for American agriculture. Recognizing the diverse interests of the membership, two subcommittees were established: Farm Broadcasters and Agriculture Publishers and Editors.

Three primary purposes were outlined for the organization: 1) provide independent evaluation of ACA programs to insure they are newsworthy and of a high professional quality and integrity; 2) draw on the contacts, experience and talent of farm media in reaching larger farm and urban audiences and 3) inform farm audiences about specific ways they can take action to build a better relationship with the urban consumer.

"We can play a double role - one, of keeping the farmer informed of his public relations opportunities and at the same time, we have enough contacts in urban areas to get the farmer's story told to consumer," remarked the group's other chairman, Lane Palmer, editor of Farm Journal magazine.

The Media Council defined membership requirements along voluntary lines so that no activity would in any way compromise the editorial integrity of its members or the outlets they represent. These options of involvement include: providing editorial visibility for ACA programs; providing public service coverage to encourage individual membership support; direct participation in ACA programs designed specifically for the news media; or by providing independent evaluation of the ACA program.

The day before the meeting, Media Council members participated in ACA's "Farm Line" program, a toll-free telephone bank that lets people at the local level talk directly with national leaders in Washington. Secretary Bob Bergland headed up a panel of top-level officials for USDA and members of Congress that took calls on the subject, "Citizen Guidelines for USDA." Expansion of the audience base for this phone-in program was another major topic of discussion at the session.

The group emphasized that their programs should not compete or overlap with any existing efforts. "Our role will be to coordinate and enhance any individual effort to improve farmer-consumer communication," said Bodiford, the immediate past president of the National Association of Farm Broadcasters.

In addition to co-chairmen Bodiford and Palmer, those attending the meeting included: Wilson Carnes, The National Future Farmer; Glenn Goss, The Pennsylvania State University; Rich Hull, WIBW-TV-Radio; John Holliman, Associated Press Radio; Ed Jackson, Ag World; Ed Johnson, Agri-Broadcasting Network; Ann Kaiser, Farm Wife N

Rules of the road changed

HARRISBURG, - All licensed drivers are urged to obtain a pamphlet outlining the changes in the rules of the road that take effect July 1.

The phamplet explains the important changes established in the new motor vehicle code which was passed by the General Assembly last year.

The new point system, which generally increased the amount of fines and lessened the number of penalty points assessed for a violation, has been in effect since July 1, 1976.

There are many changes and the pamphlet deals with the major points.

– Allowing a right turn on a red light after a stop and where signs do not prohibit the turn.

– Giving pedestrians exclusive right-of-way at proper crosswalking areas.

– Permitting U turns where they can be made without interfering with the safety of the traffic flow.

– Demanding pedestrians to cross streets at intersections and crosswalks. If pedestrians do not cross streets at the proper areas they must give the right-of-way to all vehicles.

– Requiring an accident where someone is injured or killed to be reported to the local or state police. An accident report to the Department of Transportation is no longer requested unless police cannot investigate the mishap.

– Allowing passing on the right.

– Holding the vehicle pulling out from a yield sign automatically at fault if an accident occurs.

USDA proposes defining beef terms

YORK, N.Y. - The Department of ture has proposed several definitions to S. carcass beef ds to facilitate their interpretation.

's Food Safety and Service (FSQS) administers the ry meat grading , said that the ns are needed to clarify the meaning of the terms: carcass, side, quarter, wholesale cut, primal cut, and subprimal cut. The terms are currently used in the standards but are not defined.

When beef is federally graded, two grade marks are applied - one for quality (Prime, Choice, Good, etc.) and one for yield (Yield Grade No. 1, No. 2, etc.). Grading rules prohibit removing either one of these grade marks from a federally graded carcass, side, or quarter. Both marks may be removed, but not just one. However, when federally graded beef is marketed as retail cuts, subprimal cuts, or wholesale cuts substantially trimmed of external fat, the yield grade mark may be removed and the beef may be officially identified for its quality grade only.

The proposed definitions are:

Carcass - the two sides of the same slaughtered animal with or without the kidneys and after removal of the other viscera and the hide, head, feet, and tail.

Side - each of the two parts which results from splitting a carcass lengthwise through its approximate median plane.

Quarter - each of two portions which results from ribbing a side between the 12th and 13th ribs.

Wholesale cut - any one of the following subdivisions of a quarter: round, full loin (or short loin and sirloin), rib, chuck (square-cut chuck or arm chuck), brisket, short plate, flank, and foreshank. Except for the full loin and arm chuck, a combination of two or more of these subdivisions shall not be considered a wholesale cut.

Primal cut - any one of the major wholesale cuts - round, full loin (or short loin or sirloin), rib, and square-cut chuck. Briskets, short plates, flanks, and foreshanks are not primal cuts.

Subprimal cut - a portion of a primal or other wholesale cut such as those listed in the institutional Meat Purchase Specifications for Fresh Beef and similar cuts normally produced by beef fabricators. Examples of subprimal cuts include the arm section of a square-cut chuck, a rump and shank-off round, a boneless brisket, and a bone-in or boneless strip loin. A subprimal cut does not result from the trimming only of fat nor from the removal of only a minor amount of lean and-or bone from a primal or other wholesale cut.

Interested persons are invited to comment on the proposal until July 8. Comments should be sent in duplicate to: Hearing Clerk, Room 1077-S, U. S. Department of Agriculture, Washington, D. C. 20250.

The proposal was published in the June 8 Federal Register.

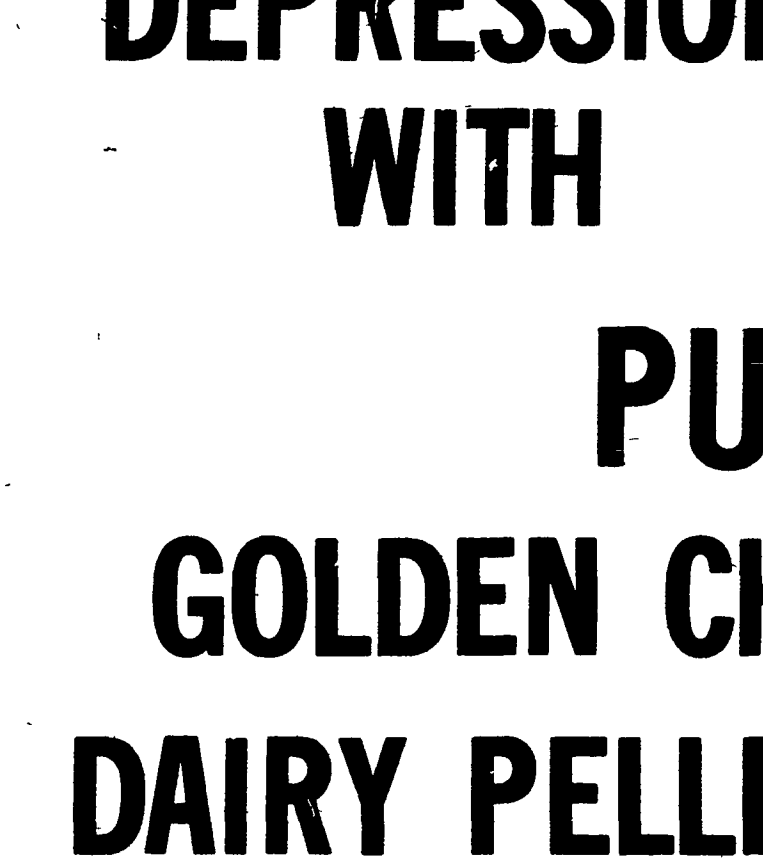
STOP SUMMER BUTTERFAT DEPRESSION WITH PURINA GOLDEN CHECKERBOARD DAIRY PELLETS - 16% - 20%



Purina's Golden Checkerboard was developed by Dr. Everett, Director of Purina Dairy Research, to combat butterfat depression when feeding hi-silage programs. Golden Chows are used at Purina's 1500 cow herd at Arkavalley, Arkansas located in a hot, dry climate where sorghum silage is the main roughage diet.
